NEWARK ELECTRONICS

CATALOG 101 — 50TH YEAR

TUBES
I.T.V.

Telephone Plugs 0-X-50

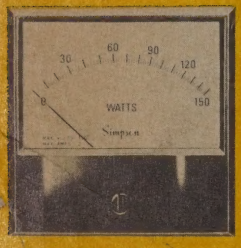
NEW 460 DIGITAL VOM
3½ digits plus analog readout.
AC or DC operation. 62F . . . Net **$395**

NEW 2726 DIGITAL COUNTE
6 full-time digits.
62F 2361 Net . . . $5
See page 637.

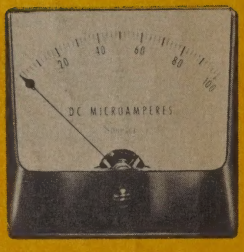
NEW 260-6 VOM
Many new features.
62F 2270 Net . . . **$65.**
See page 638.

Simpson

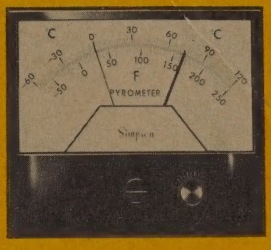
PANEL METERS • TEST EQUIPMENT AND INSTRUMENTATION PRODUCTS *always in stock at NEWARK*



NEW CENTURY SERIES PANEL METERS. Modern styling. Phenolic and glass construction.
See page 662.



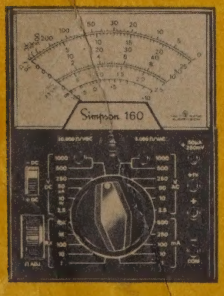
WIDE-VUE METERS
Many ranges and sizes.
See page 664.



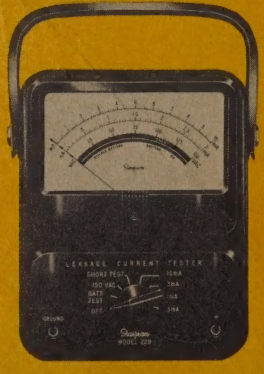
PYROMETERS, TEMPERATURE CONTROLLERS

METER RELAYS, CONTROLLERS
See page 670.

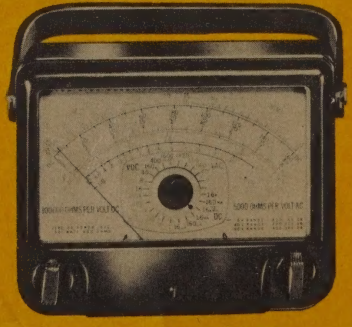
NEW 3623XA EDGEWISE CONTROLLE
Exceptional. *Se*
page 194.



160 HANDI-VOM
Full-size features in palm-size unit.
62F 1723 . . . **$55**
See page 642.



229 AC CURRENT LEAKAGE TESTER
Safety first tester.
62F 324 Net . . . **$90**
See page 643.



269-3 7-INCH VOM
100,000 Ω/volt. 62F 330
Net . . . **$98**
See page 640.

313 FET VOM
High stability.
62F 2273 Net . . . **$12**
See page 641.

Simpson
INSTRUMENTS THAT STAY ACCURATE

2755 MINIATURE STRIP CHART RECORDER
Operate over 30 days unattended. 10-channel events. 62F 2288 Net . . . **$175**
See page 644.

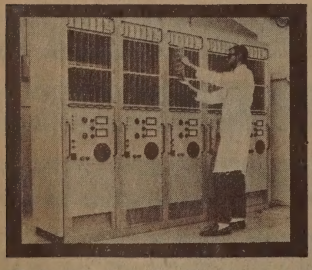
Problem Solving by Newark Through ESP

Extra Services Procurement

Newark's new ESP can provide you, in days, with the special services needed in unique procurement situations . . . special services that may take weeks or even months for normal channels to supply!

Here are just a few of the many "factory" services now available from America's leading electronic component distributor . . . Newark!

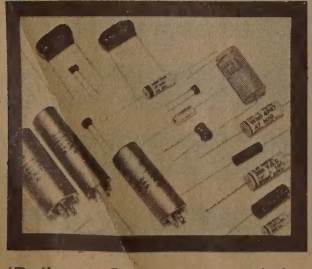
SEMICONDUCTORS



- Beta Selection
- Dynamic Testing
- Matching
- Voltage Selection
- Burn-in
- Static Tests
- High Reliability Testing
- Tape and Reel Packaging

(**Delivery:** 5 to 30 days, depending on parameters and quantities)

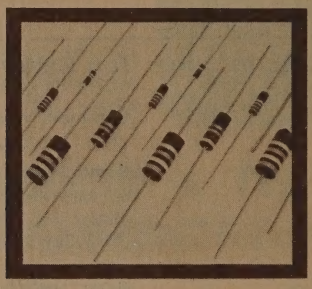
CAPACITORS



- Close Tolerance Testing to 0.1%
- Pretesting
- Matching Units
- Tape and Reel Packaging
- Military Packaging
- Parts Marking
- Component Conditioning
- Lead Cutting and Forming

(**Delivery:** One to two weeks)

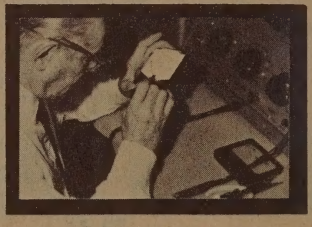
RESISTORS



- Close Tolerance Testing to 0.1%
- Pretesting
- Matched Units
- Reliability Testing
- Reel Tape and Packaging
- Military Packaging
- Parts Marking
- Burn-in
- Temperature Cycling
- Lead Cutting and Forming

(**Delivery:** One to two weeks)

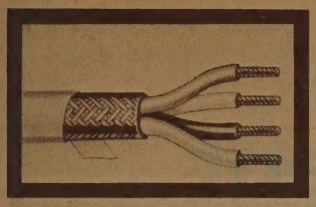
PANEL METERS



- Modification and Calibration
- Special Legends
- Multi-Range Scales
- Range Changes
- Special Scales

(**Delivery:** One to two weeks)

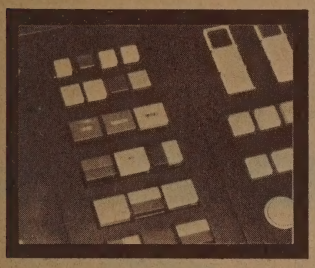
WIRE AND CABLE



- Special Harnesses and Cable Assemblies
- Cutting and Stripping
- Striping and Coding

(**Delivery:** 5 to 30 days, depending on quantity and specifications)

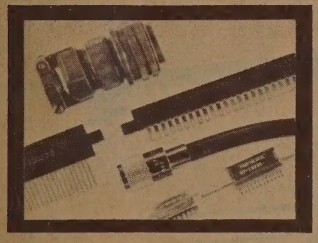
SWITCHES



- Modifications
- Engraving
- Special Assemblies
- Color Coding

(**Delivery:** One to three weeks)

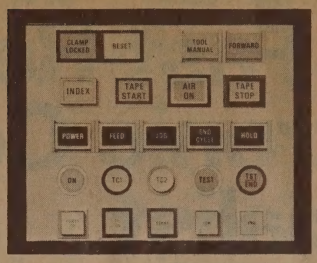
CONNECTORS



- Standard and Special Assemblies in Unlimited Combinations

(**Delivery:** One to three weeks)

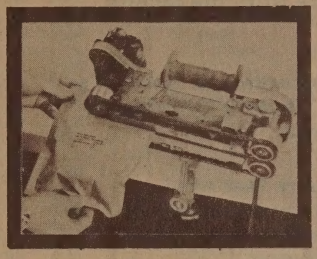
CUSTOM ENGRAVING



- Indicator Lights
- Meters
- Legend Panels and Name Plates
- Lighted Switches
- Pushbutton Switches

(**Delivery:** 5 to 10 days)

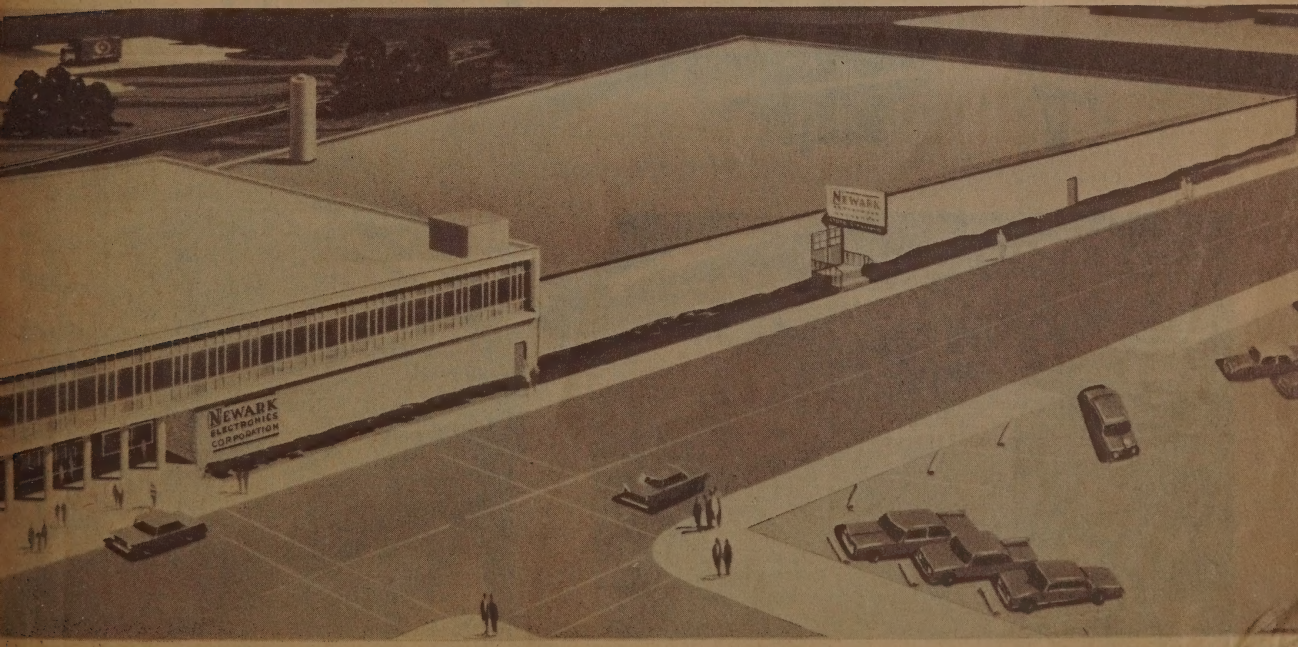
SPECIAL PACKAGING



- Any commercial or military required packaging, domestic or export, of resistors, capacitors, semiconductors, and many other electronic components.

(**Delivery:** 10 days)

IN ADDITION to the services above, **Newark can supply you with certification of Military Qualification Assurance on electronic components.**

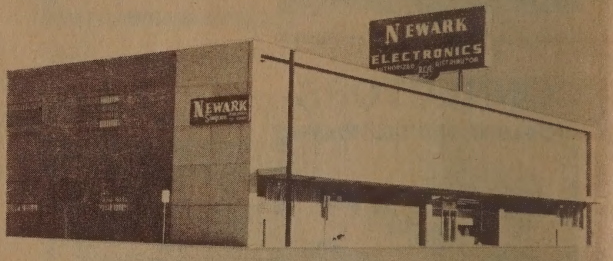


NEWARK!
Your Fast-Response Electronic Component Specialist...

SOLVING YOUR INDUSTRIAL SUPPLY PROBLEMS!

- Locations throughout the U.S.— immediate service from the facility nearest you.
- Extra Service Procurement, Newark's ESP, for special "factory" services in days . . . not weeks.
- Over 250,000 square feet of warehouses with multi-million dollar inventories for fast, off-the-shelf delivery.
- Computerized inventory control and order processing for fastest delivery with minimum back-orders.

Write, phone, wire or TWX NEWARK for the solution to your electronic component procurement problems!



Integrated Circuit Directory

SPECIFY MANUFACTURER AND TYPE NO.

Please be sure to specify the name of manufacturer and the type number of the device on your order. As new types are released, Newark will stock them.

SPECIFY MANUFACTURER AND TYPE NO.

Please be sure to specify the name of manufacturer and the type number of the device on your order. As new types are released, Newark will stock them.

SPECIFY MANUFACTURER AND TYPE NO.

Please be sure to specify the name of manufacturer and the type number of the device on your order. As new types are released, Newark will stock them.

Semiconductor Directory

SPECIFY MANUFACTURER AND TYPE NO.

Please be sure to specify the name of manufacturer and the type number of the device on your order. As new types are released, Newark will stock them.

SPECIFY MANUFACTURER AND TYPE NO.

Please be sure to specify the name of manufacturer and the type number of the device on your order. As new types are released, Newark will stock them.

MOTOROLA SEMICONDUCTOR LIBRARY

SWITCHING TRANSISTOR MANUAL. High-speed switching transistor manual provides design procedures for saturated-mode and avalanche-mode switching circuits, and relates data to practical worse-case circuit design. 356 pages.
52F862 ..... 2.50

SEMICONDUCTOR DATA MANUAL. Over 2600 popular industry-wide devices. Entire Motorola semiconductor line. Charts, curves, ratings, characteristics. Has everything needed by engineers and purchasing agents. 1,500 pp. 6¼x8½".
52F860 ..... 4.95

SEMICONDUCTOR POWER CIRCUITS HANDBOOK. 249 pages. Details practical circuits using power transistors, thyristors, rectifiers and regulator diodes. More than 100 circuits thoroughly tested by Motorola's application engineers.
52F861 ..... 2.00

ZENER DIODE HANDBOOK. 10 chapters, 184 pages. General properties and characteristics of zener diodes, including detailed analysis of zener characteristics and their response to electrical and environmental stimuli. Also includes regulator type semi-conductor devices. Easy to understand, highly informative.
52F853 ..... 2.00

ANALYSIS AND DESIGN OF INTEGRATED CIRCUITS. Integrated circuit textbooks covers in detail the analysis and design of both digital and linear integrated circuits. A three part format devoted to fabrication techniques and the modeling of integrated circuitry; a detailed treatment of the most popular logic circuits, and a complete coverage of linear integrated circuits.
52F056 ..... 17.75

SILICON RECTIFIER HANDBOOK. Comprehensive, 216-page source for rectifier circuit design features; computing single and multi-phase circuit values; heat sinking proper device cooling; voltage and current surge protection; Multi-Cell approach to very high-power rectification. Practical rectifier circuits.
52F856 ..... 1.50

INTEGRATED CIRCUITS: Design Principles and Fabrication. Divided into three sections: Semiconductor and Transistor Fundamentals, Integrated Circuit Fabrication and Integrated Circuit Design and Principle. This book covers virtually all aspects of integrated circuitry. Hundreds of diagrams and charts with easy to follow explanations. Included are many photos of the circuits and equipment.
52F102 ..... 13.75

TEXAS INSTRUMENTS MICROLIBRARY

FIELD EFFECT TRANSISTORS. Another in the T.I. Electronic series. By L. J. Sevin. Up-to-date discussion of newest solid-state device. Explains FET characteristics, FET use in low-level and non-linear circuits and other FET applications. FET circuits illustrated and analyzed. Includes application of FET. 138 pages. 7⅛x9⅞".
52F107 ..... 10.00

SOLID STATE ELECTRONICS. By Robert G. Hibberd. Presents the principles of semiconductors and explains their behavior on an atomic scale; details properties of pure and doped semiconductors, and tells how a transistor can amplify signal. Much more. 90 illustrations, 170 pages.
52F059 ..... 8.95

MOSFET IN CIRCUIT DESIGN. No. 13475. By Robert H. Crawford covers important new circuit element—metal-oxide semiconductor field-effect transistor. Has important appendices, conversion tables, and graphs relative to MOSFET work.
52F130 ..... 10.00

SOLID-STATE COMMUNICATIONS. Up-to-date discussion of new communication components used in a variety of applications in industry, in military equipment, and in consumer products. Book covers new communication devices, transistor parameters, typical parameter data, and VHF and UHF amplifiers. 380 pg. 7⅛x9⅞".
53F137 ..... 13.75

DESIGN AND APPLICATION OF TRANSISTOR SWITCHING CIRCUITS. By Louis Delhom. Details basic mechanism of transistor action, describes the fabrication and characteristics for various transistor types. Many topics not adequately covered elsewhere are fully explained in this book, i.e., graphical analysis of transistor and emitter-follower stage, the binary number system and Boolean algebra. Has 315 illustrations, 278 pages.
52F058 ..... 14.50

TRANSISTOR CIRCUIT DESIGN

Complete coverage of all semiconductor topics—ranging from interpretation of data sheets and measurements of transistor parameters, to design procedure for VHF power stages and discussions of the effects of complex thermal impedances on circuit stability. Reduces complex theory to circuit practice. 520 pages.
53F400 ..... 16.50

INTERNATIONAL RECTIFIER

ZENER DIODE HANDBOOK. A theoretical discussion coupled with practical considerations and illustrated application data on the use of semiconductor voltage regulating devices. A comprehensive guide to design characteristics.
63F089 ..... 3.00

SN7528	Sense Amplifier (Separate AND Outputs)	±4	3	4	0.25	0.005	−1
SN7529	Sense Amplifier (Separate AND Outputs)	±7	3	4	0.25	0.005	−1

LINE DRIVERS AND RECEIVERS

75, 76 and 72 as first two digits in type no. denote 0-70°C temp. range.
Case types*: Most devices available in L (TO-99), F (flat pack) and N (plastic dual in-line) packages.

Type*	Description	Differential Input Voltage in millivolts	High-level Input Voltage in Volts	Low-level Input Voltage in Volts	High-level Input Current in μA	Maxmium Common-mode Input Voltage Range in Volts	Total Power Diss. in mV	Propagation Delay Time (differential inputs) in nanoseconds
SN75107	Dual Line Receiver with SN7400 (TTL) Gate Output	3	.....	.....	30	±3	134	17
SN75108	Dual Line Receiver with SN7401 (Open-Collector) Gate Output	3	.....	.....	30	±3	134	19
SN75109	Dual Line Driver with 6-mA Typical Line Current	.....	3.2	0.22	.....	.....	180	8
SN75110	Dual Line Driver with 12-mA Typical Line Current	.....	3.2	0.22	.....	.....	285	9

Type*	Circuit Description	Circuit Characteristics
SN75324	400 mA memory driver with decode inputs	Input voltage for logical zero—any input—3.5 volts min. Input voltage for logical zero—any input—1.0 V max. Address input current, logical 1—200 μA max., logical zero—6 mA max. Timing input current, logical 1—100 mA max logical 0 12 mA max. Total pd—800 mW max.
SN75325	600 mA memory driver	Saturated dual sink/source monolithic memory driver wth output current capability of 600 mA with 25 volt typical output. Inputs compatible with DTL and TTL logic. Dissipation of 75 mW max. at 70°C case temperature.
SN75303	150 mA memory driver	Transistor array rise time—8 ns typ.; fall time—6 ns typ.; turn-on time 14 ns typ.; turn-off time—14 ns typ. Collector-base breakdown voltage—25 V min.; collector-emitter breakdown voltage—18 V min.; emitter-base breakdown voltage—5 volts min.
SN75150	Dual Communications Line Driver (EIA RS-232-C)	Features output short circuit protection to any low impedance voltage between −25 volts and +25 volts. DTL or TTL compatible common input strobe. Inverting output, 1 microsecond transistion through ±3 V transistors region under full 2500 pf load slow rate control and standard supply voltages.
SN75154	Quad Communications Line Receiver (EIA RS-232-C)	Input resistance 3K to 7K over full voltage range—built in hysteresis for increased noise immunity adjustable input threshold without external components, inverting output compatible with both DTL and TTL active pull up on output for more symmetrical switching standard supply voltage.
SN75450	Multi-Purpose Interface Circuit	500 mA dual driver, breakdown voltage of output transistors—30 V. Gate input and output current and voltage—TTL; gate pd, logical 0—8 ns, logical 1—12 ns. Combined gate/transistor turn-on delay—16 ns; turn-off delay—17 ns.
SN75451P	8-Pin Interface Circuit	500 mA driver; Dual; gate input and output current and voltage—TTL; overall turn-on delay—16 ns; overall turn-off delay—17 ns. Breakdown voltage of output transistors—30 volts.

SERIES 56/76 COMMUNICATIONS CIRCUITS

75, 76 and 72 as first two digits in type no. denotes 0-70°C temp. range.
Case types*: Most devices available in L (TO-99), F (flat pack) and N (plastic dual in-line) packages.

Type*	Circuit Description	Circuit Characteristics
SN76502	Logarithmic Amplifier	Quiescent output voltage—5.0 V. Device dissipation—166 mW; Scale factor (per dBV)—5 mV; input resistance—500.52; output resistance—200.52; positive supply current (V_{CC+} = 6 V)—18.5 mA; negative supply current (V_{CC-} = 6 V)—8.5 mA.
SN76514	Double Balanced Mixer	Quiescent operating voltage—10.5 V; supply current (V_{CC} = 12 V or 1Gv)—7.4 mA. Device dissipation—88 mW. Conversion gain (100 kHz-40 MHz)—14 dB; LO-IF isolation (100 kHz-40 MHz)—30 dB; LO-RF isolation (100 kHz-40 MHz)—60 dB; RF-IF isolation (100 kHz-40 MHz)—30 dB.

MECL

MECL non-saturating integrated logic circuits offer high fan-in and fan-out capabilities with propagation delay typically 8.0 ns per logic decision. Current drain is constant regardless of logic state or operating frequency, thereby minimizing noise generation. Because of common mode rejection of power supply variations, system designs will operate with power supply variations of ±20%. MECL circuits in this series are compatible with the higher-speed MECL II circuits. $V_{CC} = 0$, $V_{EE} = -5.2$ V, $T_A = 25°C$.

MECL II

MECL II high-speed non-saturating integrated logic circuits provide propagation delay times typically 4.0 ns per logic decision. Noise immunity of 175 mV is specified over the temperature range. Current drain is constant regardless of logic state or operating frequency, thereby minimizing noise generation. Because of common-mode rejection of power supply variations, system designs will operate with power supply variations of ±20%. $V_{CC} = 0$, $V_{EE} = -5.2$V, $T_A = 25°C$.

MECL III

The MECL III family of non-saturating integrated logic circuits is designed for very high speed digital system operation. Gate circuits are capable of subnanosecond speeds with local loading and of driving terminated lines with 1.5-ns rise times and 1.1-ns propagation delays. Flip-flop toggle frequencies are greater than 300 MHz. MECL III circuit design is similar to that employed in the MECL II family, however more advanced processing techniques are used and unused inputs may be left open.

$V_{CC}=0$, $V_{EE}=5.2$ V, $T_A=25°C$ L suffix denotes ceramic DIP (Case 620); S suffix denotes ceramic stud Flat Pack (Case 617).

• Toggle Frequency

DC Loading factors are based on: 1. Full load output current, I_L = —25 mAdc max
2. Maximum input current, I_{in} = 350 μAdc (High Z) 3.1 mAdc (Low Z)

MHTL

MHTL integrated circuits are designed to meet the requirements of industrial applications. Noise immunity is 5.0 V minimum, providing error-free operation in high noise environments far beyond the tolerance of other integrated circuit families. V_{CC} = 15 V ±1.0 Vdc, T_A = 25°C

MTTL

MC5400/MC7400 series MTTL integrated circuits are designed for general purpose digital applications. The family has a medium operating speed (15-30 MHz clock rate), good external noise immunity, high fan-out, and the capability of driving capactive loads up to 600 pF. V_{CC} = 5.0 V, T_A = 25°C.

MTTL COMPLEX FUNCTIONS

The MTTL complex functions are designed for digital applications in the medium to high-speed range. Each device is compatible with many or all of the families of MTTL and MDTL devices, as indicated in the table.

These MTTL devices provide significant reduction in package count and increased logic per function over devices in the basic MTTL and MDTL families.

MTTL BEAM LEAD

MCBC5400/MCB5400F series integrated circuits comprise a family of transistor-transistor logic designed for general purpose digital applications. The family has a medium operating speed (15-30 MHz clock rate), good external noise immunity, high fan out, and the capability of driving capacitve loads of up to 600 pF.

This series is produced using beam lead sealed junction technology. These devices are particularly useful in highly reliable systems using hybrid beam lead assembly techniques or standard flat package assembly techniques.

MTTL DIELECTRICALLY ISOLATED IC'S

The Dielectrically Isolated Integrated Circuit (DIIC) MTTL family is designed specifically for use in military and space applications that require a high degree of reliability under severe radiation environments and post irradiation operation. The MTTL DIIC family utilizes nichrome resistors, post metalization passivation, monometallic interconnections, and very small high frequency transistor structures to enhance the radiation resistant qualities of this line. Dielectrically Isolated MTTL has the same electrical characteristics and pin configurations as the conventional MTTL 54H/74H family which make them interchangeable. This feature eliminates the need for redesigning existing equipment to gain radiation-resistance, and allows the design engineer to utlize a familiar logic type for new systems.
V_{CC} = 5.0 V, T_A = 25°C

MDTL DIELECTRICALLY ISOLATED IC'S

The Dielectrically Isolated MDTL family is intended for use in military and space applications that require a high degree of reliability under severe radiation environments. In addition to dielectric isolation, this family of devices utilizes nichrome resistors throughout. A post-metalization passivation process further enhances the radiaton resistance qualities of the family and very small high frequency transistor structures are used throughout.

MDTL

MDTL integrated circuits provide an excellent balance of speed, power dissipation, and noise immunity for general purpose digital applications. Additional logic power is provided by the "Wired-OR" capability of the basic MDTL gate.

Motorola Digital Integrated Circuits

MRTL

Medium-power MRTL integrated circuits provide a broad line of low-cost, multi-function, digital circuits. Typical gate speed is 12 ns, with power dissipation averages of 19 mW (input high) and 5.0 mW (inputs low) per logic node. Devices from the MC700 Series have loading factors normalized for campatibility with the low-power mW MRTL devices for ease in mixing the two power levels in a system.

V_{CC} = 3.0 V ±10% for MC800F, G Series; 3.6 V ±10% for MC800P and MC700 Series. T_A = 25°C.

‡Operating Frequency (MHz)

LOW POWER MRTL

Low-power mW MRTL integrated circuits are designed for use where minimal system power consumption is desired. Typical gate speed is 27 ns, with typical power dissipation of 6.5 mW (input high) and 0.5 mW (inputs low) per logic node. Devices from the MC708 Series can be mixed with devices from the medium-power MC700 Series which has loading factors normalized for compatibility.
V_{CC} = 3.0 V ±10% for MC908 Series, 3.6 V ±10% for MC708 and MC808 Series. T_A = 25°C.

*Ordering Information

COS/MOS IC's are available in a wide variety of package designs. These packages are identified by Suffix Letters indicated in the chart shown below. When ordering COS/MOS devices, it is important that the appropriate suffix letter be affixed to the type number of the device required. COS/MOS AVAILABLE IN NEW LOW-VOLT TYPES!

Package	SUFFIX LETTERS: Commercial ("CD") Type Numbers: Standard CD4000 Series (5 to 15 V)	SUFFIX LETTERS: Commercial ("CD") Type Numbers: New CD4000A Series (3 to 15 V)

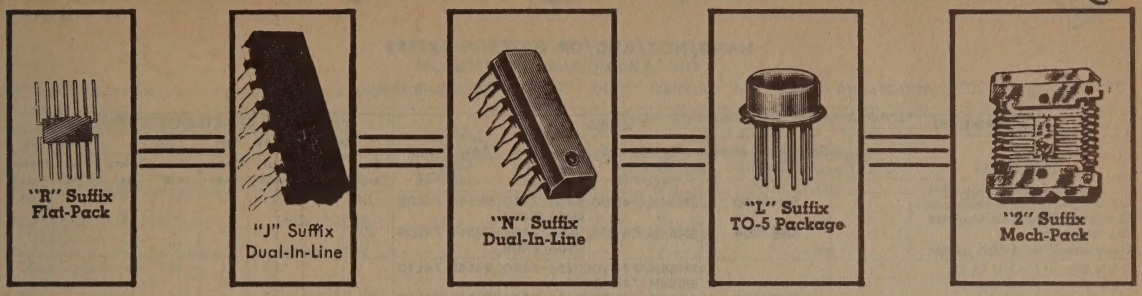
Texas Instruments Integrated Circuits



INTEGRATED CIRCUITS DEVICE DESIGNATIONS

Each time you order an integrated circuit the designation must contain three (and may contain four) parts.

1. Prefix 2. Unique Device Description 3. Package 4. Special Instructions (Optional)

EXAMPLE: SN 54H72 S 02

Prefix
MUST CONTAIN
TWO OR THREE LETTERS
SN Standard Prefix

Unique Device Description
MUST CONTAIN
THREE, FOUR, OR
FIVE CHARACTERS

Package
MUST CONTAIN
A SINGLE LETTER ONLY—L, S, N, J, or T.

L	TO-5 Type	8 or 10 Leads
N	Dual In-Line Plastic	14 or 16 Leads
J	Dual In-Line Ceramic	14 or 16 Leads
S	Flat Package Kovar	10 or 14 Leads Std.‡
T	Flat Package Kovar	10 or 14 Leads Long‡

‡Case in electrical contact with circuit substrate and ground pin.

Special Instructions
MUST CONTAIN
TWO NUMBERS

No.	Formed Leads	Insulator	Mech Pak Carrier	Tinned Leads
00	No	No	No†	No
01	Yes	Yes	No	No
02	No	No	Yes	No
03	No	Yes	Yes	No
04	Yes	No	Yes	No
05	Yes	Yes	Yes	No
06	No	Yes	No	No
07	Yes	No	No	No
10	No	No	No†	Yes
11	Yes	Yes	No	Yes
12	No	No	Yes	Yes
13	No	Yes	Yes	Yes
14	Yes	No	Yes	Yes
15	Yes	Yes	Yes	Yes
16	No	Yes	No	Yes
17	Yes	No	No	Yes

Formed Leads, Insulator, and Mech Pak Carrier are supplied free of charge. An Adder is charged for Tinned Leads.

†These flat pack circuits are shipped in the Mech Packette carrier.

BCD-to-Decimal NIXIE* Tube Driver	SN54/74141	4-Bit Binary	1-of-10 Lines	80	2.5 Max	7	65-V outputs‡

*Registered trademark of the Burroughs Corporation. **For driving indicators directly. †For driving discrete buffer. ‡For driving NIXIE* tubes directly.

CODE CONVERTERS

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	DECODES FROM (INPUT)	DECODES TO (OUTPUT)	TYP. CHARACTERISTICS TOTAL PWR (mW)	TYP. CHARACTERISTICS DELAY TIME (ns)	COMMENTS
BCD-to-Binary Converter	SN54/74184	6-Bits BCD	6-Bits Binary			Both converters cascadable to n-bits
		4-Bits BCD	4-Bits BCD 9's Complement	240	40 ns/Level	
		4-Bits BCD	4-Bits BCD 10's Complement			
Binary-to-BCD Converter	SN54/74185A	6-Bits Binary	6-Bits BCD	240	40 ns/level	

READ-ONLY MEMORIES

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	TYPICAL CHARACTERISTICS (PER GATE) POWER (mW per bit)	TYPICAL CHARACTERISTICS (PER GATE) ACCESS TIME (ns)	ORGANIZATION NUMBER WORDS	ORGANIZATION WORD LENGTH	ORGANIZATION TOTAL BITS	COMMENTS
256-Bit Read-Only Memory	SN7488	0.9	35	32	8 Bits	256	Fully decoded
1024-Bit Read-Only Memory	SN54/74187	0.46	40	256	4 Bits	1024	Fully decoded

RANDOM-ACCESS READ/WRITE MEMORIES

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	POWER (mW PER BIT)	ACCESS TIME (ns)	WRITE PULSE WIDTH (ns)	NUMBER WORDS	WORD LGTH	TOTAL BITS	
16-Bit Active-Element Memory	SN54/7481	14	20	25	16	1 Bit	16	Scratch-pad memory
16-Bit Active-Element Memory with Gated Write Inputs	SN54/7484	14	20	25	16	1 Bit	16	Scratch-pad memory
64-Bit Random Access Memory	SN7489	5.5	40	40	16	4 Bits	64	Fully decoded*
4-By-4 Register File	SN54/74170	36	20	25	4	4 Bits	16	Simul. read, write at 2 locations for hi-speed buffer or scratch-pad memories.

*For Scratch-pad or larger bipolar memories.

ADDERS

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	TYPICAL CHARACTERISTICS (PER GATE) POWER (mW per bit)	ADD TIME (1 bit)	ADD TIME (8 bits)	CARRY TIME (ns per bit)	COMMENTS
Gated Full Adder	SN54/7480	105	60 ns	104 ns	13 ns	Serial or Parallel Adders
2-Bit Binary Full Adder	SN54/7482	85	28 ns	64 ns	8 ns	Serial or Parallel Adders
4-Bit Binary Full Adder	SN54/7483	85	28 ns	64 ns	8 ns	Serial or Parallel Adders
40 Bit Arithmetic Logic Unit (ALU) and Function Generator	SN54/74181	115	24 ns	36 ns	1 to 3 ns	Full look ahead (Use SN54/74182) for High-speed Parallel Adders.
Dual Carry-Save Full Adders	SN54H/74H183	110	11 ns	88 ns	11 ns	High-speed serial or multiple-input, carry-save adders.

DATA SELECTORS/MULTIPLEXERS

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	TYPICAL CHARACTERISTICS (PER GATE) LINES PER PACKAGE	TOTAL PWR (mW)	DELAY (ns)	COMMENTS
16-Bit Data Selector/Multiplexer	SN54/74150	16	200	28	Has Strobe/Enable. Cascadable to n-lines.
8-Bit Data Selector/Multiplexer with Strobe	SN54/74151	8	145	20	Has Strobe/Enable. Cascadable to n-lines.
8-Bit Data Selector/Multiplexer	SN54/74152	8	130	20	Flat package. Cascadable to n-lines with external gating.
Dual 4-to-1-Line Data Selector/ Multiplexers	SN54/74153	Dual 4	180	22	Dual 4-Line-to-1-Line with Strobe/Enable.

SUPPLEMENTARY ARITHMETIC/LOGIC ELEMENTS

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

DESCRIPTION	TYPE	TYPICAL CHARACTERISTICS (PER GATE) TOTAL PWR (mW)	DELAY (ns)	COMMENTS
4-Bit Magnitude Comparator	SN54/7485	250	30	Provides fully decoded* 1 of 3 separate outputs. Cascadable.
4-Bit Magnitude Comparator (Low Power)	SN54L/74L85	20	90	Provides fully decoded* 1 of 3 separate outputs. Cascadable.
Quadruple 2-Input Exclusive-OR Gate	SN54/7486	150	15	Four separate, 2-input exclusive OR gates in a single package.
Quadruple 2-Input Exclusive-OR Gate (Low Power)	SN54L/74L86	15	75	Four separate, 2-input exclusive OR gates in a single package.
4-Bit True/Complement Zero/One Element	SN54H/74H87	270	17	Provides true complement, all 1's or all 0's for 4-Bit word.
8-Bit Odd/Even Parity Generator/Checker	SN54/74180	170	40	Generates or checks 8-Bits of Even or Odd Parity.

*A < B, A > B, or A = B

ASYNCHRONOUS COUNTERS

"74" SERIES DENOTES TEMPERATURE RANGE OF 0—70°C. "54" DENOTES 55—125°C.

UNIVERSAL COUNTER/7 SEGMENT DISPLAY DRIVER

UNIVERSAL COUNTER/7 SEGMENT DISPLAY DRIVER

TYPE HCTR0107D. A synchronous decade counter with controlled count direction and presetting BCD inputs. Independent storage register. BCD coder and seven 30 volt output switches. Diode protected inputs. Monolithic P-channel enhancement mode silicon construction TTL compatible. Vdd −18v, Vgg −24v. Package—24 pin DIP, 100 mil pin-to-pin spacing.

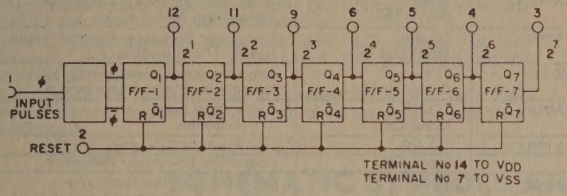
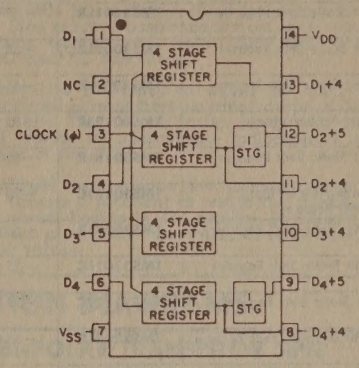
HUGHES AIRCRAFT COMPANY

COMPLEMENTARY INTEGRATED CIRCUITS

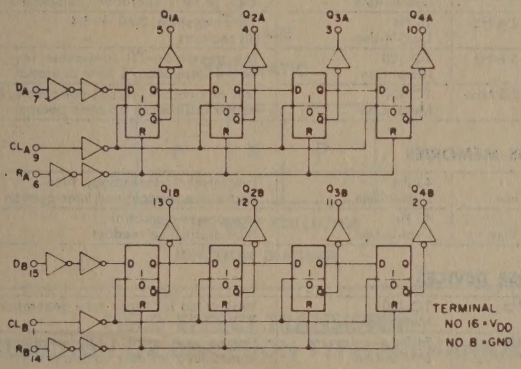
Monolithic medium scale integrated logic circuits. Operating single positive or negative power supply, 6-15 volts. Operating speed to 2 mhz with 10 volts. High noise immunity. High input impedance. Low power dissipation. 14 and 16 pin dual inline package.



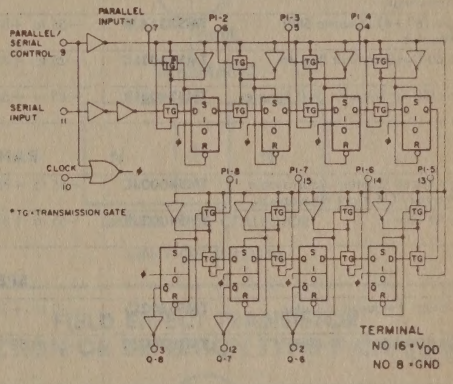
HCOS4004D



HCOS4006D



HCOS4014D



HCOS4015D

Type	Description	1-99	100-999
HCOS4000D	Dual 3-Input NOR Gate Plus Inverter	5.35	3.90
HCOS4001D	Quad 2-Input NOR Gate	5.70	4.14
HCOS4002D	Dual 4-Input NOR Gate	5.95	4.32
HCOS4004D	7-Stage Ripple Counter/Freq. Divider—TO5	10.90	9.00
HCOS4005D	16 Bit Non-Destructive Read/Right Memory	13.70	11.35
HCOS4006D	18 Stage Static Shift Register	13.80	11.40
HCOS4007D	Dual Complementary Pair Plus Inverter	4.54	3.30

NOTE: All units use 14 pin DIP except* uses 16 pin DIP.

READ ONLY MEMORY/CHARACTER GENERATOR

Type IROM2560	1-24	25-99	100-999
256x10 read only memory. Available with ASCII coding or custom coding. 500 nsec. access time. TTL compatible. Gate protected. Three chip enables. 28 pin dual in-line package. V_{DD} = GND, V_{GG} = −12V, V_{SS} = +5v	40.00	34.00	29.00

MULTIPLEXERS

Type	Description	1-24	25-99	100-999
HMUL1445	4 channel MOSFET Switch 14 pin flatpack	21.50	17.00	14.75
HMUL2661	6 channel MOSFET Switch Pkg.—TO-116	22.75	18.10	15.75
HMUX3705	8 channel Switch with 1 of 8 decoder on chip. Output enable control. TTL compatible. 16 pin dip	16.40	14.70	12.60

Type	Description	1-99	100-999
HCOS4008D	4-Bit Full Adder*	15.35	12.70
HCOS4009D	Hex Buffer Inverting*	9.10	6.60
HCOS4010D	Hex Buffer Non-Inverting*	9.10	6.60
HCOS4011D	Quad 2-Input NAND Gate	5.70	4.14
HCOS4012D	Dual 4-Input NAND Gate	5.95	4.32
HCOS4013D	Dual D-Type Flip-Flop w/Set-Reset	8.15	5.95
HCOS4014D	8 Stg. Parallel Input Serial Output Shift Register*	15.00	12.65
HCOS4015D	Dual 4 Stg. Serial Input Parallel Output—S/R*	15.30	12.65

NOTE: All units use 14 pin DIP except* uses 16 pin DIP.

TV SYNCH CIRCUIT

Type HSUB0525	1-24	25-99	100-999
Digital Video Timing Generator produces horizontal & vertical frequency synchronizing & blanking pulses for faster generation in 525 line video display systems. Automatic interlace. Inputs diode protected. 1.008 MHz input. Outputs: horizontal blank, composite synch, composite blank, video blank. V_{SS} = +5V, V_{DD} = −10V, V_{GG} = −15V, TO-100 Pkg.	21.75	17.25	15.00

SHIFT REGISTERS

Function	Type*	Operating Temp.	Speed	Package	Special Features
Dual 25 Bit Static Shift Register	**TMS3000LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Low power dissipation. Push-pull output buffers. TTL compatible
Dual 32 Bit Static Shift Register	**TMS3001LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Low power dissipation. Push-pull output buffers. TTL compatible
Dual 50 Bit Static Shift Register	**TMS3002LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Low power dissipation. Push-pull output buffers. TTL compatible
Dual 100 Bit Static Shift Register	**TMS3003LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Low power dissipation. Push-pull output buffers. TTL compatible
Dual 128 Bit Accumulator	**TMS3012JR**	−55 to +85°C	0-1 MHz	16 Pin Dual In Line	Single clock phase. TTL compatible. Recirculating control logic
Dual 16 Bit Static Shift Register	**TMS3016LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Low power dissipation. Push-pull output buffers. TTL compatible
6 Bit Serial In-Parallel Out Static Shift Register	**TMS3026JC**	−25 to +85°C	0-250 kHz	16 Pin Dual-In-Line	Single clock and power supply. TTL compatible complementary outputs
Dual 128 Bit Static Shift Register	**TMS3028LR**	−55 to +85°C	0-1 MHz	TO-100 Metal Can	Single clock phase TTL compatible
Dual 100 Bit Static Shift Register	**TMS3101LC**	−25 to +85°C	0-2.5 MHz	TO-100 Metal Can	Low threshold technology. DTL/TTL compatible. Low power dissipation
Hex 32 Bit Static Shift Register	**TMS3112JC**	−25 to +85°C	0-1 MHz	24 Pin Dual-In-Line	DTL/TTL compatible loading/recirculating and gated output control logic
Triple 66 Bit Dynamic Shift Register	**TMS3304LR**	−55 to +85°C	2 kHz-5 MHz	TO-100 Metal Can	TTL compatible. Low power dissipation. 5 MHz operation
Triple 64 Bit Dynamic Shift Register	**TMS3305LR**	−55 to +85°C	2 kHz-5 MHz	TO-100 Metal Can	TTL compatible. Low power dissipation. 5 MHz operation
Twin 512 Bit Dynamic Shift Register/ Accumulator	**TMS3309JC**	−25 to +85°C	10 kHz-5 MHz	16 Pin Dual-In-Line	TTL/DTL compatible. Recirculate logic on-chip. 10 MHz operation (multiplexed)
Triple (60+4) Dynamic Shift Register	**TMS3314JR**	−55 to +85°C	10 kHz-2 MHz	16 Pin Dual-In-Line	TTL compatible. 3-60 + 3-4 bit registers
512 Bit Dynamic Shift Register	**TMS3401LC**	−25 to +85°C	20 kHz-5 MHz	TO-100 Metal Can	Low threshold—TTL compatible. Low power dissipation. 5 MHz operation
Dual 100 Bit Dynamic Shift Register	**TMS3406LR**	−55 to +85°C	10 kHz-2.5 MHz	TO-100 Metal Can	Low threshold—TTL/DTL compatible. Low power dissipation. 2.5 MHz operation

RANDOM ACCESS MEMORIES

High-Speed Content-Addressable Memory (16 eight-bit words)	**TMS4000JC**	−55 to +85°C	250 ns Cycle Time	40 Pin Dual-In-Line	Low threshold technology. Non-destructive readout and interrogation
256 Bit Ram	**TMS4003JR**	−55 to +85°C	200 ns Access Time	40 Pin Dual-In-Line	Low power dissipation. Non-destructive readout

SPECIAL PURPOSE DEVICES

Six-Stage Frequency Divider	**TMS3802LS**	−10 to +55°C	0-100 kHz	TO-100 Metal Can	Well suited for organ tone generation
Digital Differential Analyzer Element	**TMS5700JC**	−55 to 85°C	0-500 kHz	24 Pin Dual-In-Line	Can be used to solve differential equations. Suited for desk calculators and control systems
Common-Source 10-Channel Analog Switch	**TMS6000JR**	−55 to 85°C	33 ns max. Turn On Delay	24 Pin Dual-In-Line	Designed for high-speed multiplexing applications
Six-Channel Analog Switch	**TMS6002JR**	−55 to 85°C	75 ns max. Turn On Delay	16 Pin Dual-In-Line	Low ROS (on)—200 Ω max. for time division multiplexing
Six-Channel Analog Switch	**TMS6005JR**	−55 to 85°C	75 ns max. Turn On Delay	16 Pin (.300 centers) Dual-In-Line	Low ROS (on)—200 Ω max. for time division multiplexing
Six-Channel Analog Switch	**TMS6009JR**	−55 to 85°C	75 ns max. Turn On Delay	16 Pin (.300 centers) Dual-In-Line	Low ROS (on)—200 Ω max. for time division multiplexing. Extremely low leakage

READ-ONLY MEMORIES

Row Output Character Generator	**TMS2403JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	64 character USASCII code 5x7 dot matrix
Row Output Character Generator	**TMS2404JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	66 character EBCDIC code. 5x7 dot matrix
2048-Bit Static Rom	**TMS2601JC**	−25 to +85°C	< 1 μsec Access Time	24 Pin Dual-In-Line	Sample program to demonstrate capability
2048-Bit Static Rom	**TMS2602JC**	−25 to +85°C	< 1 μsec Access Time	24 Pin Dual-In-Line	USASCII to SELECTRIC and vice versa code converter
2048-Bit Static Rom	**TMS2603JC**	−25 to +85°C	< 1 μsec Access Time	24 Pin Dual-In-Line	EBCDIC to USASCII code converter
Character Generator	**TMS4103JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	64 character USASCII code. 5x7 dot matrix
Character Generator	**TMS4177JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	Two devices used as a unit for 7x10 row output USASCII code
Character Generator	**TMS4178JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	
Character Generator	**TMS4179JC**	−25 to +85°C	700 ns max. Access Time	28 Pin Dual-In-Line	64 character EBCDIC code
4096 Bit Static Rom	**TMS4305JC**	−25 to +85°C	< 1 μsec Access Time	24 Pin Dual-In-Line	Organized as 512 words x 8 bits programmed with sine table. Single-ended output buffer
4096 Bit Static Rom	**TMS4306JC**	−25 to +85°C	< 1 μsec Access Time	24 Pin Dual-In-Line	(Same except push-pull output buffer)
Parallel Output Character Generator	**TMS4886JC**	−25 to +85°C	600 ns max. Access Time	40 Pin Dual-In-Line	64 character USASCII code. 5x5 dot matrix

***Listed in pricing index only**

Static characteristics—obtained with DC voltage potentials applied to the terminal of the transistor.

Dynamic characteristics—obtained with AC voltage on one electrode under various conditions of DC potentials on all terminals of the transistor.

Gain bandwidth product—the frequency at which beta (see forward current transfer ratio) is equal to zero. (Also see cutoff frequency.)

Forward current transfer ratio—a measure of the transistor's current gain. It is the ratio of the current in the output terminal to the current in the input terminal. Because of the different ways that a transistor may be connected in a circuit, the forward current transfer ratio is usually specified for a particular circuit configuration. (The common base ratio is most often called alpha, and the common emitter ratio, beta.) This ratio can be expressed for DC and AC conditions.

Cutoff frequency—the frequency at which the value of alpha or beta (see forward current transfer ratio) drops to 0.707 times its value at 1.0 kHz. This characteristic, along with gain bandwidth product provide an approximate indication of the useful frequency range of the device.

Breakdown voltages (all)—define the voltage values between two terminals (across a junction) at which the crystal structure changes and current begins to rise rapidly. Permanent damage will occur unless precautions are taken to limit transistor dissipation to safe values.

GE-25	PNP	High-voltage horizontal & vertical deflection amplifiers	7.50

EXPERIMENTAL/HOBBYIST ELECTRONIC COMPONENTS

Electronic components for experimenter, with schematic diagrams.

Type	DESCRIPTION	Net
GE-X1	SILICON CONTROLLED RECTIFIER. 117-volt solid state switch. Controls up to 4.7 amps.	2.60
GE-X2A	LIGHT ACTIVATED POWER switch. It will conduct up to 1/4 ampere, up to 25 volts.	2.80
GE-X3	HIGH CURRENT SILICON CONTROLLED RECTIFIER. For up to 13 amps @ 50 PIV.	4.00
GE-X5	HIGH SENSITIVITY SILICON CONTROLLED RECTIFIER. For special circuits up to 1.6 amps and 50 volts. Activated by extremely low signal power (a momentary sig. power of 200 micro watts or less).	2.30
GE-X7	REED SWITCH. Carries from 15 volt-amperes to micro-amps. External magnetic acuation.	.80
GE-X9	MED. SPEED, PNP TRANSISTOR. Germanium alloy. For medium power amplification and switching at low frequency.	.70
GE-X10	UNIJUNCTION TRANSISTOR. Three-terminal semiconductor. Has low value of firing current, stable negative resistance, stable firing current, high pulse current capability.	1.35
GE-X11	ZENER DIODE. Rated 8.2 volts at 1 watt.	1.80
GE-X13	DIAC—With schematic for building lamp dimmer or AC motor control.	1.60
GE-X16	SILICON CONTROLLED RECTIFIER — With schematic for building battery-operated fluorescent light.	3.45

NEWARK'S TESTING SERVICES

NEWARK'S growing specialization capability now provides complete testing for semiconductors and integrated circuits.

NEWARK offers volume testing for production and incoming inspection, burn-in capability as well as matching, selection and maximum reliability testing.

WHY NEWARK TESTING!

A. NEWARK Testing SAVES YOU MONEY— you need not invest in costly equipment.

B. NEWARK Testing, which is computer controlled PROVIDES BETTER CORRELATION to the manufacturers specifications.

C. NEWARK Testing is FAST, quantitities of up to 10,000 pieces returned within one week fully tested.

FIELD EFFECT TRANSISTORS DUAL ASSEMBLIES

TO-18 (6 lead). These matched pairs offer g_{m1}/g_{m2} match of .95 minimum to 1.0 maximum (except SU2078, −79, −80 which are .9 to 1.0 and 2N5047 which is .8 to 1.0). BV_{DGO} is 50 volts minimum (except SU2098, SU2099 which are rated 30 volts).

NEWARK OFFERS E.S.P. ON SEMICONDUCTOR PARTS

Extra Service Procurement means that you can order pre-tested and pre-stressed semiconductors directly from Newark. No longer do you have to invest in special testing equipment to insure near 100% reliability on all aspects of semiconductor usage. You benefit by 1) Reducing costs on defective semiconductor parts normally passed in manufacturer's 'acceptable level of quality'; 2) Avoiding special equipment purchasing and overhead required in testing—Newark does the testing for you; 3) Reducing time required for testing—Newark can usually guarantee delivery of tested parts within seven days; 4) Insuring higher fidelity to manufacturer's specs within a tighter range of variation. And with pre-tested parts you produce a higher quality, more dependable product with a reduced rate of return.

Newark Offers These Services in Testing Semiconductors:

- Beta Selection
- Dynamic Testing
- Matching Units
- Voltage Selection
- Burn-In (Aging)
- High-Reliability Testing
- Static Tests
- Temperature Cycling

Let Your Nearest Newark Representative Give You the Full Details

BASIC INFORMATION DEFINITIONS

Vbr = reverse breakdown voltage

PRV = Vrm(Rep) = maximum or peak reverse voltage repetitive

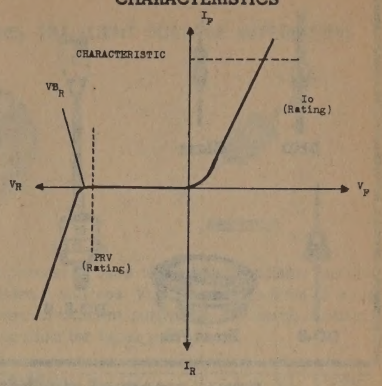
If = forward current

Io = output or maximum forward current

Ifm = maximum forward current (surge)

trr = minimum time required for zero or positive voltage before reverse voltage can be applied and blocked by the device—recovery time

CHARACTERISTICS



BASIC RECTIFIER CIRCUITS

Circuit Configuration	Circuit	Output Wave Values: Wave Form	Ed	Ea	Form Fact	DC Ripple %	Rectifier Diode Wave Values: Wave Form	Io	Irms	Vrm (WKG.)	Suggested Rectifier Diode Vrm (rep.) Rating
Change "B" to Single Phase Full Wave			.900 Erms	1.0 Erms	1.11	48		.500 Id	.786 Id	1.414 Erms or 1.57 Ed	3.535 Erms or 3.925 Ed
Change "C" to Single Phase Full Wave			.900 Erms	1.0 Erms	1.11	48		.500 Id	.786 Id	2.828 Erms or n Ed	7.07 Erms or 7.85 Ed
			1.350 Erms	1.351 Erms	1.001	4		.333 Id	.579 Id	1.414 Erms or 1.05 Ed	3.535 Erms or 2.625 Ed
Change "E", "S", and "Y" to Three Phase Full Wave			1.350 Erms	1.351 Erms	1.001	4		.167 Id	.408 Id	2.828 Erms or 2.1 Ed	7.07 Erms or 5.25 Ed
			1.170 Erms	1.171 Erms	1.001	4		.167 Id	.293 Id	2.45 Erms or 2.1 Ed	6.125 Erms or 5.25 Ed

Ed = Assembly average output voltage
Vrm(WKG) = Working peak reverse voltage
Io = Rectifier diode average current
Id = Assembly average output current
Ea = Assembly RMS output voltage
Irms = Rectifier diode RMS current

*Also available as military types in forward polarities only.

GENERAL ELECTRIC DIODES

GERMANIUM TUNNEL DIODES

TD-1

TD-250

Switching, 2 milli-μsecs; self-resonant frequencies cover the S band. For the TD-1 thru TD-5A types the Peak point voltage is 65 mU typical; valley point, 355 mu typical. Forward voltage, 500 mV typical. Peak point current ±10% except, (*) ±2.5% (#) —G in mhos x 10-3. ** Gallium arsenide.

Type	Cur. mA Ip	Cur. mA Iv	Max. pF	1-99	100-999	1000-Up

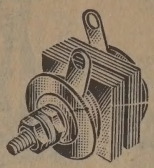
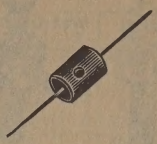
THYRECTOR DIODES, TRANSIENT VOLTAGE SUPPRESSORS



6RS21SA



6RS20VD

Transient voltage suppressors used to protect transistor circuits from internal and external sources. Voltage ranges from 25 volts to 600 volts, protection for current surges to 300 Amps. Contact your local Newark location for types and prices.

SILICON PLUG-IN TUBE REPLACEMENTS

Solid state rectifiers replace medium and high voltage tubes. Rugged construction, long life, no warm-up time, no filament supply required, low operating temperature. *High altitude types. Tube replacement is exact size and pin configuration of tube it replaces.

Type	Replaces Tube Type	1-24	25-99
*1N1237	0Z4, 5X4, 5Y4, 6AX5, 6X5	5.50	4.95
*1N1239	5R4	7.95	7.10

1N2633 (ST-3)	0Z4, 5X4, 6AX5, 6W5, 6X5, 6ZY5, 5839, 5852	5.50	4.95

200IR70 IGNITRON REPLACEMENT

For use in rectification Applications where phase control is not required. Units operate from —40°C to +65°C and from 50 to 400HZ Repetitive Vem = 1200V with built in transient suppressions. I f (av) = 225A convection cooled.

Type	Replaces These Ignitrons	1-24	25-99
200IR70	FG238B, WL653B, 5555, NL5555, AY5555/653B WL5555/653B, GL5555/FG2388	550.00	410.00

RCA Transistor, Thyristor, & Diode Manual, SC-14. Complete, authoritative reference provides comprehensive definitive information on biopolar & MOS field-effect transistors, thyristors (silicon controlled rectifiers, triacs, diacs), silicon rectifiers, other types of semiconductor diodes. Twelve text chapters on the operation, application & testing of semiconductor devices. Extensive Applications Guide. 656 pages.
52F837 ..... 2.50

RCA Power Circuits, DC to Microwave. SP-51. Expanded reference includes chapters on: Semiconductor Materials, Junctions & Devices; Silicon Rectifiers; Thyristors; Silicon Power Transistors; Regulation; Thyristor AC Line-Voltage Controls; High-Frequency Power Amplifiers; Control & Low-Frequency Power Amplifiers. 448 pages.
52F870 ..... 2.00

High-Speed, High-Voltage, High-Current Power Transistors, PM-80. 96-page manual describes theory and application of RCA medium-frequency power transistors. Typical circuits illustrate use of power transistors in amplifier, switching, and control applications. Selection charts facilitate choice of optimum type for military, industrial, or commercial applications.
52F902 ..... 2.00

MOLDED RECTIFIER ASSEMBLIES

Reduce manufacturing and stocking costs with encapsulated assemblies. Complete assemblies offer these benefits:

1. Elimination of design, test and manufacturing time with an assembly.
2. A power tested assembly manufactured with proven components.
3. Reduction of heat sinks.

All ratings at Tsink=55°C.

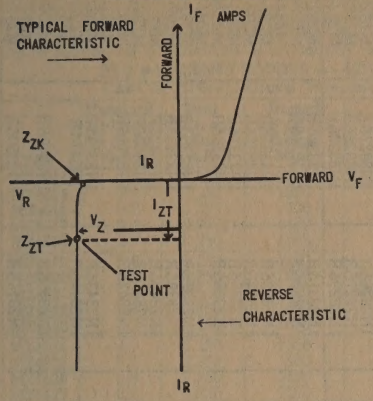
NEWARK IS A MATCH MAKER

NEW! NEWARK'S EXPANDING CUSTOMER SERVICES NOW OFFER YOU THE ABILITY TO HAVE SEMICONDUCTORS MATCHED WITH BURN-IN CAPABILITY BEFORE THEY LEAVE THE WAREHOUSE. THIS SPECIAL FEATURE IS OFFERED WITH FAST SERVICE AT COMPETITIVE PRICES AND THERE ARE NO QUANTITY RESTRICTIONS.

BASIC INFORMATION

TYPICAL ZENER DIODE CHARACTERISTICS



I_R — Reverse Current.
I_{RT} — Test Level Reverse Current.
V_Z — Breakdown or Zener Voltage.
Z_{ZT} — Impedance at Test Condition.
Z_{ZK} — Impedance at Breakdown.

VOLTAGE REGULATION

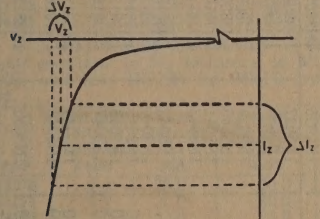
INSTRUCTIONS

Voltage regulation relates to the parameters of a zener diode as follows:

$\pm\%$ Regulation $= \frac{1}{2} V_Z \cdot \Delta I_Z \cdot T_C \cdot R_T$

where

V_Z = Nominal zener voltage in volts.
ΔI_Z = Zener current change in mA.
T_C = Temperature coefficient of V_Z in %/°C.
R_T = Thermal resistance in °C/watt.



HOW TO FIND % REGULATION

Step 1: Draw a line connecting V_Z on scale A with the typical T_C on scale B.

Step 2: Draw a line connecting intersection of line (step 1) on scale E with R_T on scale C.

Step 3: Draw a line connecting intersection of line (step 2) on scale B with zener current range ΔI_Z on scale D.

Step 4: Extend line step 3 to scale E and read value of regulation.

EXTRA SERVICE PROCUREMENT PROVIDES EXACT SEMICONDUCTOR COMPONENT TAILORING

- Tape and Reel Packaging

TYPICAL T_C, R_T

Wattage	Approx.* T_C %/°C	Approx.* R_T °C/watt
250 mW	0.01	700
400 mW	0.01	300
1 W	0.08	150
5 W	0.1	25
10 W	0.1	12
50 W	0.1	2

*Actual parameter for a specific device may vary widely. Please consult your Newark Semiconductor specialist for critical application.

EXAMPLE

Given: 1N2974 (10 watt), $V_Z = 10$ volts. $\Delta I_Z = 10$ mA.

From Table: $T_C = 0.1$ and $R_T = 12$

Step 1: Draw a line from 10 (V_Z) on scale A to 0.1 on scale B (T_C).

Step 2: From intersection on E, draw line to 12 (R_T) on scale C.

Step 3: From intersection of line step 2 on B, draw a line to 10 (ΔI_Z) on scale D.

Step 4: Extend line, step 3, to scale E and read regulation of 0.07%.

DIFFUSED SILICON ZENER DIODES 250 mW to 50 W

The industries highest quality and most popular line of zener diodes offers wattages from 250 mW to 50 watts. A wide selection of voltages and mounting arrangements are available for all applications. Please refer to the first page in the zener diode section for a definition of unfamiliar terms and application assistance. Detailed case size drawings at the end of the semiconductor section. Should you need for additional information check the Motorola Zener Handbook or call your nearest Newark semiconductor specialist. (Phone number on the cover)

500 MW ZENER DIODES

Case 51 (DO-7) Plastic Molded

The JEDEC type numbers shown indicate a tolerance of 10% with guaranteed limits on Vz, Ir, and Vf. Units with guaranteed limits on Vz, Ir, Zzt, Zzx, and TC are indicated by suffix "A" for 10% tolerance and suffix "B" for 5% tolerance.

SPECIAL NEEDS?

NEWARK CAN PROVIDE SPECIAL SERVICES, INCLUDING SEMICONDUCTOR

- BETA SELECTION
- MATCHING UNITS
- BURN-IN
- DYNAMIC TESTING
- VOLTAGE SELECTION
- HI-REL TESTING
- STATIC TESTS

BASIC INFORMATION

There is wide industry variation in the use of terminology applicable to SCR, triac and triggering devices. We have attempted to use individual manufacturer's terminology wherever possible. In most instances the terminology is self-evident when referenced the appropriate E-I characteristic discussed below. For any additional electrical specifications or technical advice consult your local Newark semiconductor specialist.

INVERTER HIGH FREQUENCY SCR's

All units in this group have high Dv/Dt; Di/Dt and fast turn characteristics which make them especially suited for inverter and other high frequency applications. They can also be used for general purpose applications.

TRIAC's FOR
Zero Voltage Switch, Selected Gate, 400 HZ

Triacs in series SC35, 36, 40, 41, 45, 46, 50, 51 above can be selected for (1) use with GE PA424 zero voltage switch—add suffix-12, example SC41E12. (2) for 25 mA max gate trigger current in all four modes add suffix-13. (3) operation at 400 Hz add suffix-14. **For pricing call your Newark semiconductor specialist.**

PROGRAMMABLE UNIJUNCTIONS—TO-98

Designed for a max. anode current of 150 mA and a max. anode reverse voltage of 40 volts. These programmable unijunctions allow the designer to program *n*, Rbb, Ip and Iv. Operating from —50 to +100 C° leakage is less than 40 mA at 40 volts. Minimum output voltage is 6 volts.

BASIC INFORMATION

SOME OPTO ELECTRONICS DEFINITIONS

Dark Current — The maximum current through the collector terminal of a detector measured under dark conditions (H=O), with a stated collector voltage load resistance and ambient temperature (base open).

H-Radiation Flux Density (Irradiance) mW/cm²—The total incident radiation energy measured in power per unit area.

SREO—Collector Emitter Radiation Sensitivity (mA/mW/cm²)—The ratio of photo induced collector emitter current to the incident radiation energy measured at the plane of the lens of the photo device under stated conditions of radiation flex density, collector voltage, load resistance, and ambient temperature.

Coherence (phase, spatial, and polarization)—The term implies that there is no variation in phase, amplitude or polarization at the wavefront.

Emitter — A very general term for any device from which radiation is given off.

I_L, Light Current — The photo induced current flow under stated conditions of radiation flux density, voltage and load.

Light — Refers to radiation that is not necessarily visible. This radiation may be analyzed and controlled by optical techniques.

Injection Laser Diode — A semiconductor p-n junction which uses lasing to increase the light output and concentrate the light in a small area. The initial radiation which is amplified by lasing comes from spontaneous (non-coherent) emissions precisely like those of an emitter. The amplification is in excess of 1,000 times. The amplification occurs only in the junction area where carriers are able to recombine and between the faces of a Fabry-Perot cavity formed by two parallel sides of the semiconductor chip. Thus, the amplified radiation is concentrated into a small area. The radiation leaves the cavity through the partially transmitting side of the semiconductor chip.

Laser (Light Amplification by Stimulated Emission of Radiation) — A device for generating light by lasing.

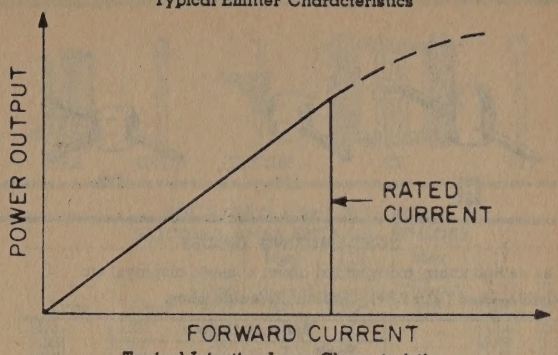
Lasing — The process of stimulating early recombination of carriers to emit radiation in the same direction as, and coherent with, some initial (stimulating) radiation. It represents amplification which preserves the direction, frequency, and phase of the amplified light.

Non-Coherent (or incoherent) — Refers to radiation without coherence . . . usually completely random in phase and direction.

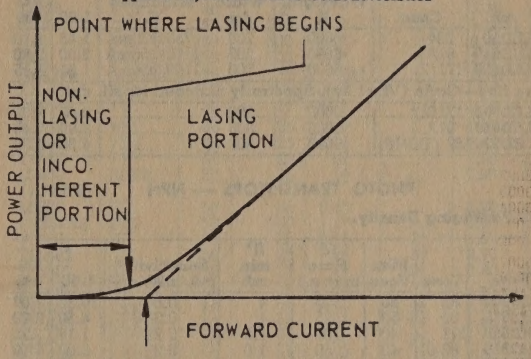
Radiation — A very general term to describe all electro-magnetic waves. It includes heat (14,000 to 40,000 A), visible light (4,000 to 7,000 A), infrared light, and x-rays (<30A).

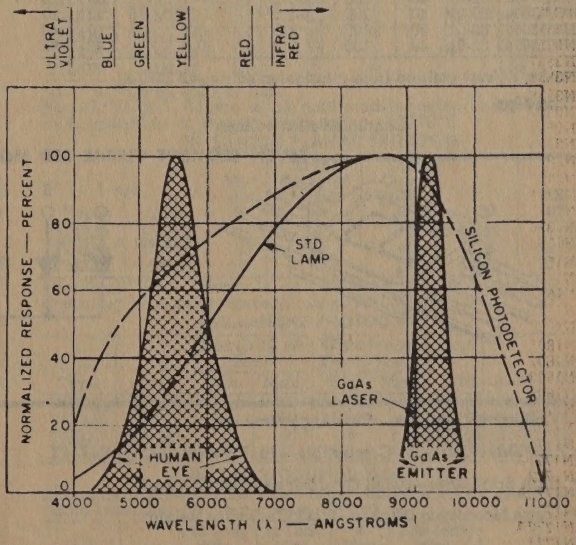
Spectrum — Band of wavelengths produced by the laser or emitter. Spectral width is usually defined between half-amplitude points.

Typical Emitter Characteristics



Typical Injection Laser Characteristics





RCA OPTO ELECTRONIC DEVICES

Lasers—Single Diode—Case OP-3

These edge emitting diodes will operate in a lasing mode when I_{FM} exceeds the threshold level. Designed for a duty factor of 0.1% (pulse duration = 0.2 μsec max.) the foreword voltage drop at maximum drive is typically 9 volts. Wavelength = 9050 ± 10 A.

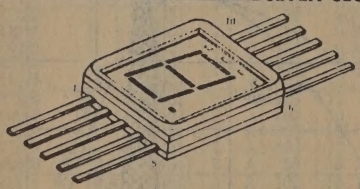
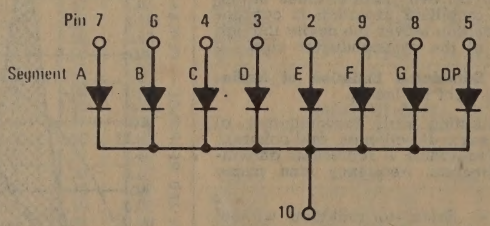
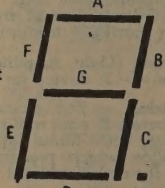
SEVEN SEGMENT VISIBLE RED MONOLITHIC READOUT MODULES





Segment Layout



- Visible Red Emission—6600 Angstroms (typ.).
- Low Drive Current—Compatible with Integrated Circuits.
- High Brightness—200 fL (typ. per segment @ 10 mA).
- Large Monolithic Display—0.125 Character Height.

For applications requiring visible numerical display with low drive power, very fast response time and high density mounting for multidigit readouts. Displays numerals 0 through 9 and the letters A,C,E,F,H,J,L,P and U. Figures are displayed on single plane and can be viewed a wide angle from perpindicular. Character height is .125" and width .08" on 9° slant. Case dimensions are .370" long, .290" wide and .10" high. Leads extend minimum of .250" from both sides of case.

OPTO-HYBRID READERS

- **High Photo Sensitivity**
- **Compatible Low Impedance DTL/TTL Output**
- **One Microsecond Response**
- **Sharp Light Detection Threshold**

DTL/TTL compatible digital output for punched card and tape data reading. Complete light sensor subsystems combine best qualities of a silicon photovoltaic detector with highly stable hybrid amplifier/digitizer microcircuitry in one package. Size and weight are one-tenth or less that of discrete layouts. Min. output at high (light) where I_{OH} = 0.2 mA, 4.5 VDC. Max. output low (dark) I_{OL} = —10 mA, 0.4 VDC. (Inverted output for negative logic also available). Propogation delay: 1.0 sec. Max. shape factor (defined as $F=1+(H_2-H_1)/Hth$): 1.10. Oper. temp., 0 to +75°C.

Power semiconductor coolers. 6001-4 series: have all directional air flow slanted vanes, more effective than other convection coolers per unit volume. 6401,3,21,23 series: for use with power transistors, hi-power diodes, and SCR's. Large surface area has low thermal resistance. 6141, 6601, 6500 series: small size for compact designs. All black anodized finish, MIL-A8625 type II.

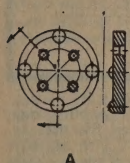
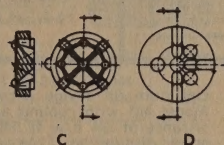
SEMICONDUCTOR MOUNTING AND LEAD CONVERSION PADS



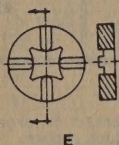
A

B

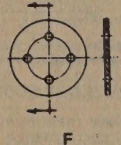
C



D

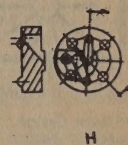


E



F

G



H

Mounting pads help prevent junction overheating while soldering. Achieve uniform height and spacing, easier cleanup and more room around leads of repair and replacement, and free air space for additional cooling. Conversion pads have added advantage of preventing solder bridges on circuit board. Nylon material per MIL-M-20693A. Packages of 100 only.

HEAT TRANSFER COMPOUND

Model 250. Improves the transfer of heat energy across the metal-to-metal interfaces between the transistor or rectifier case and the heat sink. Conducts heat 4 times better than silicon grease. 2 oz. jar.

43F550. NET **1.95**

CIRCUIT BOARD COOLERS

Black anodized conduction coolers. Heat is removed by being transferred to external surfaces. Cooler also serves as convenient holder. Model 1101: has 10-32 stud. Model 1116: tapped for a 4-40 size screw.

300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 1 1/16" hex case. Semiconductor mounting surface and one mounting foot unanodized. Type no. suffix indicates mtg. accommodations; see following page for key.

400 SERIES NATURAL CONVECTION COOLERS

Optimum fin design provides many semiconductor applications. Model 441 with cooling area of 400 sq. in. provides thermal resistance of .54- c/w @ 100 watts. Type 433 has 70-C rise at 100W power dissipation. Type no. suffix refers to mounting specs: see chart on following page.

THERMALLY CONDUCTIVE ADHESIVE

Type 152. High conductivity adhesive used: As general adhesive, for bonding semi-conductors to chassis heat sinks, fabricating heat sinks or thermal linds, for permanent bonding of all materials with highly thermal conductive interface. Porous and nonporous surfaces. Excellent dielectric strength. Bond shear strength, 1" overlap psi, 30 immersion in water unaffected. Temp. range —70°F to +300°F.

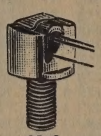
THERMAL RETAINERS FOR TO-5 CASES



254S

254S1

254T

254P
254D

The TO-5 case style including the Kovar header type is best heat sinked at the bottom face of the flange. All five types intended as thermal links from transistor case to a cooler or chassis member acting as the heat sink. Type 254-S1 has built-in electrical insulation. Material: Type 254-S1; 6061-T6 aluminum with gold irridite finish.

TYPE 695 CIRCUIT BOARD HEAT SINKS

Designed to accept semiconductors with threaded studs up to 10-32. Of 1100 -414 alum. with up to 5 watts heat dissipation for low power stud devices. For Jedec DO-4 case. Avail. Plain (Suffix "P1") or black anodized (Suffix "BA").

260-4SH18E Stud Mtg. for TO-18

260-4T5 Tapped Base

260-P18 Plain Base

Beryllium copper cup clips with brass bases for TO-5 case style transistors except (*) for TO-18. "E" suffix are epoxy insulated. "B" suffix are beryllium oxide insulated for applications requiring low stray capacity. No suffix are non-insulated and are soldered together with 63/37 tin lead alloy. Max. temperature is 300°F.

KURZ-KASCH

SPECK-O-LITE

The amazing Speck-O-Lite takes advantage of a new breakthrough in the science of optics: the fiber optic light guide. The Speck-O-Lite can effectively bend light around corners, take light into tiny crevices, and slide light through narrow slits that completely frustrate conventional lighting device. Use the shock-proof Speck-O-Lite to illuminate impossible-to-reach parts in a sophisticated assembly; read code markings on small parts without removing them from the recesses of an enclosure; light enclosed components from the inside if you have an opening as small as ⅛" thick.

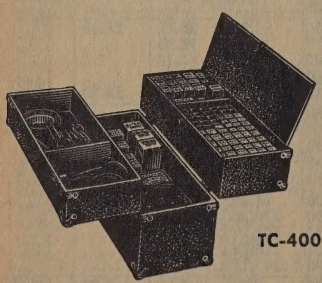
ARGOS TUBE CADDIES



TC-400

TC-400

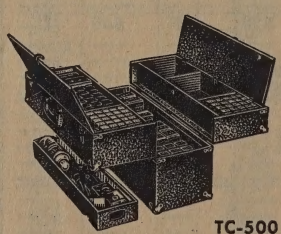
Carry-all Tube Caddy. A must item for all electronic service men, this case is a complete tube and tool kit. Holds up to 260 tubes with space for accessories. Grey vinyl covering. 21" x 15" x 8". Shpg. wt., 11 lbs.

86F747. NET..... 17.95

TC-200

Junior Tube Caddy. Small, easy-to-carry size. Holds up to 143 tubes, less with space or tools, meters, etc. Grey vinyl covering. 16 x 12½ x 8". Shipping weight, 7¼ lbs.

86F774. NET..... 11.50



TC-500

TC-600

Most rugged, strongest tube caddy in the line. Steel runners protect the caddy. Offers more than 3300 cubic inches for more than 300 tubes with space for tools, meters and accessories. Grey vinyl covering. 24" W x 16½" H x 8½" D. Shipping weight 20 lbs., 8 oz.

86F748. NET 31.95

TC-500

Super Tube Caddy has 3300 cubic inches for tubes, meters, tools and accessories. Removable tray. Grey vinyl covering. Size: 24" W x 16½" H x 8½" D. Shipping weight, 17 pounds.

86F746. NET 25.95

QUANTACON PHOTOMULTIPLIERS

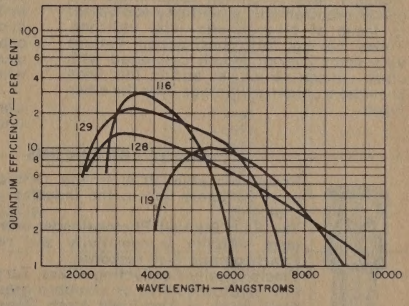
RCA's breakthrough in the use of III/V compounds as photocathodes and/or secondary emission materials in phototubes will unfold a whole new generation of Quantacon photomultiplier tubes. Listed below are some of Quantacons which are presently available. Others are under development.

The III/V compound, gallium phosphide provides up to an order of magnitude increase in secondary-emission ratio over conventional materials. When gallium phosphide is used for the first dynode of a Quanticon, this high secondary-emission ration provides a pulse-height resolving capability that permits discrimination of single, double, triple and quadruple electron events at the photocathode. When gallium phosphide is used for all the dynodes of a photomultiplier, the additional advantages of smaller size and reduced anode pulse rise time are achieved.

The use of III/V compounds, such as gallium arsenide and gallium-arsenide-phosphide, for photocathodes opens new vistas in broad spectral response photomultipliers with low noise performance.

- **Higher Secondary Emission Ratio**
- **Better Electron Resolution**
- **Low Noise in Signal Current**
- **Faster Rise Time**
- **Broad Spectral Response**

TYPICAL SPECTRAL RESPONSE (QE)



PHOTODIODES

Vacuum Photodiodes have excellent response to pulsed light, good stability, and are characterized by photocurrent response which is linear over a wide range of lincident light level. These tubes are frequently used for light comparison measurements. Typical applications: Photometry, Colorimetry, Spectrophotometry, Industrial controls, Facsimile.

Gas Photodiodes have a response to pulsed light that covers the audio frequency range. They are 3 to 5 times more senstive than vacuum photodiodes. Typical applications: Industrial Controls, Sound Reproduction.

PRELIMINARY SELECTION GUIDES

For Photodiodes

Spec. Resp.	Construction	Vac. or Gas	RCA Type(s)
S1	Single Unit	Vac.	917, 919, 922, 925, 6570
S1	Single Unit	Gas	1P40, 1P41, 868, 918, 921,923, 927, 930, 6405/1640, 6953
S1	Twin Unit	Gas	920
S3	Single Unit	Vac.	926
S3	Single Unit	Gas	1P29
S4	Single Unit	Vac.	1P39, 929, 934, 5653, 7043
S4	Single Unit	Gas	1P37, 4409, 5581, 5582, 5583
S4	Composite Anode/Cathode	Vac.	5652
S5	Single Unit	Vac.	935
S9	Single Unit	Vac.	1P42

For more information refer to the product line catalog and manual. RCA Photomultiplier Tubes, Image Converter tubes, Photodiodes, PIT-700A-58 pages. Provides tabulated data and preliminary selection chart for photodiodes. RCA Phototubes and Photocells, Technical manual PT-60. Provides theory, measurement, construction and principals of operation.

NOTE: the tubes listed in this section are not all the photomultipliers or Photociodes. Refer to the tube directory for a complete listing.

RCA CAMERA TUBES

RCA VIDACONS

The RCA Vidicons described here are designed for use in commercial, educational industrial, and military TV systems. Each Vidicon tube type is designed for a particular type of service and has operational performance, and mechanical characteristics best suited for that intended service. The table shown below is intended as a very preliminary selection guide. The different Vidicon type shown in this table are grouped in specific catagories of focus and deflection method, mesh-electrode connection, and heater power. The choices between these three catagories are briefly described, below the chart to make them more meaningful.

	Magnetic-Focus Magnetic-Deflection Vidicons					Magnetic-Focus Electrostatic-Deflection Vidicons	Electrostatic-Focus Magnetic-Deflection Vidicons		Electrostatic-Focus Electrostatic-Deflection Vidicons	
	½" Diameter Types	1" Diameter Types	1½" Diameter Types	2" Diameter Types	4½" Diameter Types	1" Diameter Types	1" Diameter Types	1½" Diameter Types	1" Diameter Types	Heater Power

FOCUS AND DEFLECTION METHOD

Magnetic-focus, electrostatic -deflection vidicons provide highest center and corner resolution but require the most electrical power and result in TV cameras having the most weight.

Magnetic-focus, electrostatic-deflection vidicons have resolution capabilities and power requirements essentially equivalent to those of all-magnetic type vidicons. Tubes having this construction feature very short overall length compared with other vidicon structures and in this area provides a unique advantage over the other types.

CHOICE OF CATAGORIES

Electrostatic-focus, magnetic-deflection vidicons have intermediate resolution capability, require intermediate electrical power, and find use in compact lightweight cameras.

Electrostatic-focus, electrostatic-deflection vidicons require the least of all vidicon structures and are intended for use in TV cameras that approach the ultimate in package size and weight. The resolution capability of this type vidicon however, is usually less than that of other type vidicons when operating volts are the same.

TUBE DIAMETER

Larger tube diameter provides more TV lines per picture height.

SEPARATE MESH ELECTRODE

RCA vidicons are available with separate mesh connection or with conventional mesh connection. Separate mesh connection vidicons provide higher and more uniform signal output when operated at high voltage than to comparable size vidicons having mesh and wall electrodes connected.

HEATER POWER

RCA vidicons are available with conventional 3.8 w heaters, 1.9 w heaters, and 0.6W Dark heaters for transistorized TV Cameras.

IMAGE ORTHICONS

From available RCA Image Orthicons, the most complete line in the industry, get your choice of:

The RCA Bialkali Photocathodes-with its long term stability in sensitivity and resolution, Panchromatic S-10 response.

Electronically-Conducting Glass Targets-Thin film semiconductive or standard glass target. Field Mesh or Non-Field Mesh Design. Field mesh offers a picture relatively free of bright edges, improved dynamic registration of color superior picture sharpness.

2", 3", or 4½"-Diameter Types-2" types for compact portable TV cameras, 3" types for conventional image-orthicon cameras, 4½" types for TV pickup systems requiring exceptional resolution and signal/noise ratio. Matched Sets for Color Pickup

The table shown below classifies the different RCA image orthicon types by target material, spectral response, field or non-field mesh design, and tube diameter. This table is intended to assist the camera tube user in making an initial selection of the image orthicon best suited for his television system.

	Electronically-Conducting Glass Target Types		Thin-Film Semiconductive Target Types		Standard Glass	Size

Spectral Response

RCA NUMITRON

DIGITAL DISPLAY DEVICES-SEGMENTED INCANDESCENT TYPES

- High Brightness—Fully Adjustable
- Low Voltage Operation
- High Contrast Segmented Digits
- Wide Viewing Angle
- High Reliability rugged Build
- Wide Spectrum

Type	Digital Display	Type	Digital Display
DR2000 DR2100 2R2010 DR2110	0-9 0-9	DR2020 DR2120 DR2030 DR2130	+ — and 1 + —

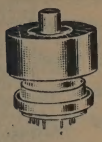
PR2010

DR2100

RCA Numitron types DR200 series and DR2100 series are digital display devices which provide a sharp, high-brightness numeric display. These low-voltage, incandescent-type devices have wide-spectrum light emission which permits the use of filters to obtain a display of any desired color. Intended for use in equipment which requires a numeric display output, these devices are fully compatible with IC decoder/drivers and may be operated in either a direct or multiplex mode.

Partial Listing. See RCA Tube Directory for full Camera Tube Listing.

RCA Power Devices

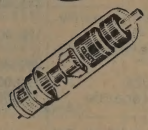


CW OPERATION

These units cover the entire power range from watts to megawatts, and also operate through the ultra high frequency band.

PULSE OPERATION

Special designs specifically for pulse communications, search radar, and accelerator applications. Also useful as regulators and modulators.



RECTIFIERS

Both High-vacuum and Gas-filled. These units convert AC line power to useful DC at all levels of voltage and/or current.

THYRATRONS

Triodes, tetrodes, gas mercury. These units are ideal for the control of high currents in special industrial applications.

IGNITRONS

Special purpose tubes. Ignitrons are used primarily for welding applications for both steady use and intermittent operation.

HEAT PIPES

Isothermal transfer of heat. Special component designed to improve the transportation and dissipation of heat to increase ratings and extend life.

DG10E READOUT TUBE

The **DG10E** is a compact digital Readout tube combining the plus-minus and righthand decimal point in the same tube. Added versatility is afforded by inclusion of a grid which allows easy strobing of the display which is a highly attractive light green. Green and blue filters allow highest light output although a subdued red is also possible, Power requirements are very small. Total grid and anode current is approximately 4 ma. Filament requirements are 0.9 volt at 100 ma.

GENERAL ELECTRIC

PHOTOCONDUCTIVE CELLS

Hermetically sealed after evacuation and back filled with dry air to reduce the moisture content to approx .015%. Cells come in three basic sizes, four power ratings, and multiple resistance ratings. Wide range enables the designer to select a maximum power dissipation of 75, 250, 300 or 600 mw. By using cells to operate many devices directly, amplifying stages can be eliminated and overall circuits greatly simplified. Cells have very high sensitivity and spectral response peaks in the visible light range.

Near maximum response obtained over large portion of the spectral region. All are in glass-metal packages. Have flexible leads and small size to dissipation ratio. No external shields required. May be used for annunciators, anemometers, camera aperture control. *Dia. excludes flange.

+Plastic encapsulated (not hermetically sealed) *Cadmium-selenide device.

PHOTOCONDUCTIVE CELL-LAMP COMBINATION

Photoconductor-lamp combination includes cadmium-sulfide (PL5C1 is cadmium-selenide) photoconductive cell and a variable illumination source enclosed in a light-tight package. Photoconduction is controlled by varying the voltage to the light source. Intended to be used for circuit isolation as a potentiometer free of moving-contact noise, and for low-level switching.

Type	Lamp Volts Current	Max. Volts	Resistance 20%V	Resistance 90%V	Temp.	1-249	250-499

DRY REED SWITCH

Contains a pair of magnetic overlapping, contact bearing canti-lever reeds sealed in a glass tube filled with dry inert gas. Life expectancy 20 million cycles. Operating temperature —65°C to 150°C. Shock without false operation. 40G's except DR100, 15G's. Length, with leads 3.21", Dia. .215". Contacts; normally open. Max. voltage 250 volts.

VACTEC Photo Cells

CdS AND CdSe VT PHOTOCONDUCTIVE CELLS

Ideal for circuit board mounting. Second digit indicates spectral peak 0=CdS5650A, 1=CdSe7350A, 2=CdS5150A, 3=CdS5500A (for high speed switching), 4=CdSe6750A, example: VT312 is type 1CdSe7350A. All have max. volt. of 300 except (*) 200 and ( ) 100. (**) indicates the minimum dark resistance (ohms) 5 seconds after 2 Ft-C.

ALL SOLID STATE VACTROL

The first light emitting diode/photoresistor control (LED-PC). The LED Vactrol utilizes a high efficiency light emitting diode to achieve high performance at a relatively low signal power. Operation with adequate resistance change down to 1 milliwatt of input power. Light-to-dark ratio of 1000:1 or greater. Operation at 75 milliwatts input power will permit a 40,000-hour life for the LED. No filaments to vibrate; high shock resistance. Available in TO-8 hermetically sealed enclosure or smaller axial configuration. Response time of photocell is proportional to input power. Vf for LED is 1.5 VDC. Hermetically sealed model VT-005-8) axial configuration model VT-030-18. Size: 61F1148—Mod. TO-8) 61F1149—.220 dia. x .250 axial.

Stk. No.	Type	Maximum signal current for 1 killiohm cell resistance	1-9	10-99

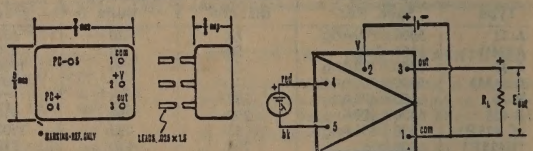
61F1149	VT-030-18A	20 ma		

PHOTOCELL VOLTAGE MULTIPLIER



Model PVM-1. This amplifier when used with any of the special Vactec photocells, converts it to a constant current source. Combination of cell and PVM makes a solid state equivalent of gas or vacuum phototube. Large voltage changes can be readily obtained with high load resistances. Frequency response from DC to 15KHz available with small area cells. Low supply voltage and current drain make this unit ideal for battery operation. Input: 3-15VDC @ 200μA, Output 4μA/fc Inactive cell area, Response: up to 10 usec., Peak Spect. Range: 5750°A, Temp. range: —25°C to +65°C.

Stock No.	Type	1-9	10-99	100-999
61F1137	PVM-1	3.50	3.00	2.75

SELENIUM PHOTOVOLTAIC CELLS

Constructed of steel Selenium, molecular layers of CdS and CdO. #30AWG vinyl coated wire leads on unmounted cells. May tolerate 100°C. "L" in type indicates soldered leads. Type A—long lived, most resistant to chemical fumes, more sensitive to shorter wavelengths; Type B—for higher current output and less fatigue. * indicates 100 Ft-C, Ohms, 75"F, light source 2850ßK ** means Epoxy (clear). *** Hermetic, blass to metal case.

PHOTOCELLS FOR USE WITH PVM-1

All cells furnished with 6" #30 AWG lead wires. Cells less than 0.045" thick and are coated with clear epoxy.
Other cell sizes available on request. Peak spectral response occurs at approx. 574 millimicrons of wavelength.

GENERAL ELECTRIC

LOW-VOLTAGE ALPHANUMERIC READOUT DISPLAY TUBES

Perfectly suited for computer displays, counters, production and test equipment. Because these readout display tubes have a total power requirement less than 200 milliwatts, they can be driven by a wide variety of commercially available integrated circuit logic packages.

Fluorescent segments are mounted on a single substrate to eliminate viewing difficulties due to parallax and to assure extra durability which makes tubes particularly adapted to portable product applications. Blue-green characters provide 200 foot-lamberts illumination for viewing range in excess of 40 feet and parallax-free viewing angle of 150°. With appropriate filters, other colors can be obtained from the same readout.

Operate in the very high speed range through the use of phosphor segments energized by electrons emitted from a directly heated common cathode. Form numerals 0 through 9, plus letters A, C, E, F, G, H, I, J, L, O, P, S, U and Y. Filament operating temperature is very low compared to "conventional" tubes and lamps. Low power, low voltage and rigid construction assure reliable long-life operation.

Y-1938 displays measure 0.570 inches high by 0.360 inches wide. Enclosed in standard T-6½ glass bulb which has miniature 9-pin socket. Overall dimensions: 1.750 inches high by 0.845 inches diameter.

Y-1939 has the same configuration and specifications as Y-1938, with two exceptions: decimal point display and a 10-pin miniature socket.

Y-4075 is especially suited where space is at a premium. Character displays measure 0.430 inches high by 0.230 inches wide. Features decimal point display. Packaged in miniature T-3 glass bulb with 10-pin socket. Overall dimensions: 1.625 inches high by 0.400 inches diameter.

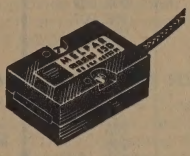
MELPAR, INC.

PHOTOELECTRIC READER



Consists of light source, lens and photocell. Utilizes the advantages of detection by reflected light. Lamp, 6v at 0.2 amp; dc recommended; nominal life 10,000 hr at 5.4v. Photocell; nominal input, 20vdc. Max. input, 300 vdc. 50 mv max. dissipation. Nom. response: 7250 angstroms, std. Maximum counting rate on std. unit; 300 counts per second. Versatile; counts, cues, sorts and inspects. Features small size (0.6 cu. in.), and insensitivity to ambient light.

Stk. No.	Description	1-3	4-9	10-24	25-49	50-Up
99F850	150 Reader	24.95	21.00	18.50	17.00	16.00

Replacement lamp for 150. **99F871**.....75

MODEL 200 PHOTOELECTRIC READER

Companion to the 150, designed for use in automatic control systems where target detection at ranges from 1" to 100' is required. See specifications above.

Stk. No.	Description	1-9	10-24	25-49	50-Up

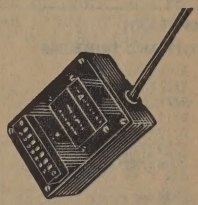
Replacement lamp for 200. **99F872**.....1.50

PHOTOELECTRIC CONTROL UNITS



Transistorized photoelectric control units provide high reliability at low cost for automatic control systems using the companion photoelectric readers 150, and 200A. These control units feature long life, ease of maintenance and highly simplified installation. In one compact unit are contained a power supply, amplifier and controlled switching.

Model 155A. Control unit companion to the 150 photoelectric reader. Input power: 115V, 60HZ, 6W. The control relay is SPDT, 115V 1A non-inductive. The maximum operating rate is 1000/Min. Complete with 5' cord. Case size: 4" x 2⅞" x 1½".

Model 205A. Control unit companion to the 200A photoelectric reader. Input power: 115V, 60HZ, 17W. The control relay is SPDT, 115V 1A non-inductive. Maximum operating rate 1000/Min. 5' cord included. Case size: 6¼" x 3¾" x 2".

Stk. No.	Type	1-3	4-9	10-24	25-49	50-Up

SERIES LIGHT L10 CHOPPER

Economical light chopper used for light beam modulation, pulsing, scanning, sweeping, and control. Exclusive features: Compact size, jeweled bearing, lower power input, wide angle of excursion (up to 20°), optical quality, high reflectivity and replaceable mirror and bearings. Specifications: Input power: Sine wave, 1½ v. (typical). Power consumption: 25 milliwatts. Mirror finish: aluminized front surface or optical mirror. Mirror size, 1 Cm^2. Frequency to 500 Hz std. Size $1\frac{29}{32}$" x $1\frac{15}{32}$" x .8".

Stk. No	Description	1-3	4-9	10-24	25-49	50-Up
99F854	L10 Chopper	55.95	47.95	38.95	33.95	29.95

TUNING FORK OSCILLATORS

A combination of tuning fork and high gain amplifier circuit which generates a sq. wave output with the application of dc voltage. Accuracy; ±.1% @ 0 to 65°C std., —40° to +100° operational. Input voltage: 12VDC. Output: Square wave, approx. 50% p-p min. of output voltage into 10K external load. The terminals are solder hooks which can be cut off to pin for printed circuit mounting. Typical applications: lab. std., test equipment, motor control, timers, etc. Stable, rugged and reliable.

The 10HDN6 is $1\frac{29}{32}$" x $1\frac{15}{32}$" x $1\frac{21}{32}$". All others are $1\frac{29}{32}$" x $1\frac{15}{32}$" x .4".

* Divided to 60HZ from 480 HZ.

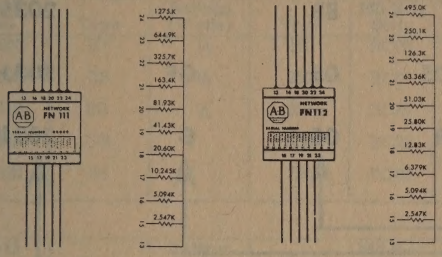
Allen Bradley Precision Resistor Networks

These thin film precision resistor networks are used in precision attenuators, voltage dividers, filter networks, measurement bridges, analog to digital converters, digital to analog converters, voice coding circuits and many other electronic circuits requiring close tolerance and low temperature coefficient resistors.
Provide tight absolute accuracies, low temperature coefficients of resistances and excellent tracking characteristics in a single, easily handled package. The excellent tracking characteristics of these networks are enhanced by depositing all resistors at the same time on selected glass substrates. Interconnections within each network are part of the deposited film, ensuring integrity and reliability in the circuit. Environmental protection is provided by use of multi-layer packaging techniques, including formulated proprietary encapsulants and epoxy boxes.

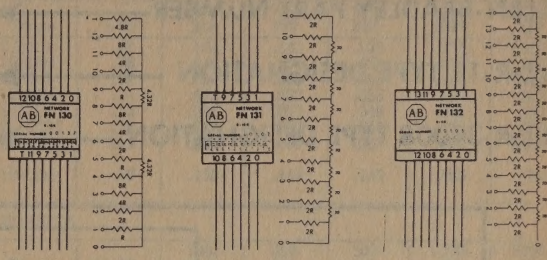


10 BIT BINARY ARRAY NETWORK

Precision Resistor Network specially designed for 10 bit binary operation with Fairchild's μA722 Integrated Circuit. Type FN111 is carefully trimmed, according to the Fairchild Semi-conductor μA722 Data Sheet, to provide network performance parameters necessary for 8 ± ½ bit system accuracy over the temperature range 0°C to +55°C. Size: ⅞"x⅞"x¹³⁄₆₄".

3 PLACE BCD ARRAY NETWORK

Precision Resistor Network designed for 3 place BCD operation (0-399) with Fairchild's μA722 Integrated Circuit. Type FN112 exhibits the network parameters necessary to provide 8 bit system accuracy (−20°C to +85°C) with ± ½ bit unit error of 400 ppm (0.04%) allocated to the resistors. Size: ⅞"x⅞"x.0205 max.



TYPE NO. FN131 & FN132

Designed for operation in H Panel D/A converter applications. Interconnections within network are a part of deposited film, ensuring integrity and reliability of circuit. Excellent tracking characteristics of networks are enhanced by depositing all resistors at one time on selected glass substrate. Environmental protection is provided by use of multilayer packaging techniques. Operating temp. range is −55°C to +125°C. Storage temp. range is −65°C to +125°C. Latter resistance tolerance is ±10% @ 25°C.
Type FN130, 12 bit network, 3 place BCD. Ladder resistance (R): 10K. Operating voltage: ±20 V Max. Network full scale accuracy: ± ½ LSB (±0.030%). Type FN131, 10 bit R/2R network. Ladder res. (R): 10K. Oper. volt: ±30 V Max. Network Accuracy: ± ½ LSB (0.048%). Type FN132, 13 bit R/2R network. Ladder res. (R): 5K. Oper. volt: ±20 V Max. Network accuracy: ± ½ LSB (0.006%).

ENDURANCE TESTS FOR THIN FILM NETWORKS

Temperature cycling, (per MIL-STD-202D, Method 102A, Test Condition C): 5 cycles from −65°C to +125°C. Load life, (per MIL-STD-202D, Method 108A, Test Condition D): rated load @ +125°C for 1000 hours. Humidity, (per MIL-STD-202D, Method 103B, Test Condition A): 90%-95% relative humidity, +40°C, load of less than 20% of rated load per resistor. Moisture resistance, (per MIL-STD-202D, Method 106C, except final measurements shall be made at room ambient conditions): insulation resistance greater than 10^6 ohms. Vibration, (per MIL-STD-204B, Test Condition B): 15G peak. Shock, (per MIL-STD-202D, Method 205D, Test Condition B): 30G peak, 11 milliseconds. Resistance to solder heat, (per MIL-STD-202D, Method 210, Test Condition B): 10 seconds @ +260°C. Terminal strength, (per MIL-STD-202D, Method 211A, Test Condition A): 3 lb. weight. Dielectric withstanding voltage, (per MIL-STD-202D, Method 301, Barometric pressure per MIL-STD-202D, Method 105C, Test Condition B): 500 V, 300 V respectively. Insulation resistance, (per MIL-STD-202D, Mth Method 302, Test Condition A. Minimum value): 10^{12} ohms.

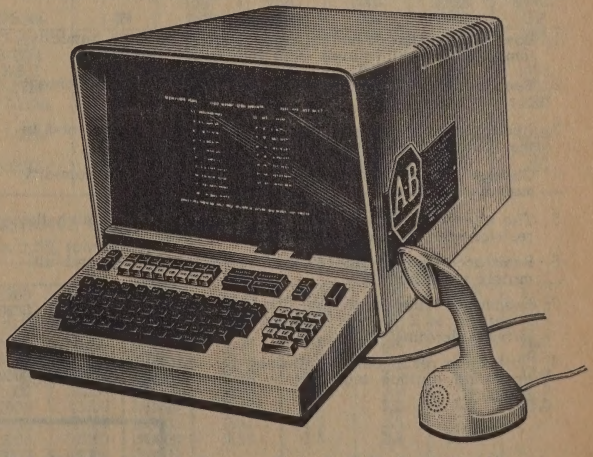
LET NEWARK AND THE IRIS SYSTEM WORK FOR YOU IN DELIVERING YOUR ALLEN-BRADLEY ORDERS!

Here's What IRIS—Instant Response Information Service—Means To You:

- Fast Order Processing and Delivery
- Steady Product Flow Insures In-Stock Condition —Newark Can Fill Most Orders "Off the Shelf'
- Five Installations—Chicago, Minneapolis, Grand Rapids, Detroit and Cincinnati—Are Tied Into the Program



Newark has a direct computer line into Allen-Bradley's main order facility. Now with computer speed Newark can replenish its stock of Allen-Bradley components only three days from initial order rather than the usual three weeks. Newark has established this computer-age link with Allen-Bradley so that we can serve you better with faster service and greater reliability.

With its new IRIS (Instant Response Information System), Newark's purchasing department can 'talk' directly into Allen-Bradley's computer—thus eliminating the people-to-people paperwork normally required before computer processing.

This system—incorporating a cathode ray tube terminal at Newark feeding directly into Allen-Bradley's computer—is the first of its kind in any industry. Newark has adopted it because it will enable us to keep a full stock of Allen-Bradley components at all times and in all conditions of ordering volume.

Thus you can be assured that Newark has and will make every effort to keep our service to you outstanding by adopting the latest concepts and methods in delivering your order.

Allen-Bradley Resistors

EXPLANATION OF PART NUMBERS

All Allen-Bradley hot-molded fixed composition resistors are identified by a Type Number which will provide information as to the type of resistor, resistance value and tolerance. The Type Number is merely for identification on drawings, specifications and ordering, etc. where it is convenient to describe a particular resistor.

ALLEN-BRADLEY PART NUMBER →		BB		2035
MIL-R-11 TYPE DESIGNATION →	RC05	05	GF	203J
MIL-R-39008 TYPE DESIGNATION →	RCR	05	G	203JS

Type
Fixed Composition Resistors, Insulated, Established Reliability

AB	II	39008	Style
BB	05	05	1/8 watt at 70°C
CB	07	07	1/4 watt at 70°C
EB	20	20	1/2 watt at 70°C
GB	32	32	1 watt at 70°C
HB	42	....	2 watts at 70°C

CHARACTERISTIC

Symbol	Max. ambient operating temp. 00% rated watt	Resistance-temperature characteristic: Nominal resistance (ohms)	Max. allowable change in resistance from resistance at ambient temp. of 25°C: At —55°C	At +105°C
G or GF	70°C	1,000 and under	±6.5%	±5%
		1,100 to 10,000	±10%	±6%
		11,000 to 0.1 M	±13%	±7.5%
		0.11 M to 1.0 M	±15%	±10%

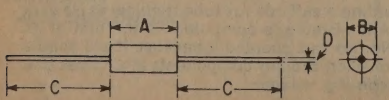
APPLICATION INFORMATION

This information is pertinent to the everyday application of Allen-Bradley hot-molded resistors. The information given should be helpful in evaluating the use of all types of A-B hot-molded resistors in broad general terms, and are not to be interpreted as precise.

1. Low-value resistors exhibit less change due to humidity, temperature and voltage than high-value resistors.
2. Resistance changes due to increase in moisture content are always positive.
3. Resistance changes due to humidity are temporary, and in the case of Allen-Bradley resistors are reversible.
4. Change of resistance which has occurred due to humidity may be essentially eliminated by drying at 100°C.
5. The effects of humidity may be minimized by operating the resistor with as little as 1/10 rated wattage load.
6. Resistance change due to load life is permanent and ultimately negative.
7. Resistance change due to load life can be minimized — 1 percent to 2 percent in many thousands of hours by 50 percent derating.
8. This same result can be attained by limiting the maximum operating surface temperature of the resistor under load to 100°C.
9. Resistance change due to soldering is positive and may be permanent if the resistor has moisture present in its body. It can be minimized if resistors are dry at the time of soldering.
10. The temperature characteristic of the Allen-Bradley resistor is positive above and below room temperature—room temperature is considered to be between 10°C and 30°C.
11. The temperature characteristic of the Allen-Bradley resistor is negligible from —10°C to +80°C.
12. The voltage characteristic (negative) and the temperature characteristic (positive) tend to cancel one another in an Allen-Bradley resistor under average operating conditions, where both significant voltage and elevated temperature are present.
13. Heat sink to which a resistor is connected affects its rating. Resistors operated in series or parallel should be derated unless an adequate heat sink is provided.
14. The quality and reliability of Allen-Bradley resistors is the same for, and independent of, any resistance tolerances shown on the resistor.



Watts	Allen-Bradley Type No.	MIL-R-11 Designation	MIL-R-39008 Designation	Dimensions In Inches: A	B	C	D

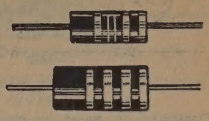
INDUSTRIAL GRADE MIL-R-11 STYLE RC



Hot molded fixed composition resistors are high quality, intended for general purpose use in the electronics industry. Because of their small size, uniformity, ruggedness and moderate cost, they are equally at home in military, industrial, and consumer product applications. Molded composition resistors meet all requirements for MIL-R-11, except minimum resistance under MIL spec is 2.7 ohms for ¼ and ½ watt and 10 ohms for ⅛ and 2 watt. Meets salt water and high humidity requirements. Unexcelled for low noise level. Dissipate heat rapidly—can be used at their full wattage ratings at 158 F. ambient temp. 1½" leads. Wt. 2 oz .

MIL-R-39008 STYLE RCR

Molded fixed composition resistors to meet all requirements for Mil-R-39008. Style RCR have established reliability to the "S" level or 0.001% failure rate per 1000 hours. The failure rate level is symbolized on the resistor by means of a 5th color band "S" = yellow. Can be used at their full wattage ratings at 158° F. ambient temperature. 1½" leads. Wt. 2 oz.

Texas Instruments Resistors

Designed to meet or exceed all requirements of specification MIL-R-10509F for characteristic C and D. Load rated for 125°C or 70°C applications. High degree of stability and reliability. Precision resistance tolerances. Rugged cap and lead construction. Temperature coefficient for D series ±100ppm for C series ±50ppm. Epoxy coated, and fully insulated. All units are MIL marked.

TEXAS INSTRUMENTS SENSISTOR® SILICON RESISTORS

TM⅛

TM¼

TG⅛

Solid state temp. sensing resistors. Temp. compensating. Positive temp. coefficient thermistors. **TM¼, TM-⅛** feature large positive temp. coefficient of resistance (approx. 0.7°/C). **TM-¼ & TM-⅛.** Molded case. Tolerance of ±10%. Axial leads, full lead at 100°C. Derated linearly to 150°C. Size: ¼" dia. x ½" length. **TG⅛.** Round welded case. Glass-to-metal hermetic seal between case and leads. ±10% tolerance. Full load at 125°C. Derated Linearly to 200°C. Size: ⅜" dia. x ¼" Ht. **TG-⅛.** Hermetically sealed. Meet all electrical requirements on MIL-T-23648A for pos.—TC thermistors ±10% tolerance. Ambient and Storage Temp. Range: —65°C to 150°C. Power dis. (at 25°C) —250 mW; at 100°C—125mW. Wt. 1 oz.

ESTABLISHED RELIABILITY TYPES RNR AND RNC TO MEET MIL-R-55182

Dale manufactures a broad line of ultra-precision, high stability resistors which feature improvements in all performance parameters. Temperature coefficient (TC) in table below is given in ppm/°C. MIL-R-10509 METAL FILM RESISTORS. Meet or exceed requirements for Characteristic E (±25PPM/°C) metal film resistors as set forth in MIL-R-10509. Available in just two weeks.

RNR55

MIL-R-55182 ESTABLISHED RELIABILITY RESISTORS. Supersedes MIL-R-10509. 1% tolerance. Minimum order 10 pieces.

Meet a variety of industrial and military applications. Vacuum deposited metal film resistors have inherently good RF characteristics and low noise level. Epoxy-molded construction protects other severe environmental factors. 1% tolerance.

Type MF. Epoxy molded. Meets MIL-R-10509.

EXPLANATION OF MIL-NUMBERS

(A)	(B)	(C)	(D)	(E)
RN60	D	249	4	F

(A) Identifies size and wattage.

(B) Identifies characteristic.

(C) Identifies ohms. First 3 digits are significant.

(D) An additional figure indicates number of zeroes that follow. If an R follows, it represents decimal point for values under 100 ohms or fractional values. Digits following R become significant, as 24.9=24R9.

(E) Identifies resistance tolerance. In this case, ±1%.

CHARACTERISTICS

Code	Max. Ambient at Rated Watts	Max. Change Due to Moisture Resistance
B, D	70°C	±3% wet, ±1.5% dry
C	125°C	±0.5%, wet or dry
X	40°C	±4% wet

Type DC and DCS. Low cost miniature resistors designed for excellent protection from moisture, salt spray and other environmental conditions. Ideal for applications requiring high stability and accuracy combined with long reliable load life. Pure crystalline carbon film (no binder or filler). Excellent high frequency characteristics. Tolerance 1%. Full power to 70°C, derating at 0 at 165° C. Sizes: DC-1/4—Dia. .109 x Lt. .468 DCS1/2 Dia. .171 x Lt. .562.

DALE Precision Resistors

TYPE RH-MIL-R-18546

Resistors are wire wound type with special resistance-temperature characteristics and housing configurations designed to meet MIL-R-18546 specifications. Constructed to provide a flat surface and recommended for chassis mounting to assure proper heat dissipation. Molded construction in a die-cast, gold anodized-radiator finned aluminum housing. 100% impervious to moisture and salt spray. Heavy duty leads.

TYPE RS—MIL—R-26 MIL-R-23379

Type RS. These should be specified when space is at a premium and when precision and power are needed. They are of the conventional type with pigtail mounting leads. They are completely protected and silicone sealed. Surpasses MIL-R-26.

TYPE 200 "BROWN DEVIL" RESISTORS

High quality, compact wire-wound resistors for voltage-dropping, bias units, bleeders, etc. Extra-sturdy all-ceramic vitreous enameled. Protected against shock, vibration, heat and humidity. Have standard resistance tolerance of ±5%. 8-watt units have 1x5/16" cores: 12-watt units, 1¾x5/16" cores; 20-watt units, 2x7/16" cores. All have 1½" leads. Average shipping weight, 3 ounces.

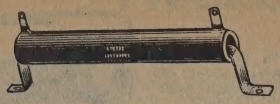
Newark provides Extra Service Procurement so we can meet our customers' needs in the shortest possible time. We can normally furnish on seven days notice special resistor groups to fit your special requirements. Newark will fill from our stocks resistor oders requiring close tolerance testing to 0.1%, parts marking, matched units, pretesting, reel tape and packaging, reliability testing or temperature cycling. Contact your Newark representative for detailed information and price quotation.

OHMITE Fixed Resistors



Lug type, wire-wound with vitreous enamel. Wire of the finest alloy and largest possible size is used for each resistance. The original uniform close spacing of the turns is maintained by the anchoring effect of the vitreous enamel. The wire is securely welded to the terminal lugs. Tolerance: 5%. Shpg. wt: 10-50 watts, 4.0 oz.; 100-225 watts, 1 lb.

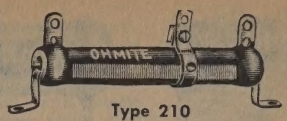
Adjustable Dividohm® OHMITE

"Dividohm" Vitreous Enameled Resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Handy for obtaining odd resistance values, for adjusting circuits and for use on equipment which must be set to meet various line voltages. Resistance is changed by moving the adjustable lug. Contact can be made to any wire along the length of the resistor making voltages lower than rated voltage available. Stated wattage rating applies only when the entire resistance is in the circuit. Tolerance: 10%. Avg. Shipping wt. 12-50 Watts, 4.0 oz.; 100-225 Watts, 1 lb.



Type 210

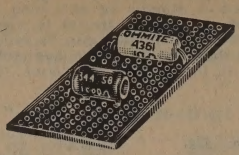
OHMITE Resistors

CLASS PC-58 RADIAL LEAD WIREWOUND RESISTORS

3 watt

5 watt



Radial leads eliminate cutting, bending and forming of leads and reduce total length compared to axial leads, thus effecting labor savings and increasing packaging density. Built-in standoffs provide correct spacing between resistor and PC board. Fit standard 0.1" matrix boards with .046" dia. holes. T.C.: under 260 ppm/°C. 3-watt resistors under 3300 ohms and 5-watt resistors under 6800 ohms are coated with vitreous enamel; all others coated with Ohmicone Type 470 silicone-ceramic. Size (LxD): 3-watt types, .300x.335"; 5-watt types, .500x.375".

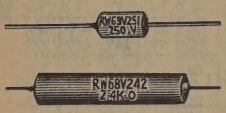
OHMITE MOLDED VITREOUS ENAMELED RESISTORS — SERIES 99
TYPE 991 MILITARY AXIAL LEAD POWER RESISTORS



Meets the requirements of MIL-R-26E insulated styles RW67V, RW68V, RW69V. Tolerance ±5% 1000 VAC insl. brkdwn. Vitrified, permanent markings. Leads 1½ in. long. Resistors utilize a single layer winding of high grade resistance alloy on a ceramic core. Axial type terminal leads and the resistance wire are both welded to metal end-caps which fit snugly over the core ends. Tough, moisture-resistant, vitreous enamel material is molded around the resistor. Provides a uniformly thick, dense, smooth covering. Av. Shpg. wt., 4 oz.

TYPE 995 "MOLDED VITREOUS" AXIAL-LEAD RESISTORS

All welded vitreous enamel resistor with 1000VAC insulation. Resists chipping, breaking, and protects against moisture, salt spray, and salt immersion. Vitrified markings resist high temperatures, solvents, and abrasions. Standard resistance tolerance: ±5%. Leads tinned, 1½"L. All sizes 20 gauge except 1½ w.: 24 gauge. Leads can be bent sharply at the body. Uniform dimensions permit use in automated assembly insertion equipment.

Seven engineering prototype lab assortments of composition resistors in handy cabinets. Resistance values from 2.7 ohms to 22 megohms. Each drawer has 8 sections individually marked with ohmic values. Quantities per ohmic value vary between 5 each and 30 each, depending on the popularity of the value. The ±5% assortments have 160 different ohmic values while the ±10% assortments have 80 values. Cabinet mounts on wall or stands on bench.

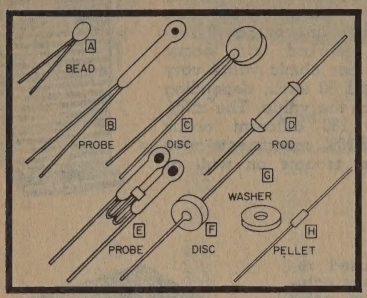
NEWARK Electronics proudly announces availability of special resistor services:

- *Close tolerance testing to 0.1%*
- *Parts marking per your specifications*
- *Matching units for close tolerance work*
- *Pretesting for high reliability*
- *Special packaging per your specifications*
- *Cutting and forming of leads*
- *Temperature cycling*

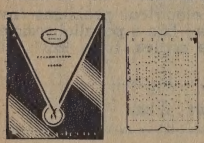
NEWARK service is as close as your phone

Thermistors



High-reliability precision thermal resistors with high negative coefficient of resistance. As temperature increases, resistance goes down. Use glass coated beads for compact size, fast response, and where temperatures go to 600°. Medium-small glass probes similar to beads, but are more rugged, mount more easily and are useful in liquid media. *Iso-Curve interchangeable glass probe thermistors are curved-matched to close resistance tolerances over large temperature spans. Discs are useful for medium power and time response applications. Rods and washers are used where high power dissipation is required. Discs, washers and rods operate at temperatures to +150°C. See Thermistor Engineering Package, below. Av. Shpg. wt. 2 oz.

THERMISTOR ENGINEERING PACKAGE



Includes a 5 x 8" resistance-temperature calculator and a thermistor manual that gives the specifications of over 500 thermistors. Serves as a step-by-step primer and handy guide. Shpg. wt. 4 oz.

ISO-CURVE GLASS COATED INTERCHANGEABLE THERMISTORS

Iso-Curve interchangeable glass coated thermistors are curved-matched to close resistance tolerance over large temperature spans. Resistance tolerance over temperature range, ±2 percent. See table, below, for specific temperature ranges. Bead style, .1 inch diameter with ⅜ inch leads. Miniprobe style, .12" x ⅛ inch with 1⅜ inch leads. Standard Probe style, .18" x ⅛ inch with 2-inch leads. Average shpg. wt., 3 oz.

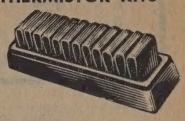
EXPERIMENTER'S THERMISTOR KITS



Model G-200 Contains 2 glass probes, 3 beads, 2 discs, 3 rods, 2 washers packed with specification sheets. Shpg. wt., 1 lb.
30F1804. NET..... **19.95**

Model G-700 Includes four glass beads and probes, manual, and computer for a variety of applications. Shpg. wt. 1 lb.
30F1805. NET..... **4.95**

Model G-701 Includes 10 glass beads and probes, manual, and computer for a wider range of applications than G-700.
30F1806. NET..... **9.95**

Model G-500 Uni-Curve Kit. Contains 6 standard RT curve-matched interchangeable thermistors (3K, 5K, 10K, 30K, 50K, 100K). Includes complete data sheets with full specifications and DC, TC listings. Shpg wt. 1 lb.
30F1807. NET..... **19.95**

EXPERIMENTER'S THERMISTOR PROBE

Thermistor mounted on card, with instructions and schematic for use as a remote temperature indicator, liquid level-control, or time-delay relay. Rated 135K at 25°C; 1 mW/°C diss. constant, 25 s; still-air time constant 0.3s in rapidly stirred water. Shpg. wt., 2 oz.
30F1848. NET..... **1.00**

THERMISTOR ASSEMBLIES

Matched assemblies for use in thermal conductivity gas analysis instruments. Each bead is mounted in a special hermetically-sealed stem. For maximum sensitivity, the higher resistance units should be used as higher ambient temperatures. 8 oz.

Type G126. Ro at 25°C, 2000 ohms ±25%; Ro at 0°C (approx.), 4900 ohms Ro at 50°C (approx.), 890 ohms; ratio of Ro 0°/50°C, 4.95-6.95; Ro at max. op. temp., 88 ohms; pair matched Ro at 25°C, 5%. Beta nom. at 25°C, 3000°K. Temp. coef. at 25° C, −3.4%/°C. TC, still air, 1s. DC, still air, 0.16 mW/°C; DC helium, 0.5 mW/°C. Pwr. rating, air, 15 mW; pwr. rating, helium, 60 mW.

Type G112. Ro at 25°C, 8000 ohms ±20%. Ro at 0°C (approx.), 23,200 ohms; Ro at 50°C (approx.), 3,200 ohms; ratio of Ro 0°/50°C, 6.56-7.99; Ro at max. op. temp., 25 ohms; pair matched Ro at 25°C, 2%. Beta nom. at 25°C, 3495°K. Temp. coef. at 25°C, −3.4%/°C. TC still air, 1 s. DC, still air, 0.16 mW/°C; DC helium, 0.5 mW/°C. Pwr. rating, air, 45 mW; pwr. rating, helium 140 mW.

Type G128. Ro at 25°C, 100,000 ohms ±20%; Ro at 0°C (approx.), 355,000 ohms; Ro at 50°C (approx.), 34,000 ohms; ratio of Ro 0°/50°C, 9.45-11.20; Ro at max. op. temp., 110 ohms; pair matched Ro at 25°C, 5%. Beta nom. at 25°C, 4115°K, Temp. coef. at 26°C, −4.6%/°C. TC, still air, 1 s. DC, still air, 0.16 mW/°C; DC, helium, 0.5 mW/°C. Pwr. rating, air, 45 mW; pwr. rating, helium, 140 mW.

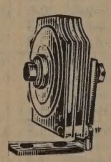
VARISTOR ASSEMBLIES



Protect circuits and components from inductive voltage surges. Assemblies have one or more Thyrite® washers bracket-mounted with spring lock washer for contact pressure. Washer insulated from central bolt and mounting brackets. Connections made to terminals shown. Bracket mounted assemblies available for stud mounting. Substitute "C" for "A" or "B" in type number. Varistors moisture protected with Silicone Inpregnation. AC voltage rating 90% of DC voltage rating. Continuous body temp. —110°C.

Yellow Springs Instruments Thermistors

PRECISION THERMISTORS

Thermistors which match a published resistance-temperature curve and thus each other to ±1% not only at 25°C but over most of their useable range of —80°C to +150°C. Each thermistor is provided with resistance-temperature data for each degree C and with tolerance curves both in resistance variation and temperature sensing interchangeability. Base resistance from 100 ohms to 1 Megohm at 25°C available to ease circuit design impedance matching problems. Useful as transducers for measurement and control circuits where precision of YSI thermistors allow interchanging of transducers and multiple monitoring from single circuits. In control circuitry direct dialing of set points is possible as is trigger action at a specific temperature since resistance at any usable temperature is known to close tolerances. Also useful as temperature compensating devices for transistors, meters, circuits, etc. Physical size: .095" maximum dimension #32 solid tinned copper leads, 3" long. Thermistors are epoxy encapsulated for ruggedness and long life. Each thermistor supplied with data and with dissipation information, time constant and instructions. Rated at 25°C.

- **Low Cost Precision Thermistors**
- **Matches Standard Curves—80°C to 150°C**

½% PRECISION THEMISTORS

Specifically designed to match published and provided curves to within ±½% over exceptionally wide range! Units can be interchanged in measuring circuitry with a maximum 0.1°C error. Resistance tolerance data provided with each thermistor for each degree centigrade and its corresponding resistance shown from —40° to +100°C. Physical size: .095" diameter. #32 solid tinned copper leads, 3" long. Thermistors are epoxy encapsulated for ruggedness and extremely long life. Individually packaged with dissipation information, time constant data, and instructions. Rated at 25°C.

- **Twice the Precision over Previous YSI Devices**
- **Interchangeablity—0.1°C**
- **-40° to +100°C**

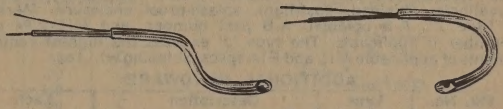
TEFLON PRECISION THERMISTOR PROBES

YSI interchangeable thermistors in chemically impervious form for sensing or control use. The interchangeable precision thermistors listed above, but additionally encased in a 2" length of chemically impervious Teflon. 3" leads extend 1" beyond the probe for convenience in attaching leads. Leads are insulated from each other by a smaller Teflon tube around one lead. Probes can be used straight or can be bent by finger pressure to exact configuration required for placing the thermistor where you want it. 0.11" max. in diameter. **Can be assorted for quantity prices.**



- **Precision—±1% at 25°C.**
- **Easily bent to required shape**
- **Chemically impervious Teflon casing**

THERMILINEAR® THERMISTOR DEVICES

Linear Output Thermistor Networks

A composite precision thermistor device which, in conjunction with the precision resistors supplied, provides linear voltage output or linear resistance, change with change of temperature. Sensitivities of 20 mv/°C. and more are common, 400 times the sensitivity of an IC thermocouple. Linearity deviation is as little as 2 parts in 1000 from 0 to 100°C. Combined absolute accuracy, linearity and interchangeability specifications of as little as 3 parts in 1000 from 0 to 100°C. Greater accuracies, interchangeabilities, and linearities available for shorter standard ranges. Parts guaranteed to stay within tolerances for three years. Useful for direct digital temperature indication with DVM or linear recorder. Provides linear temperature compensation with thermistor sensitivity. Time constant: 1 second, in well-stirred oil bath. Parts consist of composite thermistor and resistor assembly. Thermistor composites are manufactured to absolute accuracy tolerances of $7x0.15°C from —30 to +100°C. For complete information and technical data, write Newark. Type 44018 and type 44019; additional thermistor composites for replacement or multiple input work.

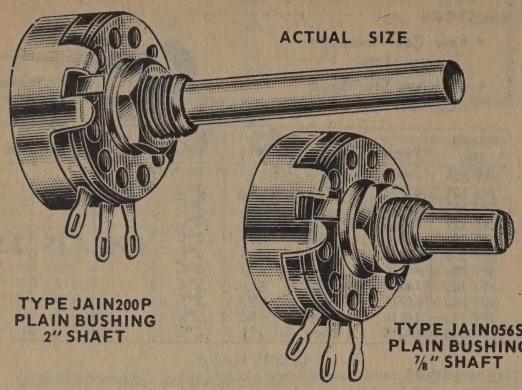
Allen-Bradley Potentiometers

TYPE J-STYLE RV4N VARIABLE POTENTIOMETERS



ACTUAL SIZE

TYPE JAIN200P
PLAIN BUSHING
2" SHAFT

TYPE JAIN056S
PLAIN BUSHING
⅞" SHAFT

Type 'J' carbon composition with potentiometers have a uniform smooth resistance track which means low noise levels and stepless linear or exponential tapers. Rated: 2¼ watt @ 70°C derated to zero @ 120°C with entire resistance element in circuit. —55°C to +120°C. 350 volts max. cont. voltage 50 Ohms to 5.0 Megohms. Less than 10% resistance change due to moisture. Infinite resolution. Less than 2% resistance change and less than 5% setting change with vibration or shock. Less than 10% change resistance change after 1000 hrs. at rated load. ⅞" slotted or 2" plain shafts. Total rotation 312° ±3° without switch with switch 333° ±3°. Effective rotation 312° ±3° in all cases. Torque 1 to 6 in. oz. single control. Locating lug provided to prevent movement. Available with SPST snap action switch which turns on at start of clockwise rotation. Switch UL rating 2 amps 125 V. RMS 60 Hz. Also 10 amps 10 volts dc non-inductive. Switch not available for dual controls. Plain bushing potentiometers are supplied with one mounting nut M-2786, and one lock washer M-2898. Additional hardware available. Shielded, dust-tight, splash-proof enclosure. Marking "Type J", A-B octagon, A-B part number, and MIL-R-94 part number if applicable. The type 'J' exceeds the highest requirements of applicable MIL and EIA specs. Shipping wt., 4 oz.

Type JAIL-hot molded composition potentiometer has a locking bushing. Linear taper, low noise, long life, infinite resolution. Enclosure is dust-tight and splash proof. After the locking nut has been tightened with a torque of 10 in. pounds the shaft will not turn with torques up to 40 in. ounces. Hardware included at no charge with order contains one mounting nut M-2786, one lock washer M-2898 and one lock nut B-13750. case size 5/8" x 1 5/32" dia. Shpg. wt., 4 oz. Additional hardware available.

Type JD dual controls are available in standard resistances from 50 ohms to .5 megohms with linear tapers. Maximum torque for dual controls is 9 in. oz.; minimum is 1 in. oz. Hardware included with order at no charge contains one mounting nut M-2786 and one lock washer M-2898. Additional hardware available. The panel resistor has the same resistance and taper as the rear resistor. The permissible power dissipation in one resistor element is a function of the power dissipation in the other resistor element. Maximum continuous power ratings in watts with both entire resistors in the circuit are shown below. case size: 1-17/74 x 1 5/32" dia. Shpg. wt., 4 oz.

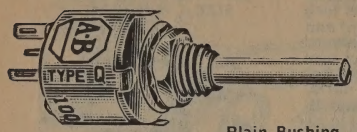
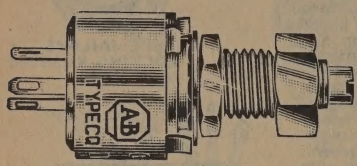
●NEW TYPE CQ & TYPE SP

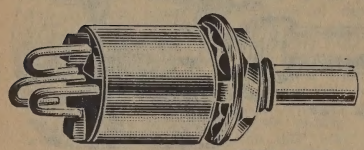


Plain Bushing

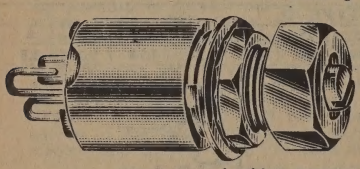


Shaft Lock Bushing

Type CQ, Cermet variable resistors are designed for use in severe environmental conditions in military and industrial equipment. Exceeds the highest requirements of applicable EIA and Mil. specifications. Rated ½ watt at 125°C derated to zero watts at 175°C. Temperature range -65°C to 175° with temp. coef. less than ±250 ppm/°C. Rotation 295°±5°. Dielectric withstanding voltage 750 volts RMS at sea level. Maximum continuous working voltage 350 volts RMS. Resistance 100 ohms to 5.0 megohms. Less than 3% permanent resistance change after 1000 hrs. load life. Less than 5% resistance change after 50,000 cycles on rotational life test. Less than 2% change in resistance on moisture resistance test. Less than 1% resistance change in low temperature operation test. Less than 2% total resistance change and less than 6% setting change dur to vibration and shock tests. Supplied with hardware.



Plain Bushing



Locking Bushing

Type SP, Single turn cermet potentiometers are rated 1 watt at 70°C derated to zero at 150°C. 50 ohms to 1.0 megohms. Linear taper ±10% tolerance ¼" plain bushing ⅜ in. shaft and ⅜" locking bushing, 7/16" shaft. 300 volts MCWV. Insulation res. 100 megohms min. Temperature Coefficient, less than ±250 PPM. Temp cycling less than 3% res. change. Less than 2% resistance change due to moisture test. Vibration or shock less than 2% total resistance change. Less than 3% res. change due to temp. cycling. Rotation 280° ±5° mech. and elc. turning torque ½ to 5 in. oz. Less than 5% total res. change after 1000 hrs. load life at 1 watt 70°C. Marking A-B octagon, "type SP", A-B part number with nominal resistance. Supplied with hardware and mounting lugs.

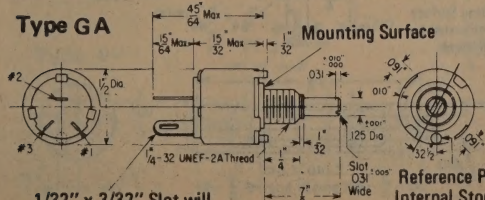
Type GA



1/32" x 3/32" Slot will accommodate 2 solid #20 or 3 solid #21 Wires

Type 'G' and type 'W' potentiometers are of the high quality hot molded carbon composition type. Type 'G' is approved under MIL-R-94 style RV6, while the type 'W' is similar in performance and characteristics to the 'G', but is a commercial grade. Both the 'G' and the 'W' have a temperature range of -55°C to +120°C, ½ watt rating at 70°C derated linearly to zero at 120°C, 350 v. maximum continuous working voltage, 100 ohms to 5 megohms. Less than 10% temporary change of resistance due to moisture test. Linear taper. Infinite resolution. Less than 2% total resistance change, less than 5% setting change with shock and vibration. Less than 10% change after 1000 hours load life. Total rotation 295° ±5°. Torque .5 to 3 in. oz. Plain bushing resistors are supplied with one mounting nut M-4721 and one lock washer M-4748. Resistors with shaft lock bushings also include one locknut M-4761. Additional hardware is available. These resistors have "O" ring seals between actuating shaft and bushing. They are water-tight at that point (0 to 30 ft. head of water, zero to 15 psi.) The resistors are immersion-proof. Marking is "Type G" or "Type W", A-B octagon, A-B part number with resistance for the 'W' or the A-B part number and MIL designation with resistance for the 'G'. Shipping wt., 4 oz.

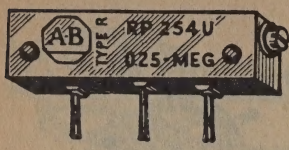
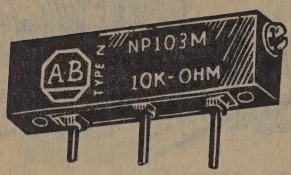
TYPE N, RP AND RS TRIMMERS



Type RP

Type RS



Type N

ACTUAL SIZE

- Designed for use on printed circuit boards
- Ideal for high frequency applications
- Hot molded composition material
- Temperature Range — 55°C +125°C
- Power—¼ watt at 70°C derated linearly to zero watt at 125°C
- Voltage—300 volts, maximum continuous working voltage (RMS or dc)
- Resistence—100 ohms to 2.5 mega ohms
- Essentially infinite resolution
- Either pin or lug type terminals, treated for easy soldering
- Reliable immersion proof performance
- Performance exceeds military and EIA spec.

Type 'R' hot molded carbon composition 25 turn variable resistors are intended primarily for trimmer applications and are MILR'' approved. Low inductance and small distributed capacitance make the type 'R' ideal for high frequency applications. —55°C to +125°C. ¼ watt at 70°C derated linearly to zero at 125°C. 300 volts max. continuous working voltage (rms or dc). 100 Ohms to 2.5 Megohms. Infinite resolution. Less than 10% temporary change due to moisture. Thermal shock less than 3% overall resistance change and less than 2% change in setting. Less than 10% overall resistance change or 2% setting change after 1000 hrs. at rated load. Less than 5% resistance change after 500 cycles (25,000 actuator turns). Torque .10 to 8 in. oz. Pin or lug terminals spaced on 0.1 in. grid system for printed circuit boards. Corrosion resistant non-magnetic materials. Sealed, molded, insulating enclosure with ''O'' ring equipped adjustment screw provides reliable immersion-proof performance. Can be encapsulated. Marking ''Type R'', A-B octagon, part number with resistance value. RJ11 also marked with MIL designation and circuit diagram if applicable.

Type 'N' trimmer is similar in performance to the type RP except that the ''N'' is commercial grade. Type 'N' characteristics are the same as the type 'R' except the 'N' is rated ⅓ watt at 50°C derated to 0 at 100°C.

TYPE ZV TYPE ZH TYPE SV TYPE SH

Cermet type Z and S trimmers have applications where severe environmental conditions exist. Temperature range -55 to 125°C. "Z" —65 to 150°C., "S". ½ watt at 70°C. derated to 0 at 150°C. "Z". ½ watt at 85°C. derated to 0 at 150°C. "S". Rotation 300° ± 15° "Z", 280° ± 10° "S". 50 ohms to 1.0 megohms, 300 volts maximum working volts. Less than 2% change due to moisture test. Temperature coefficient less than 250 PPM. Less than 2% change in resistance due to shock or vibration "Z", 1% "S". Less than 3% change after 1000 hours at rated load. End resistance less than 5 ohms "Z", 3 ohms "S". Torque-.5 to 6 in. oz. "S", .1 to 5 in oz. "Z". Pin terminals for mounting on .1 in. grid circuitboards. Type ZA is similar to Type zV except triangular pin spacing is same as a competitive trimmer. Marking "Type Z" or "Type S". A-B octagon, A-B part number with resistance value.

ACTUAL SIZE

Type 'F' hot molded carbon composition single turn trimmers. Designed for demanding rehostat or potentiometer in applications electronic equipment. Small size (½ in. diameter) and the fact that they can be encapsulated make them ideal for subminiature assemblies and PC applications. Terminals fit 0.1 printed wiring board standard layout. -55°C to +120°C. ¼ watt at 70°C derated linearly to 0 watts at 120°C. 350 volts max. continuous working voltage. 100 to 5.0 Megohms. Less than 10% temporary change due to moisture test. Linear taper. Infinite resolution. Less than 10% change after 1000 hours load. Total rotation 295 ± 5°. Torque 25 in. oz. min, 3 in. oz. max. Stops will withstand greater than 10 in. oz. shaft torque. Essential non-magnetic materials. Resistors have "O" ring seals between shaft and faceplate. These resistors are immersion-proof and can be encapsulated. Shipping wt. 4 oz.

Type 'Y' is a ¼ watt hot molded carbon composition single-turn adjustable resistor for trimmer applications. The low profile design fits into the commonly used ⅜ in. printed circuit board stacking. The performance is similar to MIL specification resistors -55°C to 100°C. ¼ watt at 70°C derated linearly to 0 watts at 100°C 350 volts max. continuous working voltage (rms or dc). 100 Ohms to 5.0 Megohms. Less than 10% temporary humidity change. Linear taper. Infinite resolution. Less than 10% permanent change in resistance after 1000 hrs. Total rotation 295% ±5°. Torque .25 in. oz. min. 3 in. oz. max. Stops withstand more than 10 in. oz. shaft torque. Corrosion resistant essentially non-magnetic materials. Dust-tight splash proof. Marking is "Type Y, A-B octagon, and A-B part number with resistance value." Shipping wt. 4 oz.

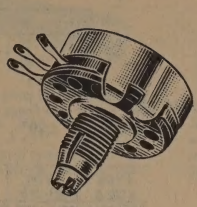
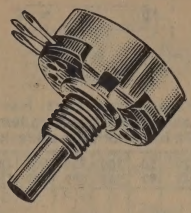
Cermet & Composition Potentiometers

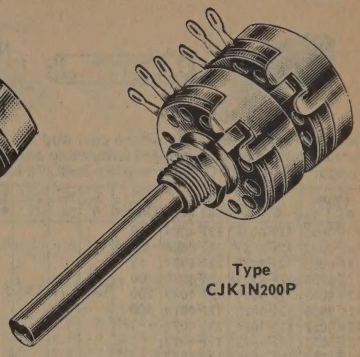
● NEW TYPE CJ



Type CJP1L040S



Type CJP1N056S



Type CJK1N200P

Type CJ cermet potentiometers are designed for severe environmental applications. The type CJ has a 5 watt rating at 85°C derated to zero at 150°C. Linear taper 10% tolerance. ½" locking bushing, ⅝" slotted shaft, ⅜" plain bushing with ⅞" slotted shaft. Temp. coef. ±250 ppm. -65°C to 150°C. Less than 3% resistance change due to temp. cycling. Less than 5% resistance change due to moisture per Mil-Std-202. Less than 5% permanent resistance change after 1000 hrs. Load life. Dimensions same as type J. Supplied with hardware.

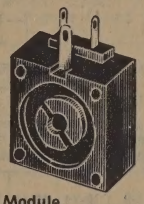
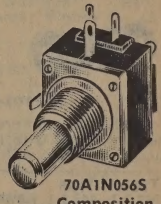
● NEW SERIES 70 MODULAR POTENTIOMETERS



Module



70A1N056S Composition

Series 70 Modular Potentiometer is a unique solution to many variable resistor problems. It possesses tremendous flexibility because of its modular construction. Additional resistance sections may be added simply by adding additional modules up to 4 total. The resistance track in each deck can be either hot molded carbon composition or cermet. Numerous shaft, bushing and switch combinations are available. Because of the tremendous variety afforded by the modular concept, space does not allow a full display of all variations possible. Contact your nearest Newark distributor to obtain information on the many variations not shown. Supplied with hardware. Module dimensions: ⅝"x⅝"x⅜" deep. ¼" dia. bushing standard.Performance hot molded carbon element - 1 watt @ 70°C derated to zero @125°C. 50 ohms to 10 Meg -55°C to 120°C. Less than 10% res. change with load life, moisture and resistance rotational life. Less than 2% change with shock and vibration. Less than 3% change with temperature cycling or low temp. exposure. Performance cermet element - less than 250 ppm temp. characteristic. 2 watts at 70°C derated to zero @ 150°C. 100 ohms to 5.0 Meg 55°C to 150°C. Less than 5% change with load life and moisture resistance. Less than 10% change with rotational life. Less than 2% change with shock, vibration, and low temp. exposure. Less than 3% change with temperature cycling.

WIRE WOUND RESIST. ELEMENTS FOR TEMP. STABILITY

MIL SPEC AND INDUSTRIAL TRIMMERS

FIG.-A

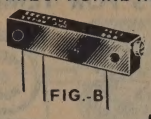

FIG.-B

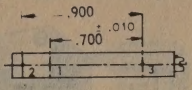

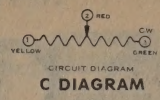

C DIAGRAM

MODEL 42

For circuits where temp. stability is important. Has tempco of 50PPM/1°C max. and operating temp. range of -65°C to 175°C. Constructed with terminal strengths of 2 lbs. min and meets MIL-R-27208 specification for shock, vibration and moisture resistance. Screw-driver adjustment is 22 turns ±5. Slider idles at end stops without damage. Fig. A, 12" Teflon wire leads. Fig. B, PC pins. Body mounting holes 0.093" diameter on 1" centers. Tol.: ±5%. 1 watt @70°C. Size 1.250x0.315x0.190". Wt: Fig. A, 4.5 Gm; Fig. B, 3.5 Gm.

MIL. SPEC. RT 11

Designed and built to requirements of MIL-R-27208. Temperature stability is 50 PPM/°C. Operating temperature range is -65°C to 175°C. Screw-driver adjustment is 22 turns ±5 for full electrical travel. Has clutch feature at end stops. Figure C, has 12" Teflon leads. Figure D, PC pins. Body mounting holes of 0.093" diameter on 1" centers. Resistance tolerance: ±5%. 1.0 watt@70°C. Size: 1.250"x0.315"x0.280". Weight: 4.5 Grams maximum.

WIREWOUND RES. ELEMENTS FOR TEMP. STABILITY

FIG. A

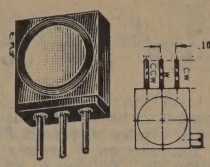

FIG. B

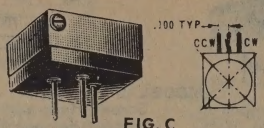

FIG. C

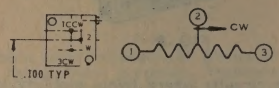

FIG. D

MODEL 50

Features an exceptional size/power factor for industrial service where space is limited. Can be integrated into almost any layout. See 4 mounting arrangements illustrated above. Screw adjustment of 23 turns ±2. Continuous rotation. Tempco is 50 PPM/°C. Figure A has 6" Teflon leads and 0.075" diameter mounting holes on 0.375" centers. Resistance tolerance ±5%. ¾ watt @ 85°C. Size: .375 x .375 x .190" Nominal. Weight: Figure A, 2.0 Grams; others, 1.5 Grams maximum.

MIL. SPEC. STYLE RT24, ¾ watt @ 85°C. Size: 0.375x0.375x0.235 NOMINAL

Has same general specifications as Model 50 above plus full compliance to RT24 requirements of MIL-R-27208. Screw adjustment is 25 turns nominal. Designed especially for prototype Military equipment or for field replacement. MIL designation is RT24C2P(RC). Refer to Figure D above for illustration and PC pin arrangement. Order by Newark Stock Number.

MODEL 55

Provides higher wattage in a package only 0.500" square for demanding industrial circuits. Temperature stable to 50 PPM/°C maximum. Screw adjusted with 23 turns ±3 of shaft. Has idler at stops to prevent damage. Operating temperature range of -65°C to 150°C. Figure A, has 6" Teflon leads and 0.093" diameter mounting holes on 0.520" centers. Circuit diagram above, except red, green and yellow leads from left to right. Resistance tolerance is ±5%° 1.5 watt @ 70°C. Size: 0.500x0.500x0.190 Nominal. Weight: 2.5 Grams maximum.

MODEL 132-,WIREWOUND, 2.75 WATTS @ 40°C. SIZE: 0.625x1.312 DIAMETER

Precision potentiometer for general purpose industrial use. Independent linearity: Up to 200 ohms, ±1%; above 200 ohms, ±0.5%. Has stops. Electrical rotation: 336° ±2°. Temperature range: -55°C to 105°C. Shaft length including bushing: 0.875" x 0.250" diameter. Bushing: 3/8 - 32 x 3/8". Tolerance: ±3%. Weight: 1.0 oz.

NEW MODEL 138. CONDUCTIVE PLASTIC. 2.0 WATTS @ 40°C. SIZE: .625x1.312 DIAMETER

Precision high resolution potentiometer. Independent linearity: ±0.5%. Has stops. Electrical rotation: 336° ±2°. Temperature range: -55°C to 125°C. Resistance range from 500 ohms to 100K ohms. Power rating of 2 watts at 40°C. Tempco: ±500 PPM. /°C

Rotational life: 2,000,000 shaft revolutions. Shaft length including bushing: 0.875" x 0.250" diameter. Bushing: 3/8 - 32 x 3/8". Tolerance: ±10%. Weight: 1.0 oz. maximum.

THREE TURN MODEL

MODEL 830 WIREWOUND 30 WATTS @ 40°C. SIZE: 1.220x1.812 DIAMETER

Extra rugged design for machine controls and industrial test instruments. Independent linearity: ±0.25%. Has stops. Electrical rotation: 1080° +4° to -0° Temperature range: -55°C to 105°C. Shaft length including bushing: 0.812" x 0.2497" diameter. Bushing: 3/8 - 32x1/4". Tolerance: ±3%. Weight: 3.0 oz. maximum.

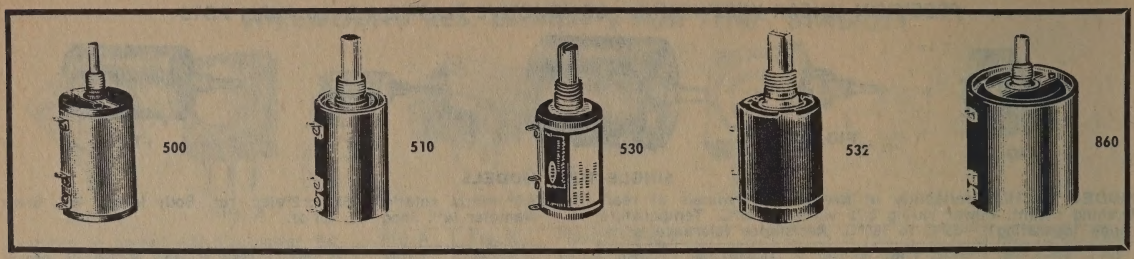
Spectrol Precision Pots



TEN TURN MODELS

MODEL 500

Proven design throughout. Independent linearity: ±0.25%. Has stops. Electrical Rotation: 3600° +10° to -0°. Temperature Range: -55°C to 125°C. Shaft length including bushing: 0.687" x 0.1248" diameter. Bushing ¼ - 32 x 5/16". Tolerance: ±3%. 3.0 watts @ 40°C. Size: 1.448" x 0.875" diameter. Weight: 1.1 oz. maximum.

HIGH RELIABILITY TRIMPOT® WIREWOUND MODEL 3250-501 (RT22)

Incorporates the inherent reliability, performance and configuration of the field-proven Model 3250. Power Rating: 0.5 watt at 70°C. Absolute Minimum Resistance: 0.1% or 1.0 ohm, whichever is greater. Maximum Operating Temperature: 150°C. Tolerance: ±5%. Size: ½" sq. x 1/16" thk. (**L**); 7/32" thk. (**P** or **W**).

½" SQUARE CERMET MODEL 3252 (RJ22)

Meets or exceeds requirements of MIL-R-22097, Style R-122, Char. C. Temperature Coefficient: ±100 ppm/°C maximum over entire temperature and resistance range. Power Rating: 1.0 watt or 400 volts maximum at 70°C. Absolute Minimum Resistance: 1 ohm, all resistances. Mechanical Adjustment: 22 turns nominal. Operating Temperature Range: −65°C to +150°C. Size: ½" sq. x 3/16" h. (**L**): 7/32" h. (**P, W** and **X**).

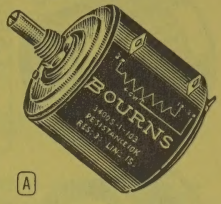
TRIMPOT® Potentiometers

BUSHING MOUNT PRECISION POTENTIOMETERS

Lockwasher and mounting nut supplied. Standard resistance range given; special resistances are available.
Resistance code: First 2 digits indicate significant numbers, 3d digit indicates number of zeros, e.g.: 103 = 10000 ohms.

10-TURN 1 13/16" DIAMETER MODEL 3400 (Fig. A)



A

High temperature, moisture resistant, thermosetting plastic housing. Exceeds humidity cycling requirements of MIL-R-12934. Shaft supported front and rear by sleeve bearings. Power rating: 5.0 watts at 40°C. Absolute minimum resistance: 1.0 ohms or 0.15%, whichever is greater. Independent linearity: ±0.15% maximum. Maximum operating temperature: 105°C. Resistance tolerance: ±3%. Size: 1 1/16" dia. x 1 3/4" lgth.

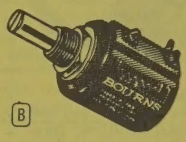
10-TURN 7/8" DIAMETER WIRE-WOUND MODEL 3500 (Fig. B)



B

High temperature, thermosetting plastic housing. Shaft sealed with "O" ring. Special rotor and slider block design assures excellent wiper stability. Humidity exceeds requirements set in MIL-STD-202, Method 103. Power rating: 2.0 watts at 70°C. Absolute minimum resistance: 1.0 ohm or 0.1%, whichever is greater. Independent linearity: ±0.20%. Operating temperature: 125°C maximum. Resistance tolerance: ±3%. Size: 7/8" dia. x 1" lgth.

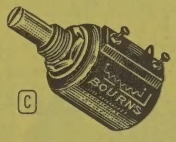
10-TURN 7/8" DIAMETER CONDUCTIVE PLASTIC MODEL 3501 (Fig. C)



C

Infinitron® conductive plastic element provides essentially infinite resolution. Exceeds moisture resistance requirements of MIL-R-39023. Exclusive termination assures low end resistance and definite effective electrical angle. Power Rating: 2.0 watts at 70°C (325 volts maximum). Independent Linearity: ±0.5% maximum. Maximum Operating Temperature: 105°C. Resistance Tolerance: ±10%. Size: 7/8" dia. x 1" lgth.

5-TURN 7/8" DIAMETER WIRE-WOUND MODEL 3520 (Fig. E)

E

Exceeds humidity cycling requirements of MIL-R-12934. High temperature, moisture resistant, thermosetting plastic housing: special rotor and slider design. Contact pressure control of 100% assures low noise and long rotational life. Power Rating: 1.5 watts at 70°C. Absolute Minimum Resistance: 1.0 ohm or 0.1%, whichever is greater. Independent Linearity: ±0.3% maximum. Operating Temperature Maximum: 125°C. Resistance Tolerance: ±3%. Size: 7/8" dia. x 1 1/16" lgth.

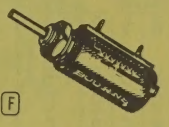
10-TURN 1/2" DIAMETER MODEL 3700 (Fig. F)



F

Contact pressure control of 100% assures low noise and long rotational life. Exceeds MIL-R-12934 humidity cycling requirements. High temperature, moisture resistant, thermosetting plastic housing. Power Rating: 1.0 watt at 70°C. Absolute Minimum Resistance: 1.0 ohm or 0.1%, whichever is greater. Independent Linearity: ±0.5% maximum. Operating Temperature Maximum: 125°C. Resistance Tolerance: ±5%. Size: 1/2" dia. x 1" lgth.

10-TURN INDUSTRIAL 1/2" DIAMETER MODEL 3707 (Fig. F)

Silverweld® termination eliminates vulnerable single wire termination. Special rotor design assures excellent wiper stability. Power Rating: 1.0 watt at 40°C. Independent Linearity: ±1.0%. Maximum Operating Temperature: 105°C. Resistance Tolerance: ±5%. Size: 1/2" dia. x 1" lgth.

12F9773	3707S-1	100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K	18.98	17.25	16.39	15.53	14.67	13.80

KNOBPOT® BUSHING MOUNT PRECISION POTENTIOMETERS

Knob, readout dial and potentiometer in one package requires less front panel space than most dials alone: requires no back panel space. Self-locking feature provides excellent stability during vibration and shock; 100% contact pressure control insures high mechanical life. Sealed to pass MIL-STD-202, Method 103, humidity. Lockwasher and mounting nut included.

10-TURN 3/4" DIAMETER KNOBPOT® MODEL 3600 (Fig. G)

G

Phasing of dial readout to potentiometer performed at factory with accuracy of ±0.5% (including linearity). Power Rating: 1.5 watts at 25°C. Absolute Minimum Resistance: 1.0 ohm or 0.1%, whichever is greater. Maximum Operating Temperature: 85°C. Resistance Tolerance: ±5%. Size: 3/4" dia. x 1" lgth.

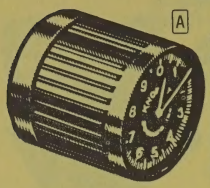
KNOBPOT® BUSHING MOUNT PRECISION POTENTIOMETERS (Cont'd)



10-TURN 1¼" DIAMETER KNOBPOT® SENIOR MODEL 3640

Clock face readout provides excellent readability and setting accuracy. Phasing adjusted to ±0.1%. Repeatability to ±.05% voltage ratio. Power rating: 2.5 watts at 25°C. Abs. min. res.: 1.0 ohm or 0.1%, whichever is greater. Max. oper. temp.: 85°C. Tolerance: ±3%. Extends 9/16" behind panel. 1¼" diameter, 1½" out from panel. Requires two holes in panel: 0.413" and .0785".

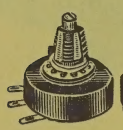
NEW CERMET PANEL CONTROLS

CERMET ELEMENT PANEL MOUNTED POTENTIOMETERS



Model 3852E

Mdoel 3859E

Single turn potentiometers for panel mount have improved setability and low noise for outstanding performance. Thin ¾" diameter case has extremely high power rating: 2 watts at +70°C. Resistance tolerance: ±10%; ±5% available. Tapers: Linear, 10% CW or 10% CCW. Contact resistance variation: ±3% maximum of total resistance. Temperature coefficient: ±150 ppm/°C. High Performance Models meet or exceed applicable requirements of MIL-R-94 or MIL-R-23285. **High Performance Model 3852:** Housing ¾" dia. x ¼" length. Resistance range: 50 ohms to 5 megs, linear taper; 1K to 2.5 megs, CW and CCW taper. Power rating: 2 watts at 70°C, linear; 1 watt, CW and CCW taper. Operating temperature: −65° to +150°C. **Commercial Model 3859:** Same as model 3852 except operating temperature range −65° to +125°C. **High Performance Model 3862:** Housing ½" dia. by 0.453" length. Resistance range: 100 ohms to 5 megs, linear taper; 500 ohms to 2.5 megs, CW and CCW tapers. Power rating: 1 watt at 125°C, linear taper; 0.5 watt, CW and CCW taper. Operating temperature range: −65°C to +175°C. **All models** supplied with hardware; other shaft lengths available. Types with locking bushings supplied with locking nut. **Specify:** Plain round, screwdriver slot, round with flat shaft; solder lugs or PC terminals; resistance; and linear, CW, or CCW taper.

3862	E	½"	⅝"	20		

[1] The shaft length numbering code is based on 1/32" increments; thus, a 1" long shaft FMS is ordered by code "32".

[2] This standard is also the minimum shaft length available for this model. Shaft-lengths other than those listed above are available at no extra charge in ⅛" increments from the minimum in table above to 1½" FMS on all models except 3852A and 3859A which can be obtained with shafts 2" FMS at no extra charge. There is an extra charge for all other shaft lengths.

2—XXX-A

Linear Taper, ±10% resistance tolerance. Other tapers available.

Screwdriver Slot. Other ends available

Rotary Switches & Turns Counting Dials

Spectrol

MODEL 84 WIREWOUND

84-3-8

84-3-10

84-5-6

Higher power miniature trimmers for Military and industrial circuits. Designed to meet applicable portions of MIL-R-27208. Tempco of 50 PPM/°C maximum. Choice of 3 packages above.

Effective adjustment 300° nominal. Temperature range: -65 to 175°C. Tolerance: ±5% 1.0 watt @ 70°C. Weight: 1.7 Grams maximum.

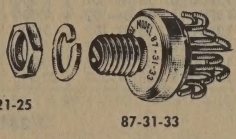
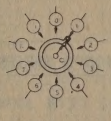
MODEL 87 MINIATURE ROTARY SWITCHES

87-11-10

87-21-25



87-31-33



Miniature rotary tap switches suitable for many dry circuits as well as loads up to ¼ ampere at 28VDC. Positive detent action and proven rotational life of 4000 operations per position. Has stops. Dielectric strength: 1000 VAC at sea level. Capacitance: pin to pin or, pin to case, 2PF maximum. Sealed. Suitable for automatic soldering. Bushing mount has 12-28 threads, 0.275 long. Weight: 3.0 Grams maximum.

WIREWOUND TRIMMERS

Commercial 1-watt trimmers have 100% usable range and output linear with shaft adjustment. Minimum load life: 1000 hours. Minimum mechanical rotation life: 200 cycles.

3800 and 3810 series, ¾" long with 20-turn ratio for full resistance range. Tol., ±10%; temp., −65 to 125°C. P series with 0.1" pin spacing. K series, 0.2" spacing. P-2 series, 0.1" spacing with "Vista-Trim". 3810 series with silicon "0" ring to seal out dust and humidity.

992 series, 1¼" long with 22-turn ratio for full resistance range. Tol., ±10% to 100 ohms; ±5%, 100 ohms and up. Temp., −55 to 125°C. P series, 0.1" spacing. SL series, with solder lug. L series, color-coded wire leads.

3600 and 3610 series, ⅜" square with 23-turn ratio for full resistance range. Tol., ±10%; temp., −65 to 125°C. 3610 series with "0" ring to seal out dust and humidity. Meets MIL-STD-202 specifications.

WIREWOUND TRIMMERS (CONT'D)

2850 series meets requirements of MIL-R-27208, Style RT11. 1¼" long with 22-turn ratio for full resistance range. Tol., ±5%; temp., −65 to 175°C. Silicon "O" ring. P series with 0.1" spacing. L series with color-coded wire leads.

2750P series meets requirements of MIL-R-27208, Style RT12. 1¼" long with 22-turn ratio for full resistance range. Tol., ±5%; temp., −65 to 175°C. With 0.1" pin spacing.

CERMET TRIMMERS

For commercial and military use. Feature ½-watt minimum ratings and wide resistance range with values up to 5 megohms. For applications where infinite resolution is required. Total resistance and voltage settings remain relatively constant during temperature extremes. Less susceptible to failure when exposed to power or temperatures above specificatiohs. All trimmers have ±10% resistance tolerance, low TC of 150 ppm/°C, and temperature range from −55 to 150°C except 3805 and 3815 series which have range from −55 to 125°C. P types have 0.1" printed circuit pin spacing; K types have 0.2" pin spacing.

3805 and 3815 series, ¾" long, have 22-turn ratio for full resistance range. 3815 has silicon "0" ring.

2855 series, 1¼" long, meets MIL-R-22097, Style RJ11. Has 22-turn ratio for full resistance range.

2305 series, ⅜" square, meets MIL-R-22097, Style RJ24. Has 26-turn ratio for full resistance range.

2905 series, ½" square, meets MIL-R-22097, Style RJ22. Has 25-turn ratio for full resistance range.

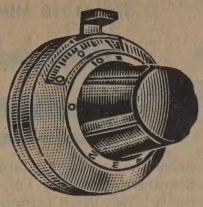
Newark—For All Your Electronic Needs

Amphenol Precision Dials

MODEL 1370 COUNTING DIAL

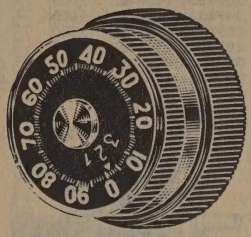


- 1000:1 INDEXING ACCURACY
- ZERO BACKLASH
- FINGERTIP DISK BRAKE
- EASILY READABLE TO 3 FEET
- EXTRA SENSITIVE ACTION

Concentric 10-turn dial ⅞" dia. Large outer vernier dial for max adjust, readout accuracy. Dial mounts directly to shaft. index accuracy 1000:1. Accepts ¼" dia. shaft; up to .177" panel thickness. Aluminum cover, polystyrol control knob, zinc dial. Rotation: continuous CW or CCW.

Stk. No.	Type	1-9	10-24	25-49	50-99	100-249
12F880	1370	6.50	6.17	5.85	5.53	5.20

MODEL 3041 1" MICRODIAL®

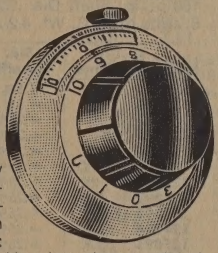


- 3-FOOT READABILITY
- NON-REFLECTIVE LENS
- EPICYCLIC GEAR MOVEMENT
- FREE OF BACKLASH
- FINGERTIP GRIP AND BRAKE
- 1000:1 INDEXING ACCURACY

Ideal for use with series 205 and 1111B Micropots; also for all other potentiometers having ten turn adjustment and ¼" diameter shaft. White numerals on black scale. Smooth, silent gear action. Dimensions: 1 5/32 x 15/16" diameter. Continuous CW or CCW.

Stock No.	Type	Description	1-9	10-24	25-49	50-99	100-249
12F875	3041-2	Black Brake Knob	9.18	8.71	8.24	7.82	7.35
12F877	3041-5	Light-Gray Br. Knob	9.18	8.71	8.24	7.82	7.35

MODEL 1350 COUNTING DIAL



- 6-FOOT READABILITY OF OUTER VERNIER DIAL
- SHAFT MOUNTED DIAL ELIMINATES BACKLASH
- FINGER-TIP BRAKE DOES NOT DISTURB SETTING

Counting dial features 2 concentrically mounted dials: larger counts shaft reverse in 100 equal increments; inner—full reverse. Smooth equicyclic motion eliminates error. Indexing accuracy: 1000:1. 1 13/16" dia. Ten turns. Shaft dia.: ¼". Housing: clear anodized aluminum. Shpg. wt. 4.4 oz.

Stk. No.	Type	1-9	10-24	25-49	50-99	100-249
12F878	1350	5.75	5.46	5.18	4.89	4.60

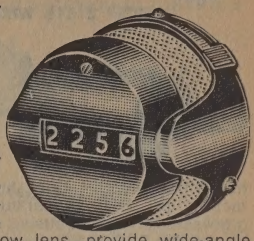
MODEL 3141 AND 3141-2 DIALS

- FAST, DIRECT READINGS UP TO 6 FEET
- BRAKE AND CONTROL KNOB ELIMINATES BACKLASH
- 1000:1 INDEXING ACCURACY

Ultra modern design hides ⅔ of bulk behind mounting panel. Projects only 25/32" from front. Dial assembly mounts directly to standard ¼" shaft. Maximum operation speed: 6000 counts per minute (60 RPM). Operating temperature: −54°C to −71°C. Housing and back cover: die-cast zinc. Cover and control knob: anodized aluminum. Clear lens. Solder lug terminals available on type 3141-2 only. Rotation: continuous CW or CCW. **Special readouts and gear ratios are available on special order.**

Stk. No.	Type	Illumination	1-9	10-24	25-49	50-99	100-249
12F879	3141	None	12.60	11.97	11.34	10.71	10.08
12F6036	3141-2	White light	14.35	13.62	12.94	12.16	11.48

MODEL 1309 3-DIGIT READOUT

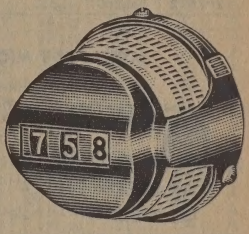


- WIDE-ANGLE VIEWING
- READABLE TO 8 FEET
- POSITIVE-ACTION BRAKE
- ZERO BACKLASH
- ACCURACY 1000:1
- UP TO 6000 COUNTS PER MIN.

Precision design features finger-tip positive action brake and zero backlash. Large, easy-to-read, contrasting numerals, with convex window lens, provide wide-angle viewing plus readability up to 8 feet. Standard gear ratio of 10 to 1 provides continuous ten turn readout of 000 through 999 to initial zero readings. It therefore provides 1000 counts in 10 turns of the control knob. Rotation is continuous clockwise or counter-clockwise. Maximum operating speed: 6000 counts per minute (60 RPM). Rubber seal protects critical assembly from dust and moisture. Control knob is mounted directly to shaft. Housing and mounting plate are die cast zinc. Black enamel housing. Dimensions: 1.816" diameter by 1.660" deep. **A wide variety of special styles, finishes, colors, readouts, gear ratios, markings, shaft diameters, and environmental dials are available on special order.**

Stock No.	Type	1-9	10-24	25-49	50-99	100-249
12F831	1309	16.38	15.54	14.75	13.91	13.12

MODEL 1314 4-DIGIT READOUT



- ACCURACY 10,000:1
- 8-FOOT READABILITY
- ZERO BACK-LASH
- 6000 COUNTS PER MIN.
- FINGER-TIP BRAKE
- DUST, MOISTURE SEAL

Precision counting dial specially designed for industrial use. Over-center finger-tip brake assures positive braking under the most demanding conditions. Superior accuracy permits use in critical applications. Method of count: inline digital readout (4 digital display) 0000 to 9999 in one hundred turns of control knob; one turn of control knob displays readout of 100 in increments of tenths. Rotation is continuous clockwise or counter-clockwise. Numerical size: 3/16" high. Control dial is mounted directly to shaft and permits no backlash in adjustment. Has rubber seal to protect from dust and moisture. Maximum operation speed: 6000 counts per minute (60 RPM). Operating temperature range: −54°C to +71°C. Material specifications: zinc diecast housing and mounting plate. Housing is finished in black enamel. Dimensions: 2 1/16" diameter by 1.660" deep. **Special styles, finishes, colors, readouts, gear ratios, markings shaft diameters and environmental dials are available on special order.**

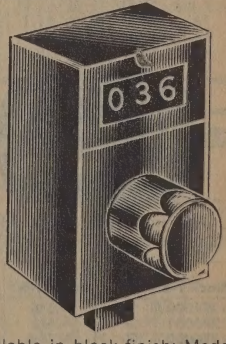
1381, 1385 COUNTING DIALS



- HIGH INDEXING ACCURACY OF 1000:1
- FINGERTIP BRAKE HOLDS CRITICAL SETTING
- ULTRA-MODERN STYLING
- ZINC DIE-CAST HOUSING

New miniature precision digital dial features special design at exceptionally low cost. Offers ultra-modern styling to compliment any panel layout. Ideal for precision potentiometers up to 10 turns. Accepts shafts ¼" in diameter. Finger-tip brake assures maintenance of critical dial setting without backlash. Model 1381 is available in black finish; Model 1385 in black-grey hammer. Size: 1 7/32" x 1 13/16". ⅛" shaft diameter available on special order.

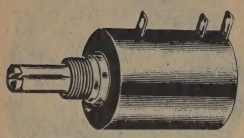
NOW AVAILABLE AT NEWARK—MOST COMPLETE LINE OF AMPHENOL POTS AND DIALS!

Amphenol Trimmers and Potentiometers

SERIES 2151B WIREWOUND POTENTIOMETERS



Type 2151B. For industrial-commercial use. Space-saving ⅞" diameter miniature size. Wire-wound. Thermosetting plastic rotor does not change shape or size, over two million revolution life guaranteed. Exclusive zero-backlash carrier allows resetting circuit voltage output from either direction. Dual slip ring commutator. Metal wiper contact "hugs". High temperature thermosetting. Molded element grooves in phenolic housing assures high linear accuracy. Case meets MIL-R-12934 steady-state humidity requirements. Temp. range: −65°C to +85°C. Weight 1 oz.

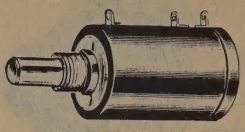
SERIES 4101B MINIATURE 10-TURN POTENTIOMETER



Type 4101B. Capable of dissapating 2 watts at 40°C for 1,000 hrs., and has a mechanical life of over 200,000 revolutions. Wiper and contacts are made of a precious metal to prevent corrosion and noise, but is amazingly inexpensive. Exclusive wiper drive mechanism guarantees zero backlash for precise settings. Standard Linearity Tol. is .25%. Standard Res. is ±5%. Size: ⅞" dia. x 1 3/16". Wt. 1 ounce maximum.

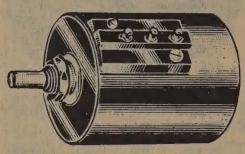
2201B PRECISION 10-TURN LINEAR MICROPOTS



Model 2201B. A high resolution ten-turn precision potentiometer for use in commerical instrument applications. Up to five times greater rotational life than other 10-turn potentiometers. Available with special resistances, linearities, rear shaft extensions, gangs, flatted or slotted shafts. Absolute wiper to element concentricity assures high linear accuracy. Anti-backlash nylon carrier gives precise repeat settings. Reset from either direction. Specifications include Mechanical Rotation: 3600 +4° −0°. Temperature Range: −55°C to +105°C. Torque: 2 oz/in running 3 oz/in starting. Stop strength: 160 oz/in. Shaft Dia: .250". Front shaft ext. ⅜" Power dissipation: 5 watts at 40°C. Wt. 4.2 oz.

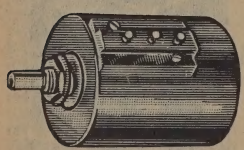
ECONOMY TEN TURN POTENTIOMETERS



Type 4401B precision wirewound potentiometer. High quality 10 turn 2 inch diameter of industrial-commercial grade. Meets environmental specs per Mil-R-12934. Power 5 watts at 40°C derated to zero at 105°C. Resistance range 25 ohms through 100K with ±5% tolerance. Linearity ±.25% Ind. Body length 2.125 inches. 13/16 inch long shaft, 5/16 in. long bushing. .250 shaft diameter.

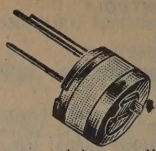
SERIES S371-5 TRIMMING POTS



Construction consists of a hot molded carbon element carbon contact brush, pressure spring and cover. Have standoffs to insulate metal cover from printed circuit board and a screwdriver adjustment slot. Power rating: 3/8 watt @ 70°C derated linearly to zero watts @ 120°C. Working voltage: 350 VAC. Resistance range: 100 ohms to 1 megohm. Resistance tolerance: ±20%. Tapers: linear and audio. Mechanical and electrical rotation: 290° ±5°. Dielectric strength: variable arm hot to case. Case to mounting plane—750 volts R.M.S. @ atmospheric pressure. Torque: operating: 7.0 ounce inches maximum. Stop: 20 ounce-inches. Approximate weight: 2 ounces.

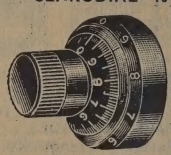
"CLARODIAL" 10 TURN SCALE DIALS



Calibrated dials designed for multiturn potentiometers up to 10 turns. Requires 1 inch of panel space. The knob attaches directly to the shaft and the body of the dial is mounted rigidly to the panel. Ratio of 1000 to 1 for 10 turns provided with zero backlash with reading error 1/4" shaft.

*With Lock

SUBMINIATURE MINITROLS

Only $^{1}/_{2}$" diameter. Rated ¼ watt linear, watt audio. ½"-32x¼" bushing with nut. Shaft: $^{1}/_{8}$" diameter x $^{17}/_{16}$" FMS, MLC (steel); MLCN (nylon). (*) Indicates an SPST switch rated 2 amperes at 125VAC, UL approved. Printed ckt, MTC has open screwdriver slot. Standard linear taper.

Taper No. 1: Logarithmic used in audio circuits where percent of change is small at start of rotation.

Taper No. 2: Reverse logarithmic used where percent of change must be large at start of rotation.

Taper No. 4: Linear taper where percentage of resistance change is directly proportional to rotational change on a straight line.

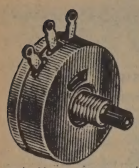
MALLORY Potentiometers and Controls

WIREWOUND MG CONTROLS 12½ WATT



MG controls have a continuous DC rating at 12.5 watts at 35°C (ambient). Volume is 1.1 cu. in. and outside control diameter is only slightly larger than standard knob rotation arc at $1^{5}/_{8}$''. Mechanical rotation: 294°; electrical rotation: 275°; peak audio rating at 50 watts. Voltage breakdown at 900V RMS. Contact arm insulated.

M AND MT WIRE WOUND POTENTIOMETERS

Used on bias control and voltage dividers; also for replacement of positioning, hold focus and other controls of TV sets. *MT are center tapped. Compact high wattage controls rated 4 watts. Arm insulated from shaft. 275° rotation. $1^{5}/_{8}$'' dia. x $^{9}/_{16}$''W. ¼'' shaft, slotted $^{3}/_{64}$x$^{1}/_{16}$'' deep, extended ⅜'' from bush. Mount in ⅜'' hole. 4 oz.

WIRE WOUND POWER RHEOSTATS

ALL RHEOSTATS SUPPLIED LESS KNOBS SEE NEXT PAGE FOR KNOB LISTING

7½ WATT MINIATURE RHEOSTATS

Model C. Compact power rheostats for limited space applications. For high temperature applications; operates at maximum hot spot temperature of 340°C. Rugged ceramic and metal construction. Only .515 diameter ⅞" behind panel. Mounts with ¼-32 bushing, ⅛" dia. shaft, ⅝" long. Less knob. wt. 2¼ oz.

12½ WATT MINIATURE RHEOSTATS

Model E. 12½-Watt Miniature Rheostat. (Rating on metal panel.) Smaller than many 1- or 2-watt potentiometers. Rugged, all-ceramic and metal construction. Use where 12g watts dissipation is needed but space is limited. Operation at a maximum hot spot temperature rise of 300°C at an ambient of 40°C, but also useful for operating at high military ambients, derated linearly to zero at 340°C. Specifications: Overall diam: ⅞". Shaft diam: ⅛". Resistance range: Up to 5000 ohms with vitreous enamel; higher values available with Ohmicone silcone-ceramic coating. Resistance tol: ±10%. Standard Mounting: for panels up to ⅛", ¼-32 threaded. Bushing. With non-turn washer. Rotation: 300 ±5%. Shpg. wt., 1½ oz. (†) Silicone-ceramic coating.

MODEL H—25 WATT

All ceramic vitreous enameled construction. Wire wound over ceramic core. Shunt pigtail carries current to slip-ring. High strength ceramic hub insulates the shaft and bushing. Tempered steel contact arm. Models H, J, K, L, N, when made without additional features are listed by UL and are marked Series A except (†) Silicone Ceramic Coating are not UL listed. Aver. shpg. wt.: Models H, J, K: 8 oz.—Models L, N: 3 lbs.—Model R: 4 lbs. Mounts on panels up to ¼" by ⅜"—32 Bushing with No. 5050 Non-turn washer. Shaft Dia. ¼". 300° rotation. Dia. 1⅝".

Capacitor Guide

The capacitor reference data presented on these two pages should be taken into consideration in the application, use and specification of all capacitors whether for military, industrial, design prototypes or for experimental requirements. Wide application ranges can be met 98% of the time with the use of tolerance overlap, preferred number rating series, and sizes.

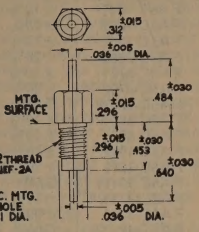
Allen Bradley Capacitors & Filters

MULTILAYER FEED THRU CAPACITORS AND FILTERS



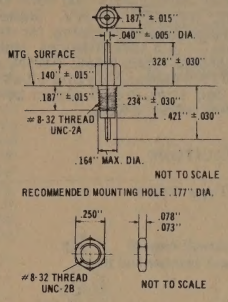
BE FILTER

The type BE001DA104P RFI/EMI filter also incorporates the CL multilayer ceramic capacitors. The type BE filter provides more than 65 dB insertion loss at 10 MHz and 90 dB at 25 MHz. Operating temperature range is −55°C to +125°C. Working voltage is 100 VDC with 10 amps feed thru current rating.

Type	Insertion Loss*		
	1 MHz	10 MHz	25 MHz to 10 GHz
BE001DA104P	18	65	75

*Minimum insertion loss in dB per MIL-STD-220, 25°C, 0 VDC.

Supplied with mounting nut and lock washer.



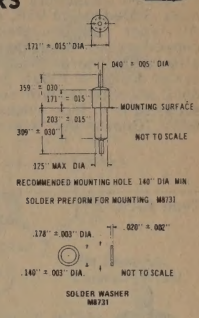
MT CAPACITOR

Allen-Bradley's type CL ceramic multilayer capacitors available in bolt and eyelet configurations as types MT and MS. Capacitance value is 50,000 pF minimum. Voltage rating is 100 VDC from −55°C to +125°C. Feed-thru current 10 A. Typical insertion loss is 20 dB at 1 MHz and 70 dB at 1000 MHz.

Type	Insertion Loss* (Min. dB)			
	1 MHz	10 MHz	100 MHz	500 to 1000 MHz
MS001DA503P	16	34	42	55
MT001DA503P	16	34	42	55

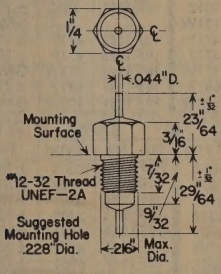
*Per MIL-STD-220, 25°C, 0 VDC.

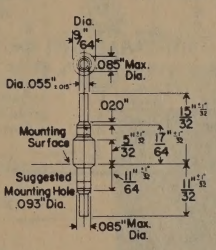
MS supplied with solder washer.
MT supplied with mounting nut and lock washer.

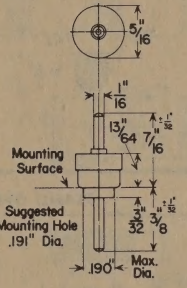


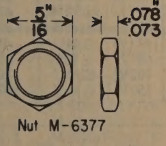
MS CAPACITOR

HIGH FREQUENCY LOW PASS FEED-THROUGH FILTERS

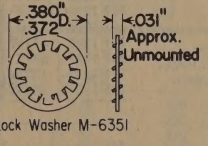




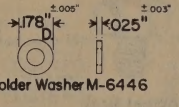




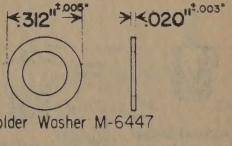
Nut M-6377



Lock Washer M-6351



Solder Washer M-6446



Solder Washer M-6447

★Attenuation: Minimum values from 100 MHz to 10 GHz when measured with a 50 ohm SL series input resistor (except none for FCS-C) and at 0 volts DC and 0 amps. DC. All Types: RF current 0.25 amps maximum; feed-thru terminal resistance 0.01 maxmium.

Size: **SMFO** .8125" L. x .141 Dia., **SMFB** .8125" L. x .250 Hex. (12-32 thread), **FCS-C** .8125" L. x .3125 Dia. Types **SMFO-1, SMFO-2,** and **FCS-C** supplied with solder washer. Types **SMFB-A1, SMFB-2,** and **SMFB-A4** supplied with mtg. nut and lock washer.

- **Off the shelf service**
- **Latest in Industrial Electronics**
- **Quantity prices competitive with the manufacturer**

Allen Bradley Capacitors

Feed-thru capacitors offer parallel resonant free performance below 1000 MHz. Rated to 500 VDC at 85°C, except the uninsulated FW5N (300 volts DC). All types can be rated to 125°C at 50% of the 85°C DCWV. Stand-off capacitors are dependent upon external wiring and lead dressing for their attenuation characteristics. Meet or exceed MIL-C-11015 specifications. Hollow eyelet design of FW5N provides direct lead filtering. Types FA5C, FW5N, and SS5D are supplied with solder washer. Types FB3B, FB2B, SB3A, and SB4A are supplied with lock washer and mounting nut. Bolt sizes are as shown below. GMV (Guaranteed Minimum Value) tolerance is —0%, +100%.

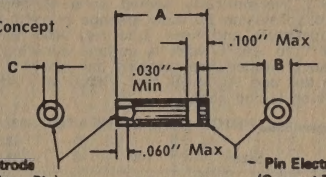
Allen Bradley Capacitors

• New Type CL Capacitors

Feed-thru capacitors reflect total capability in ceramic processing. The manufacture of these capacitors is completely controlled from the selection of raw materials to an advanced properietary processing technique. This advanced process produces these unique multi-layer, coaxial tubular capacitors which consist of concentric layers of a proprietary ceramic formulation and concentric layers of noble metal electrodes (see drawing). The concentric structure yields a low inductance when compared to conventional rolled dielectric capacitors. Fired capacitors produce true monolithic structures which are impervious to moisture and contamination. Further, the high ration of capacity-to-volume results in a significantly smaller size than achieved in conventional rolled dielectric capacitors. These new non-polar multi-layer capacitors are extremely small in size, light in weight, high in dielectric strength and reliability. Maximum operational temperature is +126°C, with no voltage derating. Idealy suited for bypass, filtering, and coupling.

Multilayer Concept

Actual Size



Minimum Insertion Loss In dB* (Per Mil-Std-220)

Nominal Capacitance Microfarads	Frequency 30 KHZ	50 KHZ	100 KHZ	1 MHZ	10 MHZ	100 MHZ	1 GHZ
.05	-	-	-	16	33	40	45
.08	-	-	-	20	36	42	50
.09	-	-	-	20	36	42	50
.12	-	-	-	24	41	45	55
.3	-	8	13	32	47	50	64
1.0	10	15	20	40	52	56	69

(*)At rated DCWV over the operating temperature range of -55°C to +125°C insertion loss is typically 6dB less.

TYPE MB CHIP CAPACITOR

MB multilayer ceramic chip capacitors are made by the same unique multi-layer process as the type CL capacitors resulting in extremely high capacitance to volume ratio, performance predictability, and increased mechanical strength. Operating temperature range is -55°C to +125°C. Standard end terminations are silver.

EIA Characteristic	Temperature Range	Maximum Capacitance Change

SPRAGUE — THE MARK OF RELIABILITY

Type 150D and CS13 Solid Tantalums

COMMERCIAL SERIES 150D & MILITARY TYPE CS13 —10%

Type CS13. Hermetically sealed solid tantalum capacitors to MIL-C-26655 Revision 2D. Low leakage current and stability with both temperature and time. Life test 2000 hours. Temperature range -80°C to +80°C with ⅓ voltage derating. High frequency performance: impedance remains low above 1 MHz. 2000 cycle vibration test and 50g shock test without any adverse effects. All 20% units on facing page.

Solid Tantalums Capacitors

SPRAGUE
THE MARK OF RELIABILITY

STANDARD SERIES 150D MILITARY TYPE CS13

Same characteristics as 10% model. True miniaturization with characteristics previously unobtainable in electrolytic capacitors. Type 150D same as above except commercial series.

NEW TYPE 196D EPOXY DIPPED SOLID ELECTROLYTE TANTALEX CAPACITORS

- Low Dissipation
- Radial Leads

Capacitors Furnished in sizes which permit coverage of a broad range of capacitance ratings, from 0.1.F through 330.F. The standard capacitance tolerance of these capacitors is ±20%. Operating temperature range —55° to +85°C low leakage current. The maximum dissipation factor is 10%. Standard capacitors are furnished with long straight leads. Leads are electro-tinned nickel for ease in soldering. Solid-electrolyte tantalum pellet construction allows plug-in mntg. on printed wiring boards.

TYPE CSR-13 2% "L" FAILURE RATE

Subminiature hermetically sealed units meet new MIL-C-39003/1A specifications. Tighter leakage current and dissipation factor over MIL-C-26655B. Low impedance above 1MHz. 2000-cycle vibration test. 50g shock test. Temp. range -55°C to 125°C. Leads type M1 of MIL-STD-1276, tin coated 0.50 to 1.50 mil. Temperature cycling and voltage aging Method 102, Condition C of MIL-STD-202 followed by exposure at 85C for 40 hours minimum, with rated voltage applied. Life test 10,000 hours. Plastic insulating sleeve. Weight 2 oz.

SPRAGUE — THE MARK OF RELIABILITY

Electrolytic Capacitors

POWERLYTIC TUBULAR ELECTROLYTICS

Type 39D. End seals are made of molded phenolic, for operation at temperatures up to 85°C. Low effective series resistance and leakage current.

HIGH GRADE ALUMINUM ELECTROLYTICS—125° C OPERATING-TEMP

Type 600D—2000 hr. life test at either temp. and corresponding working voltage. Features excellent capacitance stability dissipation factor and DC leakage current after high temp. shelf testing. Closely approximate requirements of MIL-C-3965 aluminum foil capacitors. Tolerance is - 10% +75% up to 75 WVDC; -10% +50% for 100 WVDC up. Sizes shown in chart are bare. Average shipping wt. 3 oz.

TYPE TE LITTL-LYTICS (30D)

Ultra-small electrolytic capacitors made for transistor circuitry and other sub-min. applications. Temp. Range:—20°C to +85°C. Ultra-low leakage current. Clear Plastic Sleeves. Life Test to 1000 hrs.

TYPE 500D MINIATURE METAL-CASE ALUMINUM ELECTROLYTICS

Ultra-small 500D series electrolytic capacitors. All welded construction, no pressure joints to cause open or intermittent circuits. Effective in temperatures up to 85°C (185°F) without derating. Leakage current extremely low. Avg. shipping wt. 2 oz.

TVL TWIST LOK ELECTROLYTIC

Withstand extremely high temperatures, ripple current and surge voltages. Self-mounting with twist-prong tabs that go through chassis or connect to washer for above-chassis mounting. For 85°C operation up to 450 Working Volts DC. Hermetically sealed in aluminum cans for long life and dependable performance in TV, radio, and Hi-Fi. Furnished complete with both phenolic and metal mounting plates on 1" and 1⅜" dia. cans only. Shpg. wt. 6 ounces.

Powerlytic and Capacitors

SPRAGUE
THE MARK OF RELIABILITY

36D "POWERLYTIC" ALUMINUM ELECTROLYTICS

For applications requiring maximum capacitance in a given case size. Low ESR and leakage current; extremely long shelf life. Withstands military environmental conditions including —55°C storage tests. Tol. 3-50v, +75% to —10%; 75-450v, +50% to —10%. Av. shpg. wt., 4 oz. With plastic outer tube.

SIZES FOR 36D CAPACITORS
D. x L. Including plastic outer case

•NEW TYPE 502D VERTI-LYTIC MINIATURE ELECTROLYTICS

Single Ended miniature aluminum electrolytic capacitors for vertical installation on high density printed wiring boards. Application in high quality industrial instrumentation. For use in radio receivers, automobile receivers, portable tape recorders and entertainment electronics. Excellent stability low leakage current. Operating temp. range —20°C to 85°C. Welds at all critical anode and cathode terminations. Assure freedom from open circuits in the millivolt or microvolt range. Sizes: CC: .410 x .577—CE: .410x.827.

SPRAGUE TVA Atom Electrolytics

THE MARK OF RELIABILITY

The only small size electrolytic especially designed for 85°C (185°F) operation on voltages to 450 working volts D.C. Unit is engineered to withstand extra high temperature, high ripple current, plus high surge voltages. Metal case construction with outer insulating tube. Wt., 3 oz.

SINGLE UNITS 6 WVDC

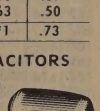
TYPE 2DF METALLIZED ORANGE DROP-CAPACITORS



Ideal for color TV replacement. Fits easily into tight spots because of their small size. Extremely High Insulation Resistance Insures Peak Performance At Temps. Up to +85. Radial leads are extra long for point-to-point wiring and crimped for printed board insertion. Double dipped in orange epoxy resin for protection against heat and humidity. Tolerance ±10%. 200 WVDC

TYPE 118P DIFILM METALIZED CAPACITORS

Unique dual dielectric rated for operation at 125°C without voltage derating. High insulation resistance and capacitance is 10 megohm-microfarads for 200 V units or 40 megohm-microfarads for 400 and 600 V units. Hermetically sealed, with glass to metal solder seal terminals. Tolerance: ±10%.

121P METALIZED PAPER CAPACITORS

Designed to operate at 125°C without voltage derating. High insulation resistance—at 85°C minimum product of insulation resistance and capacitance is 20 megohms microfarads. Tol. ±10%. 150 WVDC.

SPRAGUE Capacitor

THE MARK OF RELIABILITY

FILMITE "E" ORANGE DROP CAPACITORS

Temp. range —40°C to +85°C. Insulation res 25000 megohm-microfarads. Life test 250 hrs. at 85°C.

MINIATURIZED DISC CERAMIC

Tiny ceramic capacitors for by-pass and coupling application. Low self inductance and flat plate construction permits higher self-resonant frequency and high by-pass efficiency in all TV and transistorized circuitry. Good performance under severe conditions of humidity and vibration. TH dia. .335 to .905, TG dia. .275 to .655.

TYPE 431P WRAP AND FILL "FILMITE E"

Construction gives benefits over metal encased molded or wax coated Cardboard-case tubulars of comparable ratings. Axial lead polyester film capacitor section protected from moisture by wrap of polyester film tape.

J-135 "CERAMICENTER" CERAMIC ASSORTMENT KIT

- Handy Metal Drawers—Save Time and Effort

710 capacitors of 57 different values. Kit includes: 290 Type 5 GA, ceramic capacitors 145 Type 5HK "High K" bypass and coupling capacitors, 100 Type 10 TS, temperature stable capacitors 175 Type TG, disc capacitors. Cabinet, 30¾x5½x11¾". Ship. wt., 29 lbs.

80W415. NET **172.50**

HIGH-VOLTAGE DOORKNOB CERAMICS

Has female threads for interchangeable screw-in terminals. Molde plastic, Guard rings lengthen surface creepage path.

Type 20DK-T5. Complete with 7 terminals . 1" dia. x 31/32".

Type 30 DK-T5. Complete with 2 terminals. 1/16" dia. x 1¼".

FORMULATION C-023
MONOLYTHIC CERAMIC CAPACITORS

Monolythic ceramic capacitors for transistorized circuitry. C-023 formulation insures high K—these units provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a resin dip. Well suited for use in all frequency ranges through 1000 mc. Radial leads 20% tolerance.

SERIES 5GA CERAMIC CAPACITORS

Low self-inductance of silvered flat-plate design means very high by-pass efficiency in all TV circuits. Designed for 85°C (185°F) continuous operation. Higher self-resonant frequency than tubular ceramic or molded mica capacitors. Moisture proof coating. Tol. ±20%. 1000 WVDC. except (*) 500 WVDC.

HYPERCON CERAMIC DISCS

Ultra-miniature ceramic discs ideal for use in transistorized circuitry. Designed for by-pass and coupling applications but particularly well-suited for any low voltage use where high capacitance and low power factor are important considerations. Superior to electrolytic capacitors of similar capacitance value because of the very low power factor of Hypercon Capacitors, Capacitance Tolerance: GMV.

Cornell-Dubilier Capacitors

CDE

TYPE BR "BLUE BEAVER" ELECTROLYTIC CAPACITORS

Compact aluminum cased, cardboard insulated electrolytics. Type BR section tabs and leads are riveted. Type BBR negative lead is riveted and positive lead is crimped. Voltage ratings up to 150 volts feature etched cathodes.

NON-POLARIZED ELECTROLYTICS

Suitable for use when no DC polarized voltage is present. Units are physically similar to the type BR axial lead, hermetically sealed in aluminum cases with cardboard insulating sleeves. For use in crossover networks and in boot-strap filtering applications.

CAP-KIT

The type BR tubular electrolytic assortment is ideal for prototype shops, laboratory work, and general maintenence. The kit includes one each of the most popular BR ratings.

Cornell Dubilier Capacitors

CD SERIES DIPPED MICA CAPACITORS

Feature multi-coat dipped process to meet rigid humidity requirements. Conform to EIA specs. Meets requirements of MIL-C-5. Operating temperature: —55°C to +125°C. Tolerance: ±5% or 0.5 pF, whichever is greater. Operating potential 500 WVDC.

Have 1¼" tinned brass wire leads, except CD10 which has copperweld leads. All units meet 10-2000 cycle vibration tests.

Cornell-Dubilier Capacitors

CDE

COMPUTER GRADE HIGH CAPACITANCE TYPE FAH

Designed for use in computer power supplies and other applications where banks of high capacitance filters are required. Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Dual rated as shown, minimum operating termperature —40°C.

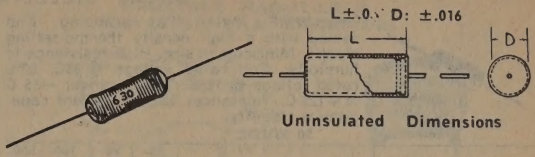
NLW ELECTROLYTIC CAPACITORS



Uninsulated Dimensions

Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leakage currents; freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, —40°C to +105°. Tol. —10% to +75%.

CDE Cornell Dubilier Capacitors

MYLAR DIELECTRIC FILM ENCASED

Type WMF. Mylar film wrapping. End sealed with a high density thermo-setting plastic. Miniscule in size. High resistance to humidity. Full rated voltage @ 85C, 50% rated voltage @ 125C. Temp. range: —55 C to +125 C. Tolerance: 10%. Excellent capacitance stability.

50 WVDC

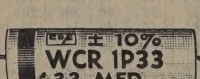
TYPE WCR — POLYCARBONATE/FILM WRAP



Operating temp. range from —55°C to +85°C without derating and to +125°C with 50% voltage derating. Excellent capacitance stability. Tt 1000 Hz average capacitance charge is within—1%; within —3% of the +25°C value.

Cornell-Dubilier Capacitors

CDE

Type MFP Space-Saver flat oval Polyester Film capacitors

Type MFP is similar to WMF. It is designed however, with an oval figure useful in many applications requiring its space saving characteristics. In ratings of 0.01 mfd. and above, the MFP is often used as an alternative to type WMF or the mil. type CTM. The unit is highly moisture and humidity resistant. Max. operating temp. range: -55°C to +125°C 85°C at full rated voltage with deratings of 10% and 50% at 100 C and 125 C respectively. Standard tolerance is +10% 1½" min. copperweld leads. Thickness and width tolerances are: up to and incl. .484"+.032", 500" to and incl. 1.000" ±.062"; larger than 1.000" ±.093.

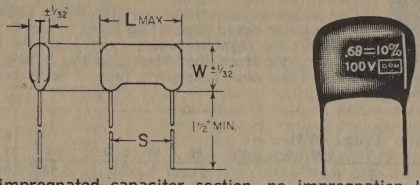
MINIATURE RADIAL-LEAD POLYESTER FILM CAPACITORS



Fix-fil-impregnated capacitor section—no impregnation leakage even at maximum operating temperatures. Uniform dip coating control assures protection of capacitor section—no possibility of shorts caused by contact of an uncoated case to chassis. Max. operating temperature is 125°C-85°C at full rated voltage. 10% derated at 100°C and 50 derated at 125°C. Leads are #22 AWG including 0.068/100V; 0.047/200V; 022/400V, and 0.068 at 600V. Above these ratings leads are #20 AWG. Tol. ±10%. Wire lead spacing: 9/16" for ¾" dim. L and 5/16" for 1⅛" dim. L.

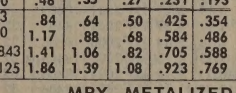
MPY METALIZED PAPER CAPACITORS



Metalized paper, solid resin impregnated unit designed for operation from —55C to +125C at full rated voltage. Solid resin impregnant insures maintenance of performance. Encased in exclusive CDE triclad case construction; outer cardboard tube bonded to aluminum foil which is bound to film interliner. Epoxy end seals are bound to tube and leads. Leads are minimum 1½" long. Average shipping weight: 3 oz.

DC Paper-Oil (Mil CP70) Capacitors

DC PAPER-OIL CAPACITORS TYPE T-SIMILIAR TO MIL CP70 STYLE
"E" Characteristic is Up-Dated Version of Mil CP70
Directly Replaces "F" Characteristic

For power supply filter specifications. Solder seam styles, rectangular cased. Operating temp.: —55°C to +85° C. CDE reserves the right to supply type T with a ⅛" variation in case height from that shown in the listing. Former styles TJU, TJH, and TJL were type T with bracket attached.

Equivalent obtained by ordering T with universal bracket for type TJU, spade bracket for type TJH, and footed bracket for type TJL. Order brackets separately from table below, right column. ***2 brackets needed per unit.** (†) CP7-OD1-.

Widely used in military equipment and communications as well as in industrial electronics equipment. All types are drawn case bathtub configurations with side mounting flange. In addition to MIL-C-25 ratings stock ratings include popular non-military standard ratings. Oper. Temp. range: —55°C to +85°C; Dissipation factor @25°C: less than 1%; Insulation resistance: Type MYR, 2000/6000 @ 25°C; 200/600 @ 85°C. Type DYR, 1500/4500 @ 25°C; 15/450 @ 85°C. Temp. Coeff.: Type MYR, ±10%; Type DYR, +10%—30%. All styles supplied with terminal style B, non-removable solder lug. Single, dual and triple capacitance units available.

TYPE UHL D.C. ALUMINUM ELECTROLYTICS

All welded type UHL are polarized, etched foil aluminum electrolytic capacitors which operate over temp. range -55°C to +125°C without derating. Offers minimum capacitor weight suitable to airborne and space applications. Dual voltage rated for higher voltage operation at the lower ambient temp. of +85°C. Max. capacitance change at -55°C: -30%. Mil Style CU 12, CU 13 capacitors to Mil-C-39018/01, in all capacitance ratings, voltages, and tolerances, are available.

"KR" ALUMINUM CAN CAPACITOR

Single hole inverted mounting aluminum can electrolytics. Ideal for replacement of 1" diameter wet type electrolytics in older equipment. Shipping wt., 6 oz.

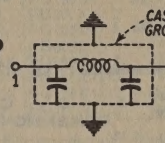
NEWARK Carries complete lines of top quality electronic equipment. Newark can supply all your needs, whether or not they are listed in this catalog.

Type NFT. 15 amp rating +125°C maximum operating temperature. Can be used in place of 5 amp and 10 amp, +85°C or +125°C NFT units, and 10 amp CZ units with no sacrafice in case size. Recommended for prototype purposes as well as production runs. Commonly used in buffers, DC motors, drills, fans, ignition systems, relays, thermostats, etc. Tol.: 10%.

Type NFR. Designed for high attenuation of RF interference over the ranges of 150KC to 10 GC(#) and 14KC to 10GC(+). Three terminal design for bulkhead or chassis shielded mounting.



Type NF. Designed for high attenuation over the range of 150KHZ to 1MHZ. **Chassis shielded, flange mount. †Bulkhead shielded mount.

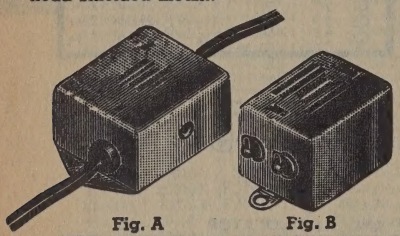


Fig. A Fig. B

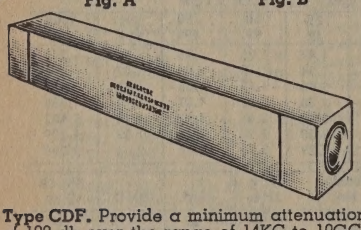

Type CDF. Provide a minimum attenuation of 100 db over the range of 14KC to 10GC. Meet the requirements of MIL-F-15733 where applicable. Provide for versatile mounting with threaded fitting lead termination or universal conduit mounting. Shpg. wt. 35 lbs.

IF-4

IF-18

Type IF. Filters are 5 amp portable devices designed for light interference applications. Electrical appliances are plugged into the line sockets provided. IF-24 and IF-54 are commercial wired-in devices designed for RF1 suppression of flourescent light sources, office machines and other small appliances. U.L. approved.

Type CA. By-pass capacitors meet requirements of MIL-C-12889 including severe shock and vibration. Temperature range: —55°C to +85°C. For attenuation of RF noise over wide frequency range.

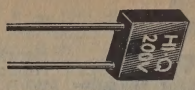
MILITARY-TYPE CK05 AND CK06 CAPACITORS



Type CK05 is .200 square by .100 thick. Type CK06 is .300 square by .100 thick. Molded for improved humidity protection and reliability. Tolerance is ±10%. Operating temperature is −55°C to 150°C to meet specifications of MIL-C-11015.

TYPE K323Z METALLIZED POLYCARBONATE TUBULAR CAPACITORS

Hermetically sealed Polycarbonate film provides high capacitance stability. Self-heals in the rare case of dielectric breakdown. Operating temperature: −65°C to +125°% of full rating. Standard tolerance is 20%. Other tolerances available on special order.

For Plastic Sleeve add suffix "P" and add .02 to unit price.

V-161 AEROFILM TUBULAR CAPS

High quality units in Polycap (Polyester Film) casing material which have high insulation resistance, low dielectric absorption and power factor. Relatively small capacitance change over 0° to 85°C. Epoxy end fill will not flow, soften, or melt at any operating temperature. Tolerance ±20%. Operating temp. −30° to +100°C. Aver. shpg. wt., 2 oz.

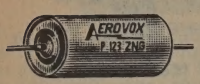
TYPE P123ZN METALLIZED PAPER CAPACITORS



Hermetically sealed metal cased paper capacitors designed for long life. 50 WVDC units are specifically designed for transistor applications and low voltage operations. Operating temperatures of all voltages: —55°C to +100°C with no derating; up to 125°C derated to 75%. Standard tolerance of 50 WVDC ±10%; 200, 400, and 600 WVDC. Other tolerances and insulated sleeve types are available on special order. Average shipping weight, 2 oz.

METALLIZED MYLAR "WRAP & FILL" CAPACITORS

Type V146Z. Light weight, high insulation resistance, long stable life. For use in printed assemblies and light weight portable and airborne equipment of all types. Can be mounted in banks using a minimum amount of space. Self-healing and are of instrument quality. All leads are solder-coated copper-weld wire. Tolerance: ±10%.

TYPE V146XR AEROFILM "WRAP & FILL" MYLAR CAPACITORS

Aerovox V146XR capacitors offer high resistance to humidity and excellent stability with temperature where a metal case is not needed. Extremely small size makes these ideal for use in miniaturized circuits. Mylar wrapped, epoxy end filled.

Standard tolerance is ±10%. Power factor will not exceed 1% at 25°C. Operating temperature range of —65°C to 85°C at full voltage rating and to 125°C with derating. Extended foil construction. Leads are solder-coated Copper-Weld wire.

CERALAM® MOLDED MINIATURE CERAMIC TUBULARS

Tubular ceramic capacitors permit 60 to 70 times as much capacitance per unit of volume as compared to conventional style hollow-core tubulars. Meet environmental requirements of MIL-C-1105 and 39014. All units English marked with tin copper leads.

The standard will then become tin copper leads.

TYPE K146Z, K146ZR METALLIZED POLYCARBONATE CAPACITORS

Metallized polycarbonate flim capacitors have high capacitance stability and insulation resistance, low dissipation factor, and dielectric absorption. Metallized polycarbonate construction assures a self-healing unit.
Operating temperature range is —65 to 125°C at full rating. Standard tolerance is ±20%.

TYPE GPD GENERAL PURPOSE BYPASS AND COUPLING DISKS (1000 VWDC)

Ceramic disk capacitors for all bypass, coupling and filtering applications offer maximum protection against humidity, voltage breakdown and vibration.
All units ±10% (K) tolerance except * (P) which are Guaranteed Minimum Value.

The entire Aerovox line is available from Newark. Space does not permit all items to be listed.

MC71 CERAMIC CAPACITORS

All units ideally suited for automatic insertion into printed circuit boards. Supplied with gold-plated No. 26 gauge dumet leads. All are rated at 100 VDCW. Cerafil® construction. Case size measures .250" long x .090" diameter. Capacity tolerance: ±10%. Equipped with axial leads.

NEWARK Electronics proudly announces availability of special capacitor services:

Newark's new **ESP** (Extra Service Procurement) provides you with special services for unique procurement situations.

Here are just a few of the many "factory" services available from America's leading electronic component distributor.

- *Close tolerance testing to 0.1%*
- *Parts marking per your specifications*
- *Matching units for close tolerance work*
- *Component conditioning for high reliability*
- *Special packaging per your specifications*
- *Military packaging on request*
- *Cutting and forming of leads*

One-week service is as close as your phone . . . Just call NEWARK!

MALLORY Capacitors

- Pressure Sensitive Safety Vent Construction
- Widest Variety of Container Sizes
- Low ESR
- Mylar Sleeved

TYPE CG

- Operating Temp. —40 to +85°C
- Maximum DC Leakage Current @ 25°C: 4 mA

COMPUTER GRADE ELECTROLYTIC CAPACITORS

Computer grade capacitors have capacity tolerance: —10, +75% for 0-150 volt units; —10, +50% for 150-450 volt units. Supplied with 7/32" high post. Terminals with #10-32 screws. Sizes do not include terminals or sleeve. Lug and low post terminals, special capacitances, working voltages, and sizes available on special order.

TYPE CGS

- Oper. Temp. —40 to +65°C
- Mylar Sleeved
- Maximum DC Leakage Current @25°C, 6 mA

TYPE CSR SOLID ELECTROLYTE CAPACITORS

New solid electrolyte tantalum capacitors meet or exceed established reliability requirements of MIL-C-39003A for 2% (L) and 1% (M failure rate levels. Rigid MIL specifications. Have hermetically sealed metal cases with insulating sleeves. WVDC is at +85%C. ±10% Tolerance. Av. shpg. wt. 2 oz.

2% FAILURE

NEWARK STOCKS THE WORLD'S MOST COMPLETE INVENTORY OF INDUSTRIAL ELECTRONICS EQUIPMENT

- Phone, Write, Wire for Price Quotations
- Fast Shipment from On-the-shelf Stocks
- OEM Prices
- Complete Stocks of All Industrial & Military Types

TO SERVE YOU BETTER—STOCKING WAREHOUSES FROM COAST-TO-COAST

MALLORY Electrolytic Capacitors

FP AND WP CAPACITORS

Vertical mounting dry electrolytics for all filter and audio by-pass circuits, and TV applications. All types include deep etched anodes and etched cathodes. All hermetically sealed in aluminum cases. Can is negative; separate positive terminals provided for each section. With mounting washers. Shipping weight, 6 oz.

Working volts: 450-450-450-450.

METAL TUBLAR DRY ELECTROLYTIC CAPACITORS

TC Electrolytic with Mylar Sleeve. Single section capacitor with clear mylar insluating sleeve. Sizes shown are for base can, without sleeve. More capacitance and voltage in a smaller sized can. Tol. —10%+100%. Temp. rating up to 85°C. (*) includes mounting strap.

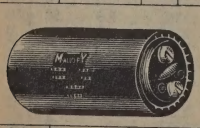
HC CAPACITORS



Plastic case electrolytics for high capacity, low-voltage applications such as dry disc rectifier filters, movie equipment, etc. All are polarized. Two screw terminals. 10 oz.

Tantalum Capacitors

MALLORY

TIM TYPE

Mallory TIM capacitors are solid electrolytic tantalum types in rectangular cases. Tinned #24 AWG wire leads. Total lead length is 1½" ±¼".

WET-SLUG TANTALUM CAPACITORS TNT & TAP TYPES

Type TAP. Operating temp. —55° to +85°C. DC leakage is less than 1 microamp after 10 min. of rated voltage. Furnished in metal cases with precision formed epoxy end seals. Tol., —15% to +75%. Axial leads 1½" tinned for easy soldering.

TYPE AM METAL CLAD MINIATURE CAPACITORS

Type AM metal clad miniature capacitors utilize metalized mylar film as the solid dielectric and are hermetically sealed. High performance exceeding the most rigid tests for humidity and temperature. Windings are extended foil (non-inductive) construction. The capacitors are self healing and non-sparking. Tolerance is 20%. Sizes shown are for diameter and length. Power factor is less than 1% at 25°C. Temp. Range +125°C.

ERIE Capacitors

SUBMINIATURE MONOBLOC CERAMIC CAPACITORS

Type 8003

Monobloc construction allows a volumetric efficiency up to 20mf/cu. in. Tolerance within ±10% for capacitance from 10 pf to 100 pf when measured at 1mc with .5 to 1 VRMS across the capacitor including COG dielectric. For values greater than 100pf tolerance is within ±10% —when measured at 1kc with .5 to 1 VRMS across the capacitor. Maximum capacitance change ±15% of the 25°C value over temp. range —55°C to 125°C. Size: .260 max. lead length 1.5 min. Leads 22AWG solder coated copper.

TYPE 390-000 SUB-MINIATURE MOLDED CAPACITORS

Meets military specifications MIL-C-11015 with a cap. range up to 300 pf ±10%, 20%; 390-680 pf ±20%+100-0% (GMV); 820 and above +100-0% (GMV). Working voltage of 100 volts DC at 85°C, or 50 volts at 125°C. Constructed of high quality molded plastic to assure resistance against moisture and humidity. Dia., —.100; L—.260 Lead L—1.50 min. #22 AWG (.025) tinned copper leads.

RED CAPS

Encapsulated with JET-SEAL, a hard, bright polymeric coating, formulated to provide mechanical and electrical protection under the most severe environmental conditions. Meet requirements of MIL-C-20 and MIL-C-11015. Size height .300 width .300 and spacing .200.

TRANSCAPS

Use in transistorized, filtering and by-pass applications. .156" thick. All char. Y5F. PF max is 8%. IR (min) ohms, is 1,000,000 for 5655 and 5615. Life, at 85°C. and rated voltage, is 500 hours. All are rated at ±20% tol. Shpg. wt., 1 oz.
Lead spacing.250 except type 5615, 5645 and 5685 which are .325.

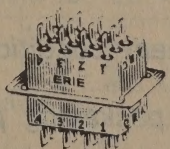
MINIATURE 6 & 12 CHANNEL R.F.I. FILTERS



Minimum attenuation: 45 db from 100-200 Mc, 50 db from 200 Mc to 2000 Mc, over the temp. range of —55°C to +125°C measured in accordance with Mil-Std.-220A. Capacitance: 2500 pf min. at 1Kc, 0.5 to 5 Vrms. 25°C. Working voltage: 350 VDC. Insulation resistance: 20K megohms min. at 100 FDC 25°C (50 ma max. charging current). D.C. resistance: .01 ohms per section D.C. and low Frequency current: 5 amps max. per section.
Type 1212 is 12 channel—**Type 1206** is 6 channel. **Size:** 502 and 501—1.125 x .594". 552 and 554—.75 x .437".

NEWARK ELECTRONICS PROUDLY ANNOUNCES AVAILABILITY OF SPECIAL CAPACITOR SERVICES:

- *Close tolerance testing to 0.1%*
- *Parts marking per your specifications*
- *Matching units for close tolerance work*
- *Component conditioning for high reliability*
- *Special packaging per your specifications*
- *Military packaging on request*
- *Cutting and forming of leads*

Centralab Capacitors

CENTRALAB
Electronics Division
GLOBE-UNION INC.

TYPE DD DISC CERAMIC CAPACITORS

Primarily intended for by-pass, coupling or filter service where high capacity is necessary and controlled stability is secondary. Disc ceramic capacitors have a higher dielectric constant, greater voltages, and higher capacities in less space than paper or mica types. Construction enables these units to operate for long periods of time under extreme moisture, temperature, and vibration. 1000 volts DC working except #, which are 600 volts DC working. Tol. ±10% except * ±20%, † ±.5 mmf, ‡ GMV; ** +80—20% (A) 9/32x5/32"; (B) 3/8x5/32"; (C) 19/32"x5/32"; (D) 11/16x5/32"; (F) 23/32x1/4"; (G) 7/8x1/4";

HI-VO DISC CAPACITORS 3000-6000 V

Highly efficient for by-pass-coupling in high frequency circuits under conditions of extreme humidity or temperature. Maintain performance at temperatures up to 85° C. Tested at twice rated working voltage before shipment. Leads #22 tinned copper wire 1½" min. length. Insul.: Double coating of "DUREZ" and high temp. vacuum wax impregnation. Tol. ±20%. Volt. DD30 series, 3000 VDCW, 6000 VDC test; DD60 series, 6000 VDCW, 12,000 test. Sizes: (A) .330" dia.; (B) .430" dia.; (C) .630" dia.; (F) .800" dia.; (G) .730" dia.

CERAMIC CAPACITOR KIT

MODEL DDK-200 KIT. Contains a carefully balanced inventory of 200 disc capacitors required most in replacement applications. All are 1000 WVDC except (*) 600 WVDC. Value desired can easily be located and removed from labeled, reusable clear plastic packages. Housed in one drawer, heavy gauge steel 6x4x11" cabinet finished with durable blue enamel.

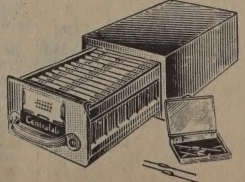
POLYSTYRENE CAPACITOR KIT



Model CPK-150 Kit. Contains 150 sealed polystyrene foil capacitors, rated at 500VDCW and with a ±5% tolerance. 17 values range 22 pF to 10,000 pF. 5 to 20 pieces per value. The polystyrene film dielectric of these units permits use in place of mcia, Mylar, paper, and ceramic steel cabinet finished in blue baked enamel. Contents are fully labeled.

TYPE 827 TRIMMER

Ceramic molded phenolic body. Maintain stability under vibration, due to light weight rotor construction that is always in balance under heavy spring pressure. 500 volts DC working, 1000 volts DC test. Initial insulation resistance, 10,000 megs minimum. Power factor is less than 0.2% at one MHz. Size: 17/32x3/4". Wt., 2 oz.

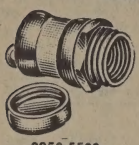
Johanson Variable Capacitors

GENERAL SPECIFICATIONS

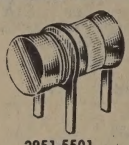
Working Voltage	250 VDC (Test Voltage 500 VDC)
Insulation Resistance	10^6 Megohms
Operating Temperature Range	—65°C to +125 C

All part numbers except those with a 7 or 9 prefix meet or exceed MIL-C-14409

HIGH Q VARIABLE AIR CAPACITORS



2950-5500



2951-5501

2954-5502

These variable air capacitors offer the user an extended capacitance range with exceptionally high Q, in miniature size. Designed for protection against shock, vibration, fungus, salt spray and humidity. The 5200, 5400 and 5500 series features one piece integral contact-rotor-mechanism which provides Qs previously unavailable in trimmer capacitors as well as critical tuning stability and extremely low dynamic noise.

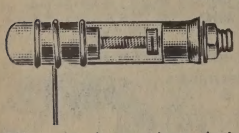
AIR CAPACITORS



8050 series is a unique design concept of vertical mounting of variable air capacitors. Offer space saving advantages over the standard printed circuit units. Capacitors can be adjusted through the circuit board eliminating approach channels required in the standard type units. The overall height of the mounted unit allows this series of capacitor to be used on printed circuit boards mounted on half inch centers.

Stk. No.	Type	Q Factor @100 Mnz	Capacitance Range	1-24	25-49	50-99	100-299

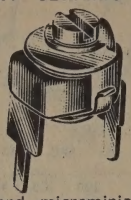
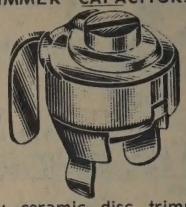
• NEW 9300 SERIES ROTARY CERAMIC DISC TRIMMER CAPACITORS



9212



9300

Miniature and microminiature rotary ceramic disc trimmer capacitors provide the circuit engineers features heretofore not available in units of such small size. Precision designed rotor plate incorporates specially formulated ceramic materials which provide long life and environmental stability. Is mechanically designed to provide even linear tuning as well as high resistance to shock and vibration. Size: All models except 9312 & 9313 .276 dia. x .315 deep. Models 9312 & 9313 .230 dia. x .315 deep. Weight: ½ oz.

MICROCIRCUIT TRIMMER CAPACITORS

7200

7201

Series is the smallest device of this type available and is ideally suited for UHF oscillators, strip lines, balancing of semiconductors and microwave components as well as for trimming of small fixed capacitors. Electrically, they have a tuning ratio of 10:1 as well as high working voltage and Q's not previously available in such a small package.

Stk. No.	Type	Q Factor @100 MHz	Capacitance Range	1-24	25-49	50-99	100-299
17F203	7200	>500	0.1 pf - 1.3 pf	4.35	3.90	3.45	3.05

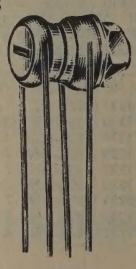
17F209	7241	>2000	0.2 pf - 2.0 pf	5.30	4.70	4.30	3.85

GENERAL PURPOSE PISTON TRIMMER CAPACITORS

7330

7331



7332

Series of variable capacitors is ideally suited for both commercial and military applications. Solid metal band design assures electrical and mechanical reliability far in excess of conventional trimmers. The three mounting configurations available in this series affords the circuit designer wide latitude in mechanical layout.

Working Voltage 500 VDC (Test 1000 VDC)

Stk. No.	Type	QFactor @1MHz	Capacitance Range	1-24	25-49	50-99	100-299
17F205	7330	>900	1.0 pf - 10.0 pf	3.90	3.35	3.20	3.00

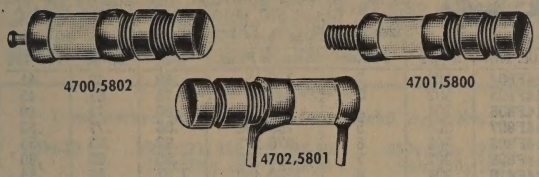
Johanson Capacitors

SUBMINIATURE UHra HIGH Q VARIABLE AIR CAPACITORS



4700 series provides 10:1 capacitance ratio in microminiature size, extra fine tuning of <.35 pf per turn as well as high Q (> 1500 @ 500 M Hz). Their ultra rugged construction and fine tuning resolution assures reliability in the most critical applications.

5800 series incorporates the new patented contact mechanism which affords extremely high Q's, outstanding tuning stability and low dynamic noise.

Stk. No.	Type	Q Factor @ 100 MHz	Capacitance Range	1-24	25-49	50-99	100-299
17F170	4700	>5000	0.35 pf - 3.5 pf

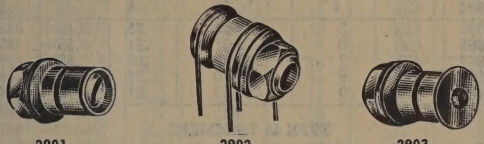
17F212	5852	>7500	0.5 pf - 5.0 pf				

HIGH VOLTAGE VARIABLE AIR CAPACITORS



2900 series is rated at twice the voltage of standard variable air capacitors. . .working voltage is 500 VDC and test voltage is 1000 VDC. Because of their unique design the 2900 series provides greater reliability under voltage stress and vibration. This series is ideally suited to applications where small size and high working voltages are a design criteria.

Stk. No.	Type	Q Factor @ 100 MHz	Capacitance Range	Temperature Coefficient	1-24	25-49	50-99	100-299

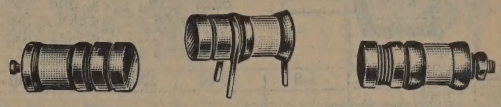
17F177	2903	>3000	1.0 pf - 10.0 pf	0±20 ppm/°C				

MINIATURE HIGH Q VOLTAGE AIR CAPACITORS



4600 series features in a miniature size high Q, rugged construction, high selectivity and high sensitivity. This series is ideal for both military and commercial applications where reliability and performance are critical.

5700 series is similar to the 4600 series but incorporates the new patented contact mechanism. This design affords Q's previously unavailable in trimmer capacitors as well as providing outstanding tuning stability and extremely low dynamic noise.

Stk. No.	Type	QFactor @ 100 MHz	Capacitance Range	Temperature Coefficient	1-24	25-49	50-99	100-299

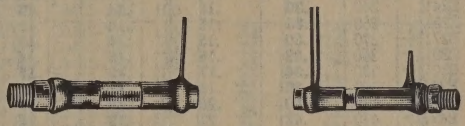
MINIATURE PISTON TRIMMER CAPACITORS



This series of capacitors are miniature versions of glass dielectric trimmers and are suited for a wide variety of industrial and military applications. The unique drive mechanism affords precision tuning and electrical stability. The two mounting styles and the exclusive round nut design aid the designer in high component packaging density.

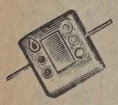
MOLDED SILVERED MICA CAPACITORS



Manufactured in accordance with MIL-C-5 specifications and EIA Specification RS-153. Color coded in accordance with MIL-C-5. Temp. range: —55 to +85°C. Vibration frequency: 10-2000 hz. ±5% tolerance. CM-20: 2/32 x 7/16 x 7/32". CM30: 13/16 x 3/16 x 9/32".

TYPE 30 MICA TRIMMERS

Padders use phosphor bronze adjusting plates which assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion, and completely enclosed. Rated 500 volts DC flash. 250 WVDC. Size: 7/8 x 15/16 in. Shpg. wt., 3 oz.

DUR-MICA KITS

Individual clear plastic boxes, labeled for easy handling.

Type CM-15. Kit # 1. Contains one each of 46 capacitors. Values: 1 mmf.—510 mmf. Shpg. wt. 1 1/4 lbs.
14F830. NET **48.00**

Type DM-15. Kit # 10. Five each of 51 capacitors. Values: 1 mmf.—820 mmf. Tol. ±5%. Shpg. wt., 1 1/2 lbs.
14F840. NET **61.20**

Newark's special capacitor service:

- close tolerance testing to 0.1%
- special parts marking
- matching units
- component conditioning
- special packaging
- cutting and forming of leads

Delivery takes one week

DIPPED-MICA CAPACITORS

The Dipped Mica is a silvered mica capacitor with a plastic coating. It combines excellence in stability, dielectric strength, "Q", dielectric constant, chemical inertness, moisture resistance and puncture resistance. Operating temperature range —55°C to 150°C. Standard tolerance ±5% except (*) Min. tolerance ±0.5 Pf. DM5 capacitors are stamped with capacitance values in pf. followed by a letter signifying capacitance tolerance. (J) means ±5%, while (A) signifies ±1% pf. D = ±.5 pf. All ELMENCO dipped mica capacitors meet or exceed requirements set forth in MIL-C-S specifications. Portions of the ELMENCO DM series are the specific values and case sizes tabulated in the MIL-C-5/18 detail specifications. All capacitors rated at 500 volts, except (†), 100 volts and (‡), 300 volts.

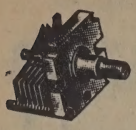
Capacitors

E. F. JOHNSON



TYPE "L" CAPACITORS

The rotor bearing and stator support rods are soldered directly to the Steatite end frames, making the unit virtually vibration-proof. Threaded 3/8-32, mounting nut provided. Plate spacing .030". Shaft diameter: .250. shaft length: 25/32". Size: 1 3/8w.x1 3/8h. Av. shpg. wt. 6 oz.

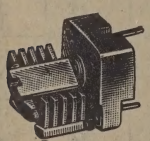
TYPE "U" AIR VARIABLE CAPACITORS—SINGLE SECTION



*Sub-miniature Type "U" air variable capacitors. Units offer high "Q" (greater than 1500 at 1 MHz), high torque (2 1/2 to 10 ounce inches), exceptionally low temperature coefficient (plus 45± 15 PPM/°C), and absolute freedom from moisture entrapment found in trimmer capacitors of the enclosed or solid. Dielectric type. Lengths shown are ±1/32".

TYPE "R" CAPACITORS

Featuring extra heavy steatite support insulators and .023" thick brass plates. All metal parts are heavy nickel plated for corrosion resistance. Plate spacing .024" bearing threaded 3/8"-32. Heavy brass end frames provide superior rigidity. Double bearing construction and silver plated beryllium copper wiring contacts provide smooth, reliable performance. Av. shp. 6 oz.

Ceramic Capacitors NYTRONICS

"DECI-CAP"

Epoxy-molded subminiature ceramic capacitor. Operating range: —55°C to +125°C. High density cordwood packaging. Capacitance range: 4.7-27,000 pf. Size: all 0.100" dia. x 0.250" l. (¼ watt resistor). Tolerance: ±10%. Working voltage 4.7-470 pf: 200 volts DC. 560 pf to 27,000 pf: 100 volts DC. Meets MIL-C-11015C.

You Can Depend on NEWARK for Everything In Industrial Electronics

- **Same Day Shipment from On-the-Shelf Stock**
- **OEM Factory Prices**
- **Phone-Write-Wire for Price Quotations**

Special parts, special packaging, custom component marking and lead trimming are available on request. Call Newark first.

HY-CAP

The HY-CAP is a high capacity ceramic capacitor. For design application in coupling, by-pass, and filter circuits where temperature stability and high capacitance are mandatory. Capacitance range is .01 mfd. to 2.5 mfd. Less than ±15% capacitance change from —55°C to +125°C. Working voltage is 100 Volts D.C. with no derating to 125°C. Life test is 1000 hours at 125° under twice rated voltage. Tol: ±20%. This ceramic capacitor meets the requirements of MIL-C-11015.

HIGH STABILITY CERAMIC MOLDED AND CHIP CAPACITORS

NYT-CAP. This ceramic capacitor has ultra-high stability. Capacitance range is 4.7 pf. to 4700pf. Working voltage is 200 Volts D.C. Miniature molded epoxy case suitable for high component density applications. For use in oscillators, filters, and other critical circuitry. Tolerance ±10%.

CERAMIC

CHIP

NYT-CHIP. Provides in slug form high stability and low loss features of the epoxy molded NYT-CAP. Compatible with integrated circuitry, thick and thin film circuitry, and printed circuitry. Capacitance range: 4.7pf to 4700pf. Tolerance: ±10% standard. 200 VDC rating. With wrap-around terminals.

Switch Application Information

Some Important Considerations Are:

A. LOAD REQUIREMENTS

1. Voltage (AC-DC), Current, Horsepower
2. Resistive, Inductive, Motor, Lamp, Rectifier, Dry Circuit

B. EXPECTED LIFE

1. Number of Operations
2. Duty Cycle — Intermittent or Prolonged.

C. ENVIRONMENTAL CONDITIONS

1. Vibration and Shock
2. Sand, Dust, and Other Contaminants
3. Temperature Extremes
4. Fungus
5. Salt Spray or Other Corrosive Atmospheres
6. Other Unusual Conditions of Service

Frequently Used Switch Terms

 Single Pole	Action interrupting current in a single conductor.
 Single Throw	A moving contact element completing a circuit in only one of its extreme positions.
 Normally Open	Circuit is non-functioning when switch is in "off" position.
 Normally Closed	Circuit is functioning when switch is not operated. Operation causes a break of the current.
 Double Pole	Switch that simultaneously makes or breaks current in two conductors.
 Double Throw	Switch that alternately completes a circuit at either of its extremes.

EASY INDEX TO SWITCHES

Newark stocks a wide variety of high quality switches, in depth, ready for immediate delivery to your installation. These switches meet all types of commercial, industrial and military requirements. Carefully selected by Newark's staff of marketing specialists, all switches stocked are produced to exacting specifications by leading manufacturers. All switches listed are in stock, in OEM quantities, at OEM prices. If you have a particular requirement, just call your nearest Newark facility for the best service anywhere. See back cover for your closest Newark facility.

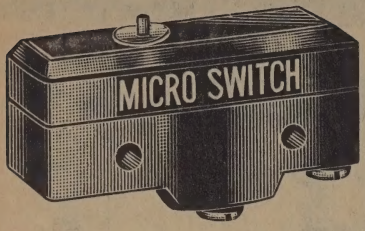
MICRO SWITCH Precision Switches

STANDARD BASIC INDUSTRIAL SWITCHES



- U.L. and CSA Listed
- 20,000,000 Life Cycle
- High Temperature Construction
- Sealed Plunger and Cover

Type Z SPDT switches offer precision snap-action mechanism enclosed in molded plastic case. Designed for compactness, lightweight, accurate repeatability and long life. Molded terminals, enclosed mounting holes, and low moisture absorbing plastic for protection of switching mechanism. Sealed plunger and cover afford additional protection. Includes wide variety of design variations such as operating force as low as 4 oz. max.; sensitive differential travel of .0002" to .0003"; power load switching capability to 25 amps; motor handling capacity of 2 HP at 250 VAC; temperature tolerance to +180°F on standard construction; high temperature construction for up to +400°F; and alloy contacts for special applications. Type DT are DPDT and are interchangeable with Type Z. All have screw terminals except: *solder terminals; †indicates mounting holes accept pins or screws; §recommended for added overtravel.

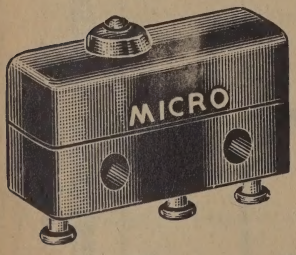
SUBMINIATURE BASIC SWITCHES



- U.L. and CSA Listed
- Hi-Temp. Designs to +400°F
- Bifurcated Gold Contacts
- 10,000,000 Life Cycle

Miniature and subminiature SPDT basic switches combine precision operation and long life. Ideal for electronic and aerospace equipment, or application where size and weight are critical. Type 1SX Series (includes Type JS) are smallest Micro Switch snap-action switch. This series offers bifurcated gold contacts for reliability, low operating force to 3 oz. maximum, power load switching capabilities to 7 amps., and long mechanical life of 10,000,000 cycles. Type SM series offers bifurcated gold contacts, low operating force to 56 grams maximum, sensitive differential travel to .001" maximum, power load switching to 10 amps., motor load handling capacity to ¼ HP. Type V3 Series (included Type JS) features high electrical capacity and long life of 10,000,000 cycles. Also, low operating force to 50 grams, maximum, sensitive differential travel of .008" maximum, power load switching capabilities to 15 amps, and motor handling capacity of ½ HP. Terminals, all series: *pin, †quick-connect, ‡solder, §screw, #mounting holes for pin, screw.

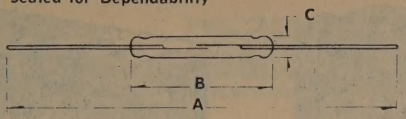
Magnetic Reed Switches

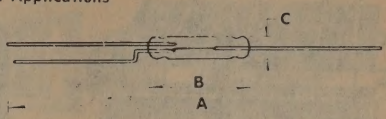
HAMLIN INC.

- Ultra Compact and Highly Sensitive with Rapid Cycling Rate
- Hermetically Sealed for Dependability
- Unaffected by Temperature or Pressure
- Idea for A Wide Variety of Systems and Instrument Applications

Type MRG-DT-SPDT Form C.



Type MRL-2-SPST Form A



Dry and mercury-wetted magnetic switches that are precision crafted for reliable operation under most critical conditions. Offer excellent flexibility in a broad range of applications. Hermetically sealed for safe, dependable use in any atmosphere—even under explosive conditions. Unaffected by high or low temperature extremes or pressure. Offer long life Compact size with high sensitivity and rapid cycling rate make these switches ideal for a wide variety of industrial uses. Excellent for use in position indicators, counting instruments, limiting switches, flow meters, communications instruments and reed relays. Actuating time: 1 millisecond or less. Dry reed switches have life expectancy of 50 million operations; mercury wetted switches, 1 billion operations. Contacts: Form A (SPST-N.O.) or C (SPDT). May be actuated by permanent or electro magnets. Permanent magnets sold below. See following chart for switch dimensions. Av. shpg. wt., 1 oz. each.

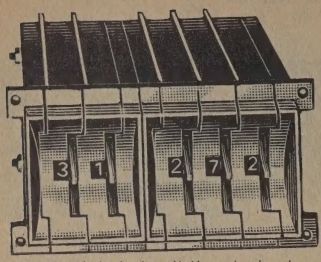
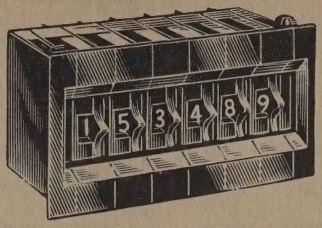
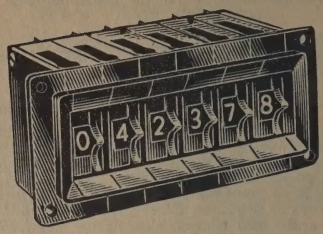
Inter-Market Switches

PRINTED CIRCUIT THUMBWHEEL SWITCHES







Low-cost printed circuit thumbwheel switches for industrial uses uses where adverse environmental conditions are not usually encountered. Permits selection of more functions in smaller panel space than older wafer switches.

Each module is ½" wide and provides numerical indication of switch function. Special interlocking feature and the use of two threaded rods at the rear permit constuction of complete module banks enabling the user to take advantage of maximum custom design flexibility. Divider plates and blank modules separate the banks into clearly defined sections. Current: 0.5 amp per switch. Voltage: 200 volts, maximum power of 24 watts with 12 watts energized output. Insulation resistance: 1000 megohms. Contact resistance: 0.10 ohm. Life: 1,000,000 detent operations. Available with 10-position decimal, BCD, or BCD-with-complements outputs. Semi gloss black body with white characters on black wheel.

STANDARD MODULE

Edge-operated thumbwheel switches provide low-cost highly versatile multiple-operation switching function. Switches have large white characters on black background. Standard size switch face is 1.78" high; each switch occupies 0.750" width and extends 2.56" from rear of panel. Av. wt., 1 oz.

MINIATURE MODULES

Miniature switches are used where panel space restrictions are a problem. Switches are edge-operated and have white characters on a black background. Miniature switch face is .960" high; single switch occupies 0.500" width and extends 1.52" from rear of panel. Av. shpg. wt. ½ oz.

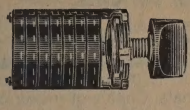
ATTENTION INDUSTRIAL BUYERS

NEWARK carries complete lines of the top quality electronic equipment. Newark can supply all your needs, whether or not they are listed in this catalog.

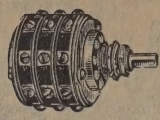
Shallcross Rotary Switches



SERIES 1

SERIES 2

SERIES 4



MIL-S-6807

Shallcross series 1-2-4 are manufactured to MIL-S-3786 specifications and are available with military stamping on special order. Series one is 1" in diameter; two is 1¾" sq.; and four is 2½" sq. All have 5/16" bushing length, 1" shaft and adjustable stops. Contacts are constructed of solid silver alloy. Indexing provided by dual balance balls riding hill-and-dale type detent with special lubricant applied to all friction points. Position stops can be adjusted to alter the number of positions available. Additional decks configurations, shaft sizes, bushings, flat angles, seals, gold plating, MIL-S-3786 testing are available on special order.

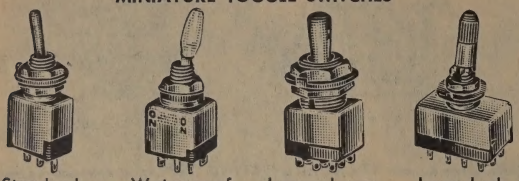
Cutler-Hammer Miniature Switches

MINIATURE TOGGLE SWITCHES



Standard Single Pole | Waterproof Double Pole | Larger Lever Three Pole | Lever Lock Four Pole

Miniature toggle switches. Maintained and momentary center "Off" devices rated 5 amps @ 125VAC and 28 VDC. Without center "Off" units rated 10 amps @ 125VAC; 5 amps @ 28VDC maintained—5 amps @ 125VAC and 28VDC momentary. Features include a .413" high lever, ¼-40 dia. bushing, solder lug terminals. Hardware for complete toggle line furnished unassembled.

WATERPROOF MINIATURE TOGGLE SWITCHES

Double seal design. Internal neoprene "O" ring seal restricts entrance of moisture into switch base. Withstands a 3.3 foot head of water for 15 minutes at temperatures from 25° to 65° C. Additional "O" ring bushing seal mounts under facenut for panel seal. ¼-40 flatted bushing prevents switch rotation.

SNAP-IN ILLUMINATED ROCKETTE SWITCHES

Full size, twin lamp design. 2PDT. Rated 10 amps @ 125 VAC; 6 amps @ 250 VDC; 5 amps @ 28 VDC. Two-piece rocker construction for front-of-panel bulb replacement. Bulb filter (colored) caps provide flexible lighting patterns and even light dispersion over entire rocker face when illuminated. Lamp circuits are electrically independent of switch circuit. Snap-in switch base mounts in panels ranging from .040" to .150" thick. Panel cut-out 1.300"x.780". Solder lug terminals.

Note: You must make the complete ordering number when placing your order. Switches employ standard slow-make, slow-break rocker type mechanism with nylon toggles epoxied on to the metal actuator. One hole mounting, one hexagon locknut and one knurled furnished unassembled. Bushing is $1\frac{3}{32}$ and $1\frac{5}{32}$" long. Caution: These are assembled special order switches as per your requirements. **Caution** is advised in choosing correct part numbers.

Cutler-Hammer AC-DC Switches

AC-DC DESIGNER LINE

Lever C

Lever D

Designer line switches employ standard utility mechanism with addition of nylon toggles. Are available in eight styles, and in seven colors on special order. Standard levers C and D are listed below. All are double insulated and feature quick-make, quick-break contact mechanism. Nylon bushing in $^{15}/_{32}$-32, $^{11}/_{32}$ long. Furnished with all necessary mounting hardware. Designer line facenuts optional UL and CSA approved. Note: switches with other than standard bushing length ($^{11}/_{32}$), for dry circuit applications, with other than listed ampere ratings, terminations, descriptions and colors-available on request.

SPEED CONTROL MODULE

Used in conjunction with an external 250K ohm variable resistor (to 22 ga. wire) and "on-off" switch. Module provides "stepless" ("off" to "full on") speed control of fractional H.P. universal motors. Mounting means: nest mounting. Electrical details: withstands inrush currents up to 21 amps. Rated: 125VAC 4 amps. Terminals: wire leads. Leads meet U.L. specifications. Mechanical details: static design.

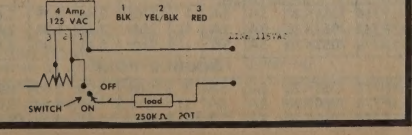
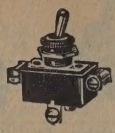
WIRING CONNECTION FOR SPEED CONTROL



AC-DC UTILITY AND HEAVY DUTY

8280



8365

8368

7320

Small and compact, designed for small motor loads and radio appliances. Employs quick-make, quick-break mechanism. Reduces pitting of contact surfaces due to high arcing on overload currents. Impossible to "tease" the switch due to over center spring construction. Enclosed in phenolic housing. Terminals are well separated to reduce possibility of electrical creepage and to facilitate wiring. Super structure and bushing are bright nickel plated. Standard and heavy duty employs some basic mechanism with large contact surfaces to reduce pitting.

Cutler-Hammer AC Switches

Single Pole

Double Pole

Triple Pole

Four Pole

General purpose light and heavy duty AC switches for power appliances. Employ slow make-slow break rocker type contact mechanism. Combination phenolic-metallic housing. All one hole mount type. One hexagon locknut and one knurled facenut furnished unassembled. Terminals in rear of base facilitate wiring and reduce possibility of electrical creepage. Visible metal parts are bright nickel plated (except for 8320 which is zinc with aluminum ball, U/L approved.

*See lever travel chart on facing page.

**Lever-Sealed Switches ‡Reversing Circuit.

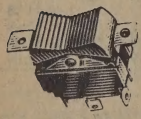
ROCKETTE



Rockette switches offer unique low profile styling positive on-off operation, momentary and maintained contact action, and surrated surface. Employ standard slow-make, slow-break rocker type mechanism. All are rated 15A @ 125 VAC, and 10A @ 250 VAC. All have #6-32 tapped holes on 162 mounting centers.

*See level travel chart on facing page.

**Screw Terminals.

MINIATURE TOGGLE

Miniaturized AC toggle switches are ideal for use in solid state devices, and in miniaturized circuitry. Employ slow-make, slow-break type of mechanism. Switches have one hole mount with hexagon facenut, locknut, internal tooth lockwasher and locking ring are furnished unassembled. Solder lug terminals (.07 dia. holes) are made of solid silver. Visible metal parts are made of burnished nickel. Nominal rating: 5A @ 125 vac and 5A @ 28 vdc. Bushing length—¼". Lever extension—⅜", ½ L x ¼ W x 13/16 H. *See lever travel chart on facing page.

Cutler Hammer Switches

ULTRA-MINIATURE PUSH-BUTTON

Mounting nut and shell are brass, nickel plated. Button cap is molded nylon. Gold plated terminals and wiping contacts are excellent for dry circuit operation. Voltage breakdowns: 1000 Vac. Insulation resistance: 200,000 meg-ohms. Contact resistance: 10 millohms (initial). Life expectancy 50,000 operation at rated load. Rated @ 125 VAC (resistive): ¾ amp N.O. and ½ amp. N.C.

MINIATURE SNAP SWITCH

Miniature precision snap action switches. Stable, low wear, operating mechanism capable of providing reliable performance for 1 million operations. High repeat accuracy makes them ideal for limit, monitoring, and pilot applications. Two piece switch housing is constructed of phenolic and riveted together for mechanical strength. Raised bosses on mounting holes permit gang mounting adjacent to one another and establish proper spacing for electrical clearance and heat dissipation. S.L. straight lever; R.L. roller lever; S.R.L. simulated roller lever. 15 Amp. 125-250VAC.-10 amp. @ 28 VDC Temp. -100°F to +185°F. Size 1.094x.625x.400.

SUB-MINIATURE SNAP SWITCH

Sub-subminiature precision snap action switches, ideal for many electronic applications. Small in size, light in weight, rated electrically for 50,000 operations at rated load; mechanical life exceeds 1,000,000 operations. Electrical rating: 7 amps @ 125-250VAC, 25 amps surge; 1 amp @ 28VDC. All are SPDT with single turret terminals. Meas. .500x.380x.210 inch. Temp. -65°F to +265°F. Operating force of all switches is 5 oz. except the low force switches which are 3 oz. The release force is 1 oz. on all switches.

HESITATION SWITCH

Three position center off, hesitation, positive stop, or positive off switches; restrict operation from one "on" position to the other "on" position without a stop in the center position. Use with reversing motors; prevent damage by high currents from reversing. A mechanical interlock in switch prohibits toggle action through center position until pressure is momentarily relieved from lever.

Cutler-Hammer Military Switches

MIL-S-8834B POSITIVE ACTION

8836K1 8837K1

8838K1

Positive action switches are environmentally sealed and feature "tease proof" action. The toggle is linked directly to the movable contact member to insure positive make and break. Enclosed in combination nylon filled molding and stainless steel housing. Wiping action keeps contacts clean and smooth and insures low contact resistance for dry circuits. Rated at 25 amps @ 28VDC and 20 amps @ 115VAC resistive load.

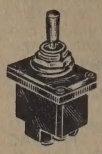
MIL-S-3950C ENVIRONMENTALLY SEALED

8500



8501

8505

The C-H brown base has patented sealing process. Molding material provides greater safety, higher ignition time, and increased arc resistance under contaminated conditions. Positive detent feel and reliable momentary return action. Improved dielectric capability. Simplified wiring and bussing, and offers excellent sealing in medium-range pricing. Rated: 20 amps @ 28VDC and 15 amps @ 115VAC resistive load.

MIL-S-8834B MINIATURE LARGE LEVER

8868

8869

The mechanism on this line of switches is similar to the standard size positive action switches. Gold plated contacts make and break with a wiping action for good contacts on dry circuits. The gold plates terminals are "potted" to prevent the entrance of such contaminants as dust, solder flux and moisture. All levers are sealed. (SP .562 x .354 x .706) (DP .562 x .546 x .706) Rated 4 amps @ 28 VDC and 3 amps @ 115 V AC resistive load.

Momentary snap action pushbutton switches have wiping contacts (overtravel .012") mechanical life 250,000 operations. Rated: 10 amps @ 125vac. and 28 vdc resistive load. Case protects against dust, water, and other environmental conditions. High 120 gram contact pressure with low contact resistance; 41 lbs. operating force, choice of (cr) red or (cb) black button.

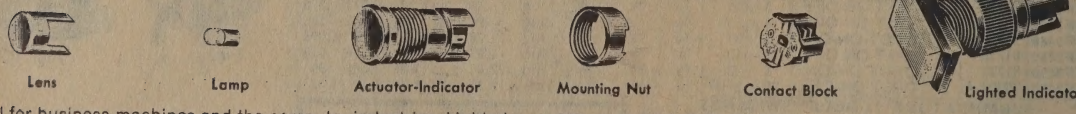
ADAPT-A-SWITCHES



Ideal for business machines and the computer industries. Lighted pushbutton switches designed to offer 25, 344 combinations with 31 components listed below. Highly reliable—100,000 cycles mechanical and electrical at full rating. Rated: 5A @ 125vac, 2A @ 250vac, and 5A @ 28vdc. Minimum rating for dry circuit application 10 microamp, 50 mV. Uses standard T-1¾ (CM #327, #328, #330, #387 incandescent lamp with grove base (not supplied). Installed through front of panel.

ULTRA COMPACT 70-700 PROXIMITY SWITCH

Ultra compact proximity switch for precision control without physical contact. Consists of a control module (2.53" x 3.75" x 1.35") which contains a 10 amp DPDT relay plug-in terminal block (2.19" x 2.66" x.84"), potted sensor with 20' cable, and potentiometer for sensitivity control. Senses both ferrous and non-ferrous metals. Up to 1000 operations per minute possible. Sensing range for .750 dia. sensor is .110" to .261", for .440" dia. sensor .048" to .148". Shipping wt. for complete unit 1½ lbs. (For complete unit pick, (1) control module, (1) terminal black (1) sonsor, add (1) pof + (1) enclosure if desired.)

DIECAST ENCLOSED SWITCHES TYPE 30

Type 30. For industrial control limit, safety applications. Polyethyelene diaphram provides a positive switch seal with unlimited life, minimizes "pumping" by its minute movement and eliminates customary problems of tearing and cracking. "O" ring at base prevents extrusion of gaskets. Aluminum diecast housing provides rugged enclosure, ½—¼ internal tap conduit hub, 15 amps 125/250/480 V AC. .5 amps @ 125 V DC. Size: 3"x1"x2"x½". Shpg. wt., 10 oz.

Plunger Switch

SPLIT DIECAST TYPE 30 ENCLOSED LIMIT SWITCH SIDE MOUNT

"Easy-wire" split diecast version of Type 30 above offers all features with one added feature: entire bottom half of protective case can be removed for ease in wiring. Bottom half enclosure is made of high impact, chemically resistant polyvinyl dichloride which eliminates any possibility of shorting out the basic switch.

NEWARK —

YOUR DEPENDABLE SOURCE

FOR ALL ELECTRONIC NEEDS

Type 10

BASIC SWITCHES

Type 10. Highly sensitive "serpentine blade" snap action switch. 1" mounting centers rated 15 amperes 125, 250 or 480 AC. 2" x 1" x 11/16". Shpg. wt., 1.3 oz.

Type 11

MINIATURE SWITCH

Type 11. High capacity two circuit Double break mechanism with wiping action. Rated 10 amperes at 125/250 V AC. 1¼"x½"x½". Ship. wt., 3/10 oz.

Type 14

HEAVY DUTY SWITCH

Type 14. Industrial limit switch. Uses double break mechanism for high electrical rating, 20 amps at 125/250/480 VAC. 1¾"x¾"x¾". Shpg. wt., 1¼ oz.

Type 16

SUBMINIATURE SWITCH

Type 16 Double break. 2 circuit rated 10 amps 125/250 VAC. Size 25/32"x7/16"x¼". Shpg. wt., 12 oz.

Type 18

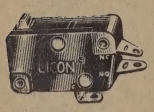
SUB SUBMINIATURE

Type 18. Double break. Rated: 7 amps @ 125/250 VAC; 3 amps inductive @ 28 VDC. Size: .2x.5x.38". Shpg. wt., .003 lbs.

Type 22

DOUBLE POLE SWITCH

Type 22. DPDT high current interruption. Rated 10 amps @ 125/250 VAC; 10 amps @ RES 30 VDC. Double. bearing guide. Wiping action. Dust proof case. Beryllium copper switch blades. Size: ⅞x1¼x½". Shpg. wt., ½ oz.



Type 23

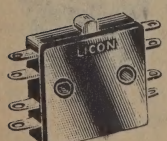
HIGH CAPACITY SWITCH

Type 23. Hi-capacity single break with unique "heat dam" to omit flow of solder inside models having solder terminals. UL rated 15 amps @ 125/250 VAC. 10 amps resistive and 6 amps inductive @ 30 VDC. Size: 1.34 x .625 x .41". Shpg. wt., 3/10 oz.

Type 25

"THIN" SWITCH

Type 25. Internal wiping action insures resistance to contact weld. Center line plunger rated at 12 amps @ 125/250 VAC. 9/32x53/64x1½". Shpg. wt. 3/10 oz.



Type 26

DOUBLE POLE SUBMIN.

Type 26. Two Butterfly double break mechanisms. Both poles operate simultaneously due to special linkage. Uses type 76 actuators. UL rated 8 amps @ 125/250 VAC. 10 amps. res., 5 ind. @ 28 VDC. 25/32" x .761" x ¼". Shpg. wt., 2/10 oz.

Type 36

3 POLE SUBMIN.

Type 36. Compact triple pole double break switch. Three Butterfly double break mechanisms. Rated at 8 amps 125/250 VAC. Simultaneous handling for up to 6 circuits in a single switch. Uses 76 series actuators. 1.187 x .796 x 250. Shipping weight, 1 oz.

NOTE: For 02 & 04 series select 1 lens cap or light module, 1 housing and 1 switch module to make up a complete unit.

01 SERIES

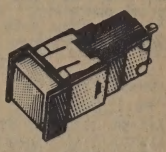
Offers butterfly double break switches rated at 10 amps 125/250 VAC. Momentary, maintained contact, solenoid held and indicator versions available as well as unit on Q.P.L. for MIL-S-22885. Stationary socket, no tool relamping from front of panel. Accepts screw or flange. base T-1¾ lamps.

01 SERIES LENS CAPS. Indicate desired colors by replacing the "X's" with appropriate numbers: 1—white, 2—red, 3—green, 4—blue, 5—yellow, 6—amber, 7—orange.

Type 01

01-600 SERIES

Lighted switch, easy to install snap-in housing available in bezel, single or double barrier design. ¾" lens caps in solid or projected colors.

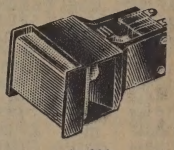


01-600

01-800 SERIES

Snap in single light switch for horizontal or vertical matrix arrangements. Accepts solid or projected rectangular lens caps. Rated 10 amps 125/250 VAC. Accepts T 1¾ flange base lamps.

01-800 SERIES LENS CAP— 1⅛"x⅞" indicate desired colors by replacing the "X's" with appropriate numbers. 1—white, 2—red, 3—green, 4—blue, 5—yellow, 6—amber, 7—orange.



01-800 Bezel-Barrier

02-SERIES

2-light version of the 01-800 with snap in mounting and bezel-barrier appearance. Select lens cap, housing, and snap on 10 amp (125/250 VAC) switch module. Accepts T 1¾ flange base lamps.

02 LENS CAP AND HOUSINGS. Indicate desired colors by replacing the "X's" with appropriate numbers: 1—white, 2—red, 3—green, 4—blue, 5—yellow, 6—amber, 7—orange.

01-800

04 SERIES

Modular four lamp lighted switches. Consists of a light module housing, and switch module which snap together. Accepts 4 T 1¾ flange base lamps (not included.)

04 LIGHT MODULES. Indicate color filter combination for projected screen color by listing color designating letters clockwise in accordance with the color key diagram at right. Example: Vertically split, green on left, red at right— order 04-602GRRG

W—white, R—red
G—green, B—blue
Y—yellow, A—amber
O—orange.

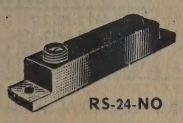
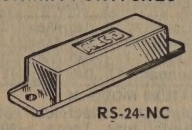
RS-24 MAGNET ACTUATED PROXIMITY SWITCHES



RS-24-NO



RS-24-NC

Enclosed Alnico 5 permanent magnet provides force to actuate reed switch within distances of 1" apart. Used in interlocks, counters, and burglar alarms. Current rating of 5 amperes break, 1.0 amperes carry. Voltage breakdown 300 volts D.C. Life operations 18 million (100 MA. @ 48 volts).

Stk. No.	Model No.	1-24	25-99	100-499	500-999

MINIATURE PUSH BUTTON SWITCHES

MSPE

MSPG

MSP Miniature Pushbutton Switches-snap action, 5 amps@115 VAC. Solid silver contacts, terminals. Bushing size ¼-40 with keyway. Black phenolic case. 20000 action life. **MSPE Waterproof Pushbutton Switches**-(less button) 6 amps resistive 2 amps inductive@125 VAC. Double "O" waterseals, low-loss "E" Series case; turret terminals. Versatile double throw. **MSP-103 Economy Pushbutton Switches**-Specify color when ordering 3 amps @125 VAC Low pressure Silverplated brass contacts, terminals Plunger travels .098". Depth behind panel ¾". 1 pc. ¼-40 bushing. **MSPS-103C** is similar to MSP-103 except smaller diameter, rated 0.5 amps@125 VAC. **MSPG Mustang Pushbutton** less button rated 6 amps@125 VAC (Specs same as MSPE series, less waterproof). 15/32" Bushings.

ILLUMINATED PUSH BUTTON SWITCHES

MSPN Illuminated Push Button Switches are snap-action types capable of handling a high current rating for its small size. DPDT action in a miniature case with separate connections to its replaceable T-1¾ grooved base lamps. Side terminals for simplified wiring or P.C. use. Metal construction, phenolic case, solid silver contacts. 6 amps @ 125 VAC. Mounts in 1 3/32" dia. hole. Wide choice of plastic buttons. **TRANSPARENT** colors: Red, Amber, Blue, Green, Clear. Specify color when ordering. Uses grooved base lamps.

MAGNETIC REPULSION PUSHBUTTON

Momentary push button switches designed for data entry in modern electronic equipment. Ceramic magnets eliminate springs. Contacts are glass-encapsulated reeds for long-life. Plunger is keyed and non-rotating. Metal case withstands abuse and serves as a shield. Rated 100°mA @ 50 VDC, resistance 100 millohms. Contact bounce 1 millisecond. Plunger travel 5/64". Operating force, under 2 ozs. Life, 10 million. All SPST type contacts.

GENERAL PURPOSE MODEL B

Mechanical life of over 10 million cycles. High contact pressure rolling spring has minimum contact bounce and low traverse time. Uniform mating cover onto base. Spring loaded assembly. Contacts rated at 15 amps, 120-240-480 volts AC; ¼ amp, 240 VDC. ½ amp, 120 VDC. Step Base 6-32. Screw terminals are standard. Flat base available on special order.

DOOR INTERLOCKS

Provide required protection to personnel when used as safety devices on hazardous equipment. Break power circuits when service panels are opened and can be manually reactivated by trained servicemen. Resets automatically when panels are closed. Designed for use in office and business machines, x-ray, radar, transmitters, ultrasonics, lasers, and chemical processing machines, etc. 3 types available; General purpose SPDT in 10 or 21 amp rated. Miniature model V 15 amp rated in 1 & 2 pole. Sub-miniature Model Z 5 amp rated up to 4 poles. All switches are available with solder, screw, or quick connect terminals. UL/CSA listed. Over 100,000 cycles.(*)Available with 1 pole or push 2nd pole on pull.

Rotary and Lever Switches

J-B-T INSTRUMENTS

SUB-MINIATURE ROTARY SWITCHES INCLUDING SRO5 STYLE TO MIL-S-3786C

(Contacts bent only on special order) Deck wafers are epoxy-glass fabric laminations per MIL-P-18177C GEB. Deck rotor meets MIL-I-10A. Wafer contacts are 90% silver alloy, gold-plate, double wiping for low contact resistance, and self cleaning. Frame, detent mechanism, and shaft are stainless steel. Dielectric strength 1000 volts RMS. Insulation resistance exceeds 100,000 megohms. Current carrying capacity: 5 amp. Current breaking capacity: 750MA at 30 DCV; 300 MA at 120 DCV; 1 amp at 115 ACV. non-inductive. Include A7505 knob. Positive 30° indexing. (Also available with 60° or 90° indexing). Nominal 1" diameter. Patented Series 7000 provides a full 12 live switching contacts per deck. Series 5000 has the same wafer design but provides nearly twice the switching capability per deck, with up to 12 contacts on the front and up to 12 contacts on the rear of the same deck. Figure 3 in manufacturer's type number indicates for vibration grade 3, 10 to 2000 cps.

MULTI POLE MOLDED ROTARY SWITCHES

Series 20M. Made of superior molded materials, bonded and ruggedized. Provides 19 positions and off. Versatile; up to four poles per deck. Uses melamine stators and rotors. Built-in panel locator non-turn device. Rotor brushes made of phosphor bronze, heavily silver plated. All are non-shorting. Same size as MS-20 at right, except 1/4" longer behind panel.

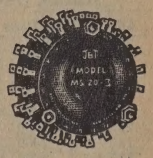
ENCLOSED MOLDED ROTARY SWITCHES



Interchangeable with J-B-T, SS-14 and SS-20 laminated types but offers enclosed construction. Heavy silver plated contacts are rated at 1 amp —125 VAC. inductive. Double-grip collector arms reduce contact resistance to an average of .007 ohm. Type MS-14 has a diameter of 2 3/32", while type MS-20 is 2 5/8". With bar knob. Type MS-14 switches require 25° 43', and Type MS-20 takes 18° plates. 5 oz. one-deck switch 27/32" deep behind panel. Extra decks 5/16" each. **All non-shorting except (**) shorting *2 position fixed stop, with no "off" position.**

SUBMINIATURE ROTARY SWITCHES

Ultra-compact switches provide superior insulating quality, with dimensional stability even under severe environmental conditions. For all applications where extremely small size is essential. Long-life silver alloy contacts are gold plated to prevent tarnish. Double-wiping design, with frame components of materials and finishes to withstand 50-hour salt spray. Exclusive Tri-Ball detent mechanism, with helical spring provides approximately 16 in-oz. torque. Offers negligible contact noise and circuit resistance thruout 10,000 cycle life. All are non-shorting.

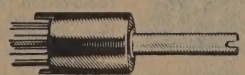
MICROMINIATURE 10 POSITION SWITCH



Single pole, 10 position, with continuous rotation and non-shorting contacts. Free-standing on PC, board, with leads that can be dip soldered. Up to 1/2 AMP at 28 VDC; 0-10 AMP at 120 VAC noninductive. Breakdown voltage, 500 VAC between contacts to ground; Slotted 1/8" diameter, plain round poly sulfone plastic shaft. Glass-filled diallyl pathalate conforming with MIL-M-14, usable to 85°C. Provides smooth "feel" and constant torque through switch life. Spring-tempered copper alloy and spring steel with heavy gold plating. Fully tested for 5000 cycles. Size .300" dia. x 1/2" above panel. Shock tested at over 23,000 G's.

Oak Switches

Complete hardware consisting of mounting nut and lockwasher, stop washer, assembly tie rods and spacers, washers, nuts. Type A uses stainless steel and brass nickel plated parts to meet 200-hour salt spray. All others use steel and brass parts cadmium plated and chromate dipped to meet 50-hour salt spary. (*) Dimension from mounting surface to rear of shaft. Shpg. wt. 3 oz.

TYPE 20 SERIES ROTARY SWITCHES

Economical switches provide more flexibility and adaptability to circuit design. Ideally suited for all light duty circuit switching such as radio-phono, stereo channel reversing, meters, speakers and related equipment. Shaft is 2 3/8" long. Grooved for break-off at 3/4", 1 1/8" and 1 7/8" from the mounting surface.

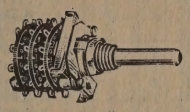
GLOBE-UNION INC.

PSA SUB-MINIATURE ROTARY SWITCHES



Index mechanism with adjustable stops for extra switching arrangement and versatility. Bushing: 3/8". Index angle: positive 30°. Index stop strength: 10 inch pounds. Section spacing: 9/32" between front plate and clip surface of first section, 5/32" spacing between sections. Insulation: Diallyl Phthalate with high quality molded thermosetting plastic type SDG per MIL-M-14F. Resistive load: 0.550 amps at 28 volts VDC; 170 ma. at 115 VAC. Weight of each switch is less than one ounce.

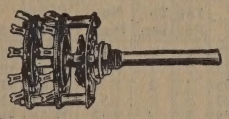
ROTARY SELECTOR SWITCHES—PHENOLIC INSULATION



Series 1400 offers compact design and quality construction. Laminated phenolic insulation. Mounting bushings 3/8-32 NEF-2A thread, 3/8" long. Shafts 17/8" from end of bushing. Positive 30° index with adjustable stop. Size and current rating same as 2500 series. Breakdown voltage 1000 VAC. includes pointer knob, nut and lockwasher. Shpg. wt., 4 oz. per section.

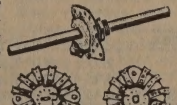
SEPARATE CERAMIC SECTIONS



Separate sections. Use with index assemblies P-270, P-271 and P-272, below to assemble switches with special characteristics. Special section PISD, one off position, nine progressively shorting positions. Sections NSD and PSD combine for resistance decade. Section OSD special for capacitance decade. Special sections GGD and FFD all unused contacts connected and shorted. Wt., 4 oz.

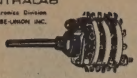
Centralab Switches

SUB-MINIATURE CERAMIC SWITCHES



Ultra-small ceramic rotary switches ideal for use in transistor circuits, aircraft instruments, etc. Bolt construction with single hole bushing mount; locating lug on 3/8" radius; 1/8" D. shaft, cadmium plated steel, 1 1/4" long from mounting surface. Index angle positive 30° with index stop strength of 10 in.-pounds. 5/32" spacing between front plate and first section. Make, break, resistive load; .550 amps @ 28 VDC; 170 ma at 115 VAC (based on 10,000 cycles). Avg. initial resistance 5 milliohms. Includes mounting nut, lockwasher, and 11/16" D. black pointer knob. Wt., 2 oz. per section.

SHAFT AND INDEX ASSEMBLIES

Hardware for sub-miniature switches. All index assemblies listed are designed for a maximum 3 sections and contain one index and shaft assembly, one P-106 pointer knob, six e;ds'' spacers, two q;ah'' spacers, two 1/8'' spacers, two e;ah'' spacers, two 1 1/8'' tie bolts, nuts, lockwashers, washers, and sixteen plastic spacer washers. Shipping weight, 2 oz.

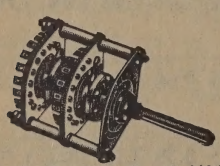
HEAVY DUTY ROTARY POWER SWITCHES



Steatite insulation; 3/8'' bushing mounted; 1/4'' D shaft, double flat steel. 2 1/4'' L. from mounting surface. Index angle is 20° with 2 adjustable stops. 1'' spacing between front plate and first section. Make and break res. load; 9 amps @ 110 VAC-RMS; 15 MA @ 2500 VAC-RMS; 30 amp. @ 5 VDC, 20 amp. @ 12 VDC; 11 amp. @ 28 VDC. Contact resistance 7 miliohms with rotational life 25,000 hz min. Comes with 2'' double setscrew pointer knob, dial plate, adjustable stop pin and nut and instruction sheet. Shpg. wt., 6 oz.
